Congratulations on purchasing your new Hunter® ceiling fan! It will provide comfort and performance in your home or office for many years. This installation and operation manual contains complete instructions for installing and operating your fan.

We are proud of our work and appreciate the opportunity to supply you with the best ceiling fan available anywhere in the world.
What to Expect with Your Installation

Know your wiring
If you are unfamiliar with wiring, use a qualified electrician.

Assess location
30 inches from blade tip to nearest wall or obstruction
7 feet from bottom edge of blade to the floor

You may need a friend to help you.
Check box to see fan weight

Standard Downrod for ceilings 8-10 feet high

Shorter Downrod for fans installed close to ceiling

Longer Downrod for ceilings 10 feet or higher

Select a downrod length

Must be able to secure the fan to building structure or fan-rated outlet box

## Tools Needed

- **Ladder**
- **Pliers**
- **Wire Strippers**
- **Screwdrivers**
- **Power Drill (optional)**
- **9/64” Drill Bit (optional)**

If mounting to a support structure, you will also need these tools.

Do not discard the hardware bags or mix parts from different bags. Make note of the symbol printed on each hardware bag. The symbols can be used to identify the appropriate hardware for each step.
If you have a flat ceiling:
Hang your fan by a standard downrod (included).

If you have an angled ceiling:
1. You will need a longer downrod (sold separately).
2. If your ceiling angle is greater than 34°, you will also need an Angled Mounting Kit (sold separately).

Use the three steps below to determine if your ceiling angle is greater than 34°

1. Fold on dotted line
2. Place against wall
3. Slide toward ceiling

Guide Touches BOTH Ceiling & Wall
You need ONLY a Longer Downrod
*most common

Guide Touches Wall but NOT Ceiling
You need BOTH a Longer Downrod & an Angled Mounting Kit

SITUATION 1
SITUATION 2

Mounting Options

Use Standard Mounting or Low-Profile Mounting to hang the fan from a flat ceiling.

Use Angled Mounting to hang the fan from a vaulted or angled ceiling.
Turn Power OFF

For angled ceilings, point opening toward peak.

Make sure all four bumpers are still attached.

If you are unable to do this, call Technical Support at 1-888-830-1326.

Use wood screws (included) when securing to support structure with approved electrical outlet box. Drill 9/64" pilot holes in support structure to aid in securing ceiling bracket with hardware found in the ★ hardware bag.

Use machine screws (provided with outlet box) when securing to existing ceiling fan-rated outlet box. Make sure it is securely installed and is acceptable for fan support of 31.8 kg (70 lbs) or less.

To avoid possible electrical shock, before installing your fan, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.
If you need a different downrod length follow these steps:

Steps 1-5 to remove standard downrod pipe

Steps 6-10 to reassemble with new pipe
Remove the pre-installed setscrew so that the downrod can be inserted.

Hand tighten the downrod (at least 4-5 full turns) until it stops.

The wires can be cut, but leave at least 8" extending from the top of the downrod.

Tighten the setscrew with pliers. **DO NOT HAND TIGHTEN.**

If the setscrew is not tightened securely, the fan may fall.
Put the wires and downrod through the canopy. Let the canopy sit loosely on top of the fan.

DO NOT PICK THE FAN UP BY THE CANOPY OR WIRES. Place the downrod ball into the slot in the ceiling bracket.
**Wiring**

**Note:** To connect the wires, hold the bare metal leads together and place a wire connector over them, then twist clockwise until tight.

**For a Single Switch**
Using the orange wire connectors from the ★ hardware bag, connect the black wire (ungrounded) from the ceiling to the black from the fan. Connect the white wire (grounded) from the ceiling to the white wire from the fan. Cap the blue wire from the fan with an orange wire connector. It will not be used for single switch wiring.

**For Dual Switches**
Using the orange wire connectors from the ★ hardware bag, connect the white wire (grounded) from the ceiling to the white wire from the fan. Connect the black wire (ungrounded) from the ceiling to the black wire from the fan. Connect the second (ungrounded) wire from the ceiling to the blue wire from the fan.

**Turn the splices upward and push them carefully back through the hanger bracket into the outlet box. Spread the wires apart, with the grounded wires on one side of the outlet box and the ungrounded wires on the other side of the outlet box.**

Refer to CAUTION c.1 on pg. 2.
Canopy

Position the canopy so that, when lifted into place, the canopy fits into the hanging bracket as shown.

Lift the canopy into place so that the screw holes are aligned.

Insert the two canopy screws found in the hardware bag.

WARNING: This receiver cannot be installed in conjunction with any other receiver or hard-wired wall control. Doing so will void your warranty.
Put the blade washers found in the hardware bag onto the blade screws found in the hardware bag. Then install the blade screws to secure each blade to a blade iron.
Screw two housing assembly screws from the hardware bag halfway into the motor housing. It does not matter which two screw holes you choose.

Wrap keyhole slots around the screws and twist counterclockwise.

Insert the third screw, found in the hardware bag, into place and then tighten all three screws.
Raise the LED assembly to the posts in the housing. Attach the LED assembly using the LED assembly screws found in the hardware bag.

Connect the white wire from the fan to the white wire from the light kit. Then, connect the blue wire from the fan to the black wire from the light kit.

Lift the globe and align the notches in the globe with the tabs in the light kit. Attach the globe by lifting and twisting clockwise until it rests firmly in place.

CONGRATULATIONS!
YOU’RE DONE!

See next page for remote operation instructions.
Remote Control

To access the battery compartment, remove the small Phillips head screw that secures the battery door to the transmitter assembly. The battery should be installed with the positive (+) side up. Replace with a CR2032 battery when necessary.

The remote transmitter is already paired to the receiver and ready to use.

Note: If your need to pair your remote, remove the battery door. Cycle power to the fan by turning power off and back on at the wall switch (or circuit breaker if necessary). Within three minutes, press the pair button on the remote. If pairing was successful, a single beep will sound. If three beeps sound, the remote was unpaired. Re-pair using the steps above.

To prevent faulty operation, please disconnect power from all other ceiling fans within range while pairing.
You have two options to install the included remote control cradle to the wall. Choose which path works best for you.

**Option 1: Using Screws**

1. Choose your cradle installation location.
   - If you are installing into drywall, drill two 9/64 width holes using the cradle bracket as a guide. Gently hammer the included drywall anchors into the pre-drilled holes.
   - Install the cradle bracket to the wall with the included screws.

2. Remove the cradle from the cradle bracket.
3. Press the cradle bracket against the wall and hold firmly for 30 seconds.
4. Slide the cradle onto the mounted bracket.

**Option 2: Using Adhesive Strip**

1. Apply the adhesive sticker to the back of cradle bracket per the instructions on the adhesive sticker.
2. Press the cradle bracket against the wall and hold firmly for 30 seconds.
3. Slide the cradle onto the mounted bracket.
Operation, Maintenance, and Cleaning

Fan Operation:
Press and quickly release the fan button on the remote control to turn the fan OFF or ON. Use the fan control directional pad to raise or lower the fan to the desired speed. Press and hold the fan button to reverse the fan direction.

Light Operation:
Press and quickly release the light button on the remote control to turn the light OFF or ON. Press and hold the light button for continuous dim.

Cleaning the fan - use soft brushes or cloths to prevent scratching. Cleaning products may damage the finishes.

Slide the remote into the cradle when not in use.
1. Download the app:
   Visit your app store and search **simpleconnect** to find the app.

2. Launch the app.

3. Follow the onscreen prompts to set up your fan.

**Note:** The HomeKit setup code is located on the front cover of the English side of the Parts Guide.

**SIMPLEconnect connects to available 2.4 GHZ WiFi networks.**
Troubleshooting

Fan doesn’t work

• Make sure power switch is on.
• Pull the pull chain to make sure it is on.
• Push the motor reversing switch firmly left or right to ensure that it is engaged.
• Check the circuit breaker to ensure the power is turned on.
• Make sure the blades spin freely.
• Turn off power from the circuit breaker, then loosen the canopy and check all the connections according to the wiring diagram on pages 9.
• Check the plug connection in the switch housing.

Excessive wobbling

• Make sure the blades are properly installed on the blade iron posts.
• Turn the power off, support the fan carefully, and check that the hanger ball is properly seated.
• Use the provided balancing kit and instructions to balance the fan.

Noisy Operation

• Make sure the blades are properly installed on the blade iron posts.
• Check to see if any of the blades are cracked. If so, replace all of the blades.

Wireless Issues

• Reset the Wi-Fi module by removing the battery door. Press and hold the reset button for 5 seconds. The fan and light LEDs will flash once the module has been reset.

Remote control of fan is erratic

• Make sure the battery is installed correctly.
• Install a fresh battery.

Transmitter only works when held at close range

• Change battery.

If you have multiple remotes or multiple remote-controlled fans installed on the same circuit breaker and you are experiencing interference or faulty operation of your remote controls, please go to www.HunterFan.com/FAQs and click “How do I properly install multiple remote-controlled fans?” for information on how to correct this issue.

Use of the HomeKit logo means that an electronic accessory has been designed to connect specifically to iPod, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, iPhone, or iPad may affect wireless performance.

HomeKit requires an iPhone, iPad, or iPod touch with iOS 8.1 or later. Controlling HomeKit-enabled accessories away from home requires an Apple TV (3rd generation or later) with Apple TV software 7.0 or later and an iPhone, iPad, or iPod touch with iOS 8.1 or later. Android 4.3 or higher
