

Cub Cadet.

OPERATOR'S MANUAL

Single-Stage Snow Thrower — Models 221 HP & 221 LHP

⚠ WARNING

**READ AND FOLLOW ALL SAFETY RULES AND INSTRUCTIONS IN THIS MANUAL
BEFORE ATTEMPTING TO OPERATE THIS MACHINE.
FAILURE TO COMPLY WITH THESE INSTRUCTIONS MAY RESULT IN PERSONAL INJURY.**

CUB CADET LLC, P.O. BOX 361131 CLEVELAND, OHIO 44136-0019

Thank You

Thank you for purchasing a Cub Cadet Snow Thrower. It was carefully engineered to provide excellent performance when properly operated and maintained.

Please read this entire manual prior to operating the equipment. It instructs you how to safely and easily set up, operate and maintain your machine. Please be sure that you, and any other persons who will operate the machine, carefully follow the recommended safety practices at all times. Failure to do so could result in personal injury or property damage.

All information in this manual is relative to the most recent product information available at the time of printing. Review this manual frequently to familiarize yourself with the machine, its features and operation. Please be aware that this Operator's Manual may cover a range of product specifications for various models. Characteristics and features discussed and/or illustrated in this manual may not be applicable to all models. We reserve the right to change product specifications, designs and equipment without notice and without incurring obligation.

If applicable, the power testing information used to establish the power rating of the engine equipped on this machine can be found at www.opei.org or the engine manufacturer's web site.

If you have any problems or questions concerning the machine, phone your local Cub Cadet dealer or contact us directly. Cub Cadet's Customer Support telephone numbers, website address and mailing address can be found on this page. We want to ensure your complete satisfaction at all times.

Throughout this manual, all references to *right* and *left* side of the machine are observed from the operating position.

Record Product Information

Before setting up and operating your new equipment, please locate the model plate on the equipment and record the information in the provided area to the right. You can locate the model plate by standing at the operator's position and looking down at the right rear of the snow thrower. This information will be necessary, should you seek technical support via our web site, Customer Support Department, or with a local authorized service dealer.

Product Registration and Customer Support

Please register your product on our website, www.cubcadet.com.

If you have difficulty assembling this product or have any questions regarding the controls, operation, or maintenance of this machine, you can seek help from the experts. Choose from the options below:

- ◇ Visit us on the web at www.cubcadet.com

See How-to Maintenance and Parts Installation Videos at www.cubcadet.com/tutorials

- ◇ Call a Customer Support Representative at (800) 965-4CUB
- ◇ Locate your nearest Cub Cadet Dealer at (877) 282-8684
- ◇ Write to Cub Cadet LLC • P.O. Box 361131 • Cleveland, OH • 44136-0019

WARNING! This symbol points out important safety instructions which, if not followed, could endanger the personal safety and/or property of yourself and others. Read and follow all instructions in this manual before attempting to operate this machine. Failure to comply with these instructions may result in personal injury. When you see this symbol. **HEED ITS WARNING!**

CALIFORNIA PROPOSITION 65

WARNING! Engine Exhaust, some of its constituents, and certain vehicle components contain or emit chemicals known to State of California to cause cancer and birth defects or other reproductive harm.

DANGER: This machine was built to be operated according to the safe operation practices in this manual. As with any type of power equipment, carelessness or error on the part of the operator can result in serious injury. This machine is capable of amputating fingers, hands, toes and feet and throwing foreign objects. Failure to observe the following safety instructions could result in serious injury or death.

Training

1. Read, understand, and follow all instructions on the machine and in the manual(s) before attempting to assemble and operate. Keep this manual in a safe place for future and regular reference and for ordering replacement parts.
2. Be familiar with all controls and their proper operation. Know how to stop the machine and disengage them quickly.
3. Never allow children under 14 years of age to operate this machine. Children 14 and over should read and understand the instructions and safe operation practices in this manual and on the machine and be trained and supervised by an adult.
4. Never allow adults to operate this machine without proper instruction.
5. Thrown objects can cause serious personal injury. Plan your snow-throwing pattern to avoid discharge of material toward roads, bystanders and the like.
6. Keep bystanders, pets and children at least 75 feet from the machine while it is in operation. Stop machine if anyone enters the area.
7. Exercise caution to avoid slipping or falling, especially when operating in reverse.

Preparation

Thoroughly inspect the area where the equipment is to be used. Remove all doormats, newspapers, sleds, boards, wires and other foreign objects, which could be tripped over or thrown by the auger/impeller.

1. Always wear safety glasses or eye shields during operation and while performing an adjustment or repair to protect your eyes. Thrown objects which ricochet can cause serious injury to the eyes.
2. Do not operate without wearing adequate winter outer garments. Do not wear jewelry, long scarves or other loose clothing, which could become entangled in moving parts. Wear footwear which will improve footing on slippery surfaces.
3. Use a grounded three-wire extension cord and receptacle for all machines with electric start engines.
4. Disengage all control levers before starting the engine.
5. Never attempt to make any adjustments while engine is running, except where specifically recommended in the operator's manual.
6. Let engine and machine adjust to outdoor temperature before starting to clear snow.

Safe Handling of Gasoline

To avoid personal injury or property damage use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive. Serious personal injury can occur when gasoline is spilled on yourself or your clothes which can ignite. Wash your skin and change clothes immediately.

- a. Use only an approved gasoline container.
- b. Extinguish all cigarettes, cigars, pipes and other sources of ignition.
- c. Never fuel machine indoors.
- d. Never remove gas cap or add fuel while the engine is hot or running.
- e. Allow engine to cool at least two minutes before refueling.
- f. Never over fill fuel tank. Fill tank to no more than ½ inch below bottom of filler neck to provide space for fuel expansion.
- g. Replace gasoline cap and tighten securely.
- h. If gasoline is spilled, wipe it off the engine and equipment. Move machine to another area. Wait 5 minutes before starting the engine.
- i. Never store the machine or fuel container inside where there is an open flame, spark or pilot light (e.g. furnace, water heater, space heater, clothes dryer etc.).
- j. Allow machine to cool at least 5 minutes before storing.
- k. Never fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle before filling.
- l. If possible, remove gas-powered equipment from the truck or trailer and refuel it on the ground. If this is not possible, then refuel such equipment on a trailer with a portable container, rather than from a gasoline dispenser nozzle.
- m. Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.

Operation

1. Do not put hands or feet near rotating parts, in the auger/impeller housing or chute assembly. Contact with the rotating parts can amputate hands and feet.
2. The auger/impeller control lever is a safety device. Never bypass its operation. Doing so makes the machine unsafe and may cause personal injury.
3. The control levers must operate easily in both directions and automatically return to the disengaged position when released.
4. Never operate with a missing or damaged chute assembly. Keep all safety devices in place and working.
5. Never run an engine indoors or in a poorly ventilated area. Engine exhaust contains carbon monoxide, an odorless and deadly gas.
6. Do not operate machine while under the influence of alcohol or drugs.
7. Muffler and engine become hot and can cause a burn. Do not touch. Keep children away.
8. Exercise extreme caution when operating on or crossing gravel surfaces. Stay alert for hidden hazards or traffic.
9. Exercise caution when changing direction and while operating on slopes. Do not operate on steep slopes.
10. Plan your snow-throwing pattern to avoid discharge towards windows, walls, cars etc. Thus, avoiding possible property damage or personal injury caused by a ricochet.
11. Never direct discharge at children, bystanders and pets or allow anyone in front of the machine.
12. Do not overload machine capacity by attempting to clear snow at too fast of a rate.
13. Never operate this machine without good visibility or light. Always be sure of your footing and keep a firm hold on the handles. Walk, never run.
14. Disengage power to the auger/impeller when transporting or not in use.
15. Never operate machine at high transport speeds on slippery surfaces. Look down and behind and use care when backing up.
16. If the machine should start to vibrate abnormally, stop the engine, disconnect the spark plug wire and ground it against the engine. Inspect thoroughly for damage. Repair any damage before starting and operating.
17. Disengage all control levers and stop engine before you leave the operating position (behind the handles). Wait until the auger/impeller comes to a complete stop before unlogging the chute assembly, making any adjustments, or inspections.
18. Never put your hand in the discharge or collector openings. Do not unlog chute assembly while engine is running. Shut off engine and remain behind handles until all moving parts have stopped before unlogging.
19. Use only attachments and accessories approved by the manufacturer (e.g. wheel weights, tire chains, cabs etc.).
20. When starting engine, pull cord slowly until resistance is felt, then pull rapidly. Rapid retraction of starter cord (kickback) will pull hand and arm toward engine faster than you can let go. Broken bones, fractures, bruises or sprains could result.
21. If situations occur which are not covered in this manual, use care and good judgment. Contact Customer Support for assistance and the name of your nearest servicing dealer.

Clearing a Clogged Discharge Chute

Hand contact with the rotating impeller inside the discharge chute is the most common cause of injury associated with snow throwers. Never use your hand to clean out the discharge chute.

To clear the chute:

1. SHUT THE ENGINE OFF!
2. Wait 10 seconds to be sure the impeller blades have stopped rotating.
3. Always use a clean-out tool, not your hands.

Maintenance & Storage

1. Never tamper with safety devices. Check their proper operation regularly. Refer to the maintenance and adjustment sections of this manual.
2. Before cleaning, repairing, or inspecting machine disengage all control levers and stop the engine. Wait until the auger/impeller come to a complete stop. Disconnect the spark plug wire and ground against the engine to prevent unintended starting.
3. Check bolts and screws for proper tightness at frequent intervals to keep the machine in safe working condition. Also, visually inspect machine for any damage.
4. Do not change the engine governor setting or over-speed the engine. The governor controls the maximum safe operating speed of the engine.
5. Snow thrower shave plates and skid shoes are subject to wear and damage. For your safety protection, frequently check all components and replace with original equipment manufacturer's (OEM) parts only. "Use of parts which do not meet the original equipment specifications may lead to improper performance and compromise safety!"
6. Check control levers periodically to verify they engage and disengage properly and adjust, if necessary. Refer to the adjustment section in this operator's manual for instructions.
7. Maintain or replace safety and instruction labels, as necessary.
8. Observe proper disposal laws and regulations for gas, oil, etc. to protect the environment.
9. Prior to storing, run machine a few minutes to clear snow from machine and prevent freeze up of auger/impeller.
10. Never store the machine or fuel container inside where there is an open flame, spark or pilot light such as a water heater, furnace, clothes dryer etc.
11. Always refer to the operator's manual for proper instructions on off-season storage.
12. Check fuel line, tank, cap, and fittings frequently for cracks or leaks. Replace if necessary.
13. Do not crank engine with spark plug removed.

14. According to the Consumer Products Safety Commission (CPSC) and the U.S. Environmental Protection Agency (EPA), this product has an *Average Useful Life* of seven (7) years, or 60 hours of operation. At the end of the *Average Useful Life* have the machine inspected annually by an authorized service dealer to ensure that all mechanical and safety systems are working properly and not worn excessively. Failure to do so can result in accidents, injuries or death.

Do not modify engine

To avoid serious injury or death, do not modify engine in any way. Tampering with the governor setting can lead to a runaway engine and cause it to operate at unsafe speeds. Never tamper with factory setting of engine governor.

Notice Regarding Emissions

Engines which are certified to comply with California and federal EPA emission regulations for SORE (Small Off Road Equipment) are certified to operate on regular unleaded gasoline, and may include the following emission control systems: Engine Modification (EM), Oxidizing Catalyst (OC), Secondary Air Injection (SAI) and Three Way Catalyst (TWC) if so equipped.

Spark Arrestor

WARNING! This machine is equipped with an internal combustion engine and should not be used on or near any unimproved forest-covered, brush covered or grass-covered land unless the engine's exhaust system is equipped with a spark arrestor meeting applicable local or state laws (if any).

If a spark arrestor is used, it should be maintained in effective working order by the operator. In the State of California the above is required by law (Section 4442 of the California Public Resources Code). Other states may have similar laws. Federal laws apply on federal lands.

A spark arrestor for the muffler is available through your nearest engine authorized service dealer or contact the service department, P.O. Box 361131 Cleveland, Ohio 44136-0019.

Safety Symbols

This page depicts and describes safety symbols that may appear on this product. Read, understand, and follow all instructions on the machine before attempting to assemble and operate.

Symbol	Description
	READ THE OPERATOR'S MANUAL(S) Read, understand, and follow all instructions in the manual(s) before attempting to assemble and operate
	WARNING— ROTATING BLADES Keep hands out of inlet and discharge openings while machine is running. There are rotating blades inside
	WARNING— ROTATING BLADES Keep hands out of inlet and discharge openings while machine is running. There are rotating blades inside
	WARNING— ROTATING AUGER Do not put hands or feet near rotating parts, in the auger/impeller housing or chute assembly. Contact with the rotating parts can amputate hands and feet.
	WARNING—THROWN OBJECTS This machine may pick up and throw and objects which can cause serious personal injury.
	WARNING—GASOLINE IS FLAMMABLE Allow the engine to cool at least two minutes before refueling.
	WARNING— CARBON MONOXIDE Never run an engine indoors or in a poorly ventilated area. Engine exhaust contains carbon monoxide, an odorless and deadly gas.
	WARNING— ELECTRICAL SHOCK Do not use the engine's electric starter in the rain
	WARNING— HOT SURFACE Engine parts, especially the muffler, become extremely hot during operation. Allow engine and muffler to cool before touching.

WARNING! Your Responsibility—Restrict the use of this power machine to persons who read, understand and follow the warnings and instructions in this manual and on the machine.

SAVE THESE INSTRUCTIONS!

Contents of Carton

- One Snow Thrower
- Two Ignition Keys
- One Engine Operator's Manual
- One Chute Assembly
- One 20 oz. Bottle 5W-30 Oil
- One Chute Rotation Control Assembly
- One Snow Thrower Operator's Manual

NOTE: This Operator's Manual covers several models. Snow thrower features may vary by model. Not all features in this manual are applicable to all snow thrower models and the snow thrower depicted may differ from yours.

NOTE: All references to the left or right side of the snow thrower are from the operator's position. Any exceptions will be noted.

Unpacking the Snow Thrower

1. Open the top of the carton.
2. Cut down the corners on the front of the carton and fold down the front side.
3. Pull the snow thrower out of the carton. Be sure not to damage the chute, chute rotation control assembly or any cables attached to the chute. Some of these parts are shipped under the shroud on the backside of the carton. Check for any cable ties securing the chute and remove if necessary.

Set-Up

Adding Fuel & Oil

Refer to the Engine Operator's Manual packed with your snow thrower for information on adding fuel and oil.

Assembly

Positioning the Upper Handle

1. Remove the wing knob and carriage bolt from the top of the lower handle. See Figure 3-1. It is not necessary to remove the shoulder screw and flange lock nut below the wing knob and carriage bolt.

Figure 3-1

2. Pivot the upper handle into the operating position. Be sure not to pinch any of the cables in the process. See Figure 3-2.

Figure 3-2

3. On model 221 HP, tighten the previously removed hardware to secure the handle in place. See Figure 3-2. On model 221 LHP proceed with step 4.
4. The handle on model 221 LHP can be set in three different position. Place the handle in the desired position and then install wing knobs and carriage bolts in the appropriate hole and secure the handle. See Figure 3-3.

Figure 3-3

Installing the Chute

1. On the 221 HP model place the chute handle on the lower chute as shown in Figure 3-4. Skip to step 2 for 221 LHP models. Be certain that the handle is aligned in the channel on the chute and the tabs snap into place.

Figure 3-4

2. Remove the hex washer screws in the chute base. See Figure 3-5.

Figure 3-5

3. Align the holes in the chute base with the holes in the lower chute and secure with the previously removed hex washer screws. See Figure 3-6.

Figure 3-6

Installing Chute Rotation Control Assembly (Model 221 LHP only)

1. Remove the four hex washer screws from the back of the handle (two on each side). See Figure 3-7.

Figure 3-7

- Using the four hex washer screws, install the chute rotation control assembly. See Figure 3-8.

Figure 3-8

- Remove the screw and hex lock nut from the universal joint. See Figure 3-9.

Figure 3-9

NOTE: Make sure the chute is facing forward when installing the universal joint.

- Install the universal joint on the end of the chute rod as shown in Figure 3-9.
- NOTE:** Be sure the holes in the universal joint line up with the holes in the chute rod. You may have to activate the trigger to allow you to line up the holes.
- Secure the universal joint with the hex nut and screw previously removed. See Figure 3-9.

- Slide the rubber bellow over the universal joint. See Figure 3-10.

Figure 3-10

Installing the Recoil Starter Handle

- Remove the eye bolt and handle knob from the manual bag.
- Place the eye bolt and handle knob on the upper handle as shown in Figure 3-11. Do not fully tighten the hardware until instructed to do so.

Figure 3-11

NOTE: The opening of the eye bolt should face toward the back of the snow thrower.

- Slowly pull the recoil starter handle up towards the eye bolt.
- Slip the recoil starter rope into the eye bolt from the back of the snow thrower. See Figure 3-11.
- Securely tighten the eye bolt and handle knob.

NOTE: This Operator's Manual covers several models. Snow thrower features may vary by model. Not all features in this manual are applicable to all snow thrower models and the snow thrower depicted may differ from yours.

NOTE: All references to the left or right side of the snow thrower are from the operator's position. Any exceptions will be noted.

Headlight (Model 221 LHP)

The headlight is located on the upper center of the control panel and is on when the snow thrower is running.

Recoil Starter Handle

The recoil starter handle is used to manually start the engine.

EZ Chute (Model 221 HP)

The rotation of the chute is controlled by rotating the chute control handle left or right. The angle/distance that snow is thrown is changed by manually tilting the upper chute to the desired position.

Shave Plate

The shave plate maintains contact with the pavement as the snow thrower is propelled, allowing snow close to the pavement's surface to be discharged.

Chute Tilt Control (Model 221 LHP)

The chute tilt control is located to the right of the control panel and controls the angle/distance that snow is thrown. Pull back on the chute tilt control to increase the angle/distance and push forward to decrease the angle/distance.

Chute Rotation Control (Model 221 LHP)

The chute rotate control is located in the center of the control panel and controls the direction snow is thrown. Depress the button and rotate the chute rotation control to the right to turn the chute to the right and rotate to the left to turn the chute to the left.

Auger

When engaged, the auger rotation draws snow into the auger housing and throws it out the discharge chute. Rubber paddles on the auger also aid in propelling the snow thrower as they come in contact with the pavement.

Auger Control

Located on the upper handle, the auger control is used to engage and disengage drive to the auger. Squeeze the control against the upper handle to engage the auger; release it to disengage.

NOTE: Refer to the Engine Operator's Manual for instruction on starting, stopping and operating the engine.

Engaging the Auger

1. To engage the auger and start throwing snow, squeeze the auger control against the handle. Release to stop the auger. See Figure 5-1.

Figure 5-1

Engaging the Drive

Lift up slightly on the handle to allow the rubber paddles on the auger to contact the pavement and propel the snow thrower forward. Pushing downward on the handle will raise the auger off the ground and stop the forward motion.

NOTE: Excessive upward pressure on the handle will result in premature wear on the rubber auger blades which will not be covered by the warranty.

Clearing a Clogged Discharge Chute

WARNING! Never use your hands to clear a clogged chute assembly. Shut off engine and remain behind handles until all moving parts have stopped before using the clean-out tool to clear the chute assembly.

Hand contact with the rotating impeller inside the discharge chute is the most common cause of injury associated with snow throwers. Never use your hand to clean out the discharge chute.

To clear the chute:

1. SHUT THE ENGINE OFF!
2. Wait 10 seconds to be sure the impeller blades have stopped rotating.
3. Always use a clean-out tool or stick, not your hands.

Chute Controls (Model 221 LHP)

Refer to Figure 5-2 for chute controls.

Figure 5-2

To increase the angle/distance snow is thrown, pull up/back on the chute tilt control. To decrease the angle/distance snow is thrown, push down/forward on the chute tilt control.

To rotate the chute to the left, pull the trigger and turn the chute rotation control to the left. To rotate the chute to the right, pull the trigger and turn the chute rotation control to the right.

Chute Control (Model 221 HP)

Refer to Figure 5-3 for the chute controls.

Figure 5-3

To increase the angle/distance snow is thrown, pull up/back on the upper chute. To decrease the angle/distance snow is thrown, push down/forward on the upper chute.

To rotate the chute to the left, turn the chute control handle to the right. To rotate the chute to the right, turn the chute control handle to the left.

Adjustments

WARNING! Before servicing, repairing or inspecting the snow thrower, disengage the auger control. Stop the engine and remove the key to prevent unintended starting.

Shave Plate

To check the adjustment of the shave plate, place the snow thrower on a level surface. The wheels, shave plate and auger should all contact the level surface. Note that if the shave plate is adjusted too high, snow may blow under the housing. If the shave plate wears out excessively, or the snow thrower does not self-propel, the shave plate may be too low and needs to be adjusted.

NOTE: On new snow throwers or machines with a new shave plate installed, the auger may be slightly off the ground.

To adjust the shave plate proceed as follows:

1. Run the snow thrower until the fuel tank is empty.
2. Pull the recoil starter handle until resistance is felt. Then tip the snow thrower back until it rests on the handles.
3. Loosen the four flange lock nuts and carriage screws which secure the shave plate to the housing. See Figure 6-1. Move the shave plate to the desired position and retighten the nuts and bolts securely.

Figure 6-1

4. Tip the snow thrower back to the operating position and pull the starter handle a few times to see if it is difficult to pull.
5. If the starter is difficult to pull, remove the spark plug and pull the handle several times to ensure that any oil trapped in the head is removed.

CAUTION: Oil may come out of the spark plug hole when it is removed and the starter handle is pulled.

6. Inspect the spark plug. If it is wet, clean off any oil before re-installing.

Control Cable

As a result of both the control cable and the auger drive belt stretching due to wear, periodic adjustments may be necessary. If the auger seems to hesitate when rotating, proceed as follows:

The upper hole in the control handle provides for an adjustment in cable tension. To adjust, disconnect the end of control cable from the bottom hole in the control handle and reinsert it in the upper hole. Insert the cable from the outside as shown in Figure 6-2.

Figure 6-2

Test the snow thrower to see if there is a noticeable difference. If after the adjustment to the control cable the auger still hesitates when rotating, see the Service section for instructions on replacing the belt.

Maintenance

Off-Season Storage

If the snow thrower will not be used for 30 days or longer, follow the instructions below.

1. Store the equipment in a clean, dry area.
2. If storing the snow thrower in an unventilated area, rustproof the machine using a light oil or silicone to coat the snow thrower.
3. Clean the exterior of the engine and the snow thrower.
4. Lubricate pivot points on control handle and extension spring at end of control cable with a light oil.

Engine

Refer to the Engine Operators manual packed separately with your snow thrower for maintenance and adjustment information on your engine.

1. To access the oil drain and spark plug it is necessary to remove the lower panel.
2. Remove the three screws that secure the lower panel. Remove the lower panel by lifting up on the panel to free the tabs at the bottom of the panel from the tab slots and then pull back. See Figure 6-3.

Figure 6-3

NOTE: The bottom of the panel has tabs that help hold it in place.

NOTE: An oil drain extension kit is available separately. Contact your local Cub Cadet dealer or contact Cub Cadet's Customer Support for kit #753-06684.

3. Change the oil and/or the spark plug as instructed in your Engine Operator's manual.
4. Re-install the lower panel by placing the tabs in the tab slots, lifting the panel into place and secure with the three screws removed in step 2.
5. Tip the snow thrower back to the operating position and pull the starter handle a few times to see if it is difficult to pull.
6. If the starter is difficult to pull, remove the spark plug and pull the handle several times to ensure that any oil trapped in the head is removed.

CAUTION: Oil may come out of the spark plug hole when it is removed and the starter handle is pulled.

7. Inspect the spark plug. If it is wet, clean off any oil before re-installing.

Replacing Belt

1. Run the snow thrower until the fuel tank is empty.
2. Pull the recoil starter handle until resistance is felt. Then tip the snow thrower back until it rests on the handles.
3. Slide a board up through the auger and through the chute to secure the auger in place.
4. Remove the belt cover by removing the three hex washer screws and one hex lock screw that secure it to the frame. See Figure 7-1.

Figure 7-1

5. Remove the flange nut that secures the auger pulley to the auger shaft. See Figure 7-2.

Figure 7-2

6. Remove the auger pulley and the belt.
7. To replace the belt follow these instructions and refer to Figure 7-3:

Figure 7-3

NOTE: Installing the belt and belt cover may be easier if the auger control is squeezed against the upper handle.

- a. Route the belt around the drive pulley and under the idler pulley. See Figure 7-3.
- b. Route the end of the belt around the auger pulley and slide the pulley back on to the auger shaft. It may be necessary to push down on the idler pulley to get the auger pulley under the belt keeper.
- c. Replace the flange nut and tighten securely.
- d. Reinstall the belt cover removed earlier.
- e. Remove the board from the auger and chute.
- f. Tip the snow thrower back to the operating position and pull the starter handle a few times to see if it is difficult to pull.
- g. If the starter is difficult to pull, remove the spark plug and pull the handle several times to ensure that any oil trapped in the head is removed.

CAUTION: Oil may come out of the spark plug hole when it is removed and the starter handle is pulled.

- h. Inspect the spark plug. If it is wet, clean off any oil before re-installing.

Replacing Auger Paddles

The snow thrower auger's rubber paddles are subject to wear and should be replaced if any signs of excessive wear are present.

CAUTION: Do NOT allow the auger's rubber paddles to wear to the point where portions of the metal auger itself can come in contact with the pavement. Doing so can result in serious damage to your snow thrower.

To change the rubber paddles, proceed as follows:

1. Remove the existing rubber paddles by unthreading the hex washer screws which secure them to the auger. See Figure 7-4.

Figure 7-4

NOTE: The auger paddles should be replaced one at a time so that the auger still attached can be used as an example for positioning and re-installing the new auger.

2. Secure the replacement rubber paddles to the auger using the hardware removed earlier.

Replacing Shave Plate

The shave plate is attached to the bottom of the auger housing and is subject to wear. It should be checked periodically. There are two wearing edges and the shave plate can be reversed.

1. Run the snow thrower until the fuel tank is empty.
2. Pull the recoil starter handle until resistance is felt. Then tip the snow thrower back until it rests on the handles.
3. Remove the four carriage screws and flange lock nuts which attach it to the snow thrower housing. See Figure 7-5.

Figure 7-5

4. Install the new shave plate, making sure the heads of the carriage bolts are on the inside of the housing.
5. Adjust the shave plate as instructed in the Maintenance & Adjustments section.
6. Tighten securely once adjusted.

Engine

Refer to the Engine Operators manual packed separately with your snow thrower for service information for your engine.

Problem	Cause	Remedy
Excessive vibration	1. Loose parts or damaged auger.	1. Stop engine immediately and disconnect spark plug wire. Check for possible damage. Tighten all bolts and nuts. Repair as needed. If the problem persists, take snow thrower to an authorized service dealer.
Snow thrower fails to self-propel	1. Auger control cable out of adjustment. 2. Auger drive belt loose or damaged.	1. Adjust auger control cable as shown in Maintenance & Adjustments section. 2. Replace auger drive belt.
Augers continue to rotate	1. Auger control cable out of adjustment.	1. Adjust auger control cable as shown in Maintenance & Adjustments section.
Snow thrower fails to discharge snow	1. Chute assembly clogged. 2. Foreign object lodged in auger. 3. Auger control cable out of adjustment. 4. Auger belt loose or damaged.	1. Stop engine and disconnect spark plug wire. Clean chute and inside of auger housing with clean-out tool or stick. 2. Stop engine immediately and disconnect the spark plug wire. Remove object from auger. 3. Adjust auger control cable. 4. Replace auger belt.

Component	Part Number and Description
	731-08171 Shave Plate

Phone (800) 965-4CUB to order replacement parts or a complete Parts Manual (have your full model number and serial number ready). Parts Manual downloads are also available free of charge at www.cubcadet.com.

CUB CADET LLC

MANUFACTURER'S LIMITED WARRANTY FOR SNOW THROWERS, LOG SPLITTERS CHIPPER-SHREDDERS, CHIPPER-SHREDDER VACUUMS AND JET SWEEPS

The limited warranty set forth below is given by Cub Cadet LLC with respect to new merchandise purchased and used in the United States, its possessions and territories, and by MTD Products Limited with respect to new merchandise purchased and used in Canada and/or its territories and possessions.

This warranty is in addition to any applicable emissions warranty provided with your product.

For non-commercial use: Cub Cadet warrants this product (excluding *Normal Wear Parts and the Auger Gearbox*, as described below) against defects in material and workmanship for a period of three (3) years from the date of original retail purchase or lease.

For commercial uses and applications: Cub Cadet warrants this product (excluding *Normal Wear Parts and the Auger Gearbox*, as described below) against defects in material and workmanship for a period of one (1) year from the date of original retail purchase or lease.

"Cub Cadet" will, at its option, repair or replace, free of charge, any part found to be defective in materials or workmanship. This limited warranty shall only apply if this product has been operated and maintained in accordance with the Operator's Manual furnished with the product, and has not been subject to misuse, abuse, neglect, accident, improper maintenance, alteration, vandalism, theft, fire, water, or damage because of other peril or natural disaster. Damage resulting from the installation or use of any part, accessory or attachment not approved by Cub Cadet for use with the product(s) covered by this manual will void your warranty as to any resulting damage.

Normal Wear Parts are warranted to be free from defects in material and workmanship for a period of thirty (30) days from the date of purchase. Normal wear parts include, but are not limited to items such as: belts, skid shoes, shave plates, blades, debris collection bags, wheels and tires.

Auger Gearbox — Cub Cadet warrants the auger gearbox (on three-stage snow thrower models *only*) against defects in material and workmanship for a period of five (5) years, commencing on the date of the snow thrower's original purchase.

HOW TO OBTAIN SERVICE: Warranty service is available, WITH PROOF OF PURCHASE, through your local authorized service dealer. To locate the dealer in your area:

In the U.S.A.

To locate the dealer in your area, check your Yellow Pages, or contact Cub Cadet LLC at P.O. Box 361131, Cleveland, Ohio 44136-0019, or call 1-877-282-8684, or log on to our Web site at www.cubcadet.com.

In Canada

Contact MTD Products Limited, Kitchener, ON N2G 4J1, or call 1-800-668-1238 or log on to our Web site at www.mtdcanada.com.

This limited warranty does **not** provide coverage in the following cases:

- a. Routine maintenance items such as lubricants, filters, blade sharpening, tune-ups, brake adjustments, clutch adjustments, deck adjustments, and normal deterioration of the exterior finish due to use or exposure.
- b. Log splitter pumps, valves, and cylinders have a separate one year warranty.
- c. Cub Cadet does not extend any warranty for products sold or exported outside of the United States and/or Canada, and their respective possessions and territories, except those sold through Cub Cadet's authorized channels of export distribution.
- d. Replacement parts that are not genuine Cub Cadet parts.
- e. Service completed by someone other than an authorized service dealer.
- f. Transportation charges and service calls.

No implied warranty, including any implied warranty of merchantability of fitness for a particular purpose, applies after the applicable period of express written warranty above as to the parts as identified. No other express warranty, whether written or oral, except as mentioned above, given by any person or entity, including a dealer or retailer, with respect to any product, shall bind Cub Cadet. During the period of the warranty, the exclusive remedy is repair or replacement of the product as set forth above.

The provisions as set forth in this warranty provide the sole and exclusive remedy arising from the sale. Cub Cadet shall not be liable for incidental or consequential loss or damage including, without limitation, expenses incurred for substitute or replacement lawn care services or for rental expenses to temporarily replace a warranted product.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above exclusions or limitations may not apply to you.

In no event shall recovery of any kind be greater than the amount of the purchase price of the product sold. **Alteration of safety features of the product shall void this warranty.** You assume the risk and liability for loss, damage, or injury to you and your property and/or to others and their property arising out of the misuse or inability to use the product.

This limited warranty shall not extend to anyone other than the original purchaser or to the person for whom it was purchased as a gift.

HOW STATE LAW RELATES TO THIS WARRANTY: This limited warranty gives you specific legal rights, and you may also have other rights that vary in different jurisdictions.

IMPORTANT: Owner must present Original Proof of Purchase to obtain warranty coverage.
