Cable Modem plus Router

16x4 686 Mbps plus
AC1900 Dual Band Wi-Fi
with Power Boost

The Motorola Model MG7550 cable modem with built-in router supports modem speeds up to 686 Mbps. With its high speed and IPv4 and IPv6 networking support, this is a product designed and built for use today and for years to come. The embedded AC1900 Dual Band wireless router provides the range, wireless speeds and networking support needed for multimedia, Internet video and high-performance networking in a home or office. Power Boost technology amplifies the wireless signal to the legal limit in the U.S. AnyBeam implicit beamforming at 2.4 GHz and 5.0 GHz focuses the wireless signal toward the wireless clients. Both Power Boost and AnyBeam extend range. Together, they provide the fastest and most robust connections over the largest possible range, for virtually all client types.

Features

Fast data speed – Up to 686 Mbps downstream and 123 Mbps upstream with bonding of up to sixteen channels downstream and four channels upstream. Full-Band Capture Digital Tuning lets service providers deliver faster, more reliable Internet.
