

EASY TO INSTALL
in an hour or less

NO Chemicals
No Additives
No Excavation

Actual lawn before and after installation of Septic System Saver.

Reclaim Your Home and Yard!

Save your septic system with the patented and proven power of Aerobic Action.

Eliminate foul septic odor and pooling liquid in septic drain field—prevent sewage backflow and back up.

Fix sluggish drains, gurgling pipes and toilets that are slow to flush.

Your septic tank discharge will be 90% cleaner than before, a benefit to your local groundwater.

University Studies Agree

"... adding an aerobic treatment device restores the original functioning of the soil absorption system (drainfield) in a matter of months..."

— Purdue University

"... after nine months of operation, the aerobic systems were discharging effluent 95% cleaner than before... clean enough to surface discharge..."

— Baylor University

- 24 month warranty

BEST Restoration

Note: Selecting a higher capacity model than required will speed up the restoration process! Selecting too small of a capacity will hinder the restoration process.
