

SOLAR PILING LIGHT FOR MARINAS- L2049

This product is a solar-powered light used for illuminating marinas, docks, decks, or walkways. The highly efficient solar panel will convert solar energy into electrical energy and store power in the built-in battery for the LED. The specific light-control system makes sure that the product is charged in the daytime and will automatically light up in the evening. It is not only easy to install, but also weatherproof and energy efficient.

Features

- No wires or outlets needed, just sunlight
- Super bright LEDs
- Specially designed for marinas
- Quality ABS plastic
- Weatherproof and rustproof
- Easy to install

Instructions

1. Switch the button to "ON". Then, leave it under the sunlight to charge. Please check it at night to make sure it lights up.
2. Once it's functional, place and screw the light on top of a wooden pole.

Note

1. As the power of the solar panel depends on the sunlight, the LED lighting time is affected by weather, seasons, places, etc.
2. It is charging only when the button is turned ON.
3. If you will not use it often, please try to charge it regularly, at least once a month. This can prolong the lifetime of the battery.
4. Don't drop, pierce, strike, or open the product, so as not to cause irreversible damage and will void the warranty.
5. Keep the surface of the solar panel clean for maximum sunlight exposure.
6. Don't let children play with it.

Specifications

Solar panel: 6V/1.5W
