5. Deep clean the base tank and water tank once a week.
6. DO NOT move the device while operating, or it will cause the water in the base to overflow, which will lead to NO MIST or small mist. If it overflows, pour out the water in the base tank, and then operate the device again.

Using Essential Oils with PureSpa XL

To avoid unnecessary damage to PureSpa XL, or harm to you or others, please keep the following recommendations in mind when using essential oils:

- DO NOT exceed 10-20 drops of essential oil per 2 liters of water.
- Avoid spilling essential oil on your skin. If you do, immediately dilute it with a carrier oil like coconut oil or olive oil. If swallowed, seek medical help immediately.
- Clean the water tank after each use. Some essential oils are not water-soluble and may remain in the water tank causing residue or an unpleasant odor if mixed with another essential oil.
- Immediately discontinue the use of any essential oil that makes you feel sick or produces an adverse side effect.
- Pregnant women, elderly people, young children or people with chronic diseases may be more sensitive to a particular fragrance.
- Store essential oil in a cool, dry place with the cap tightly closed and out of the reach of children and pets.
- Observe the expiration date of your essential oil. For most oils, the standard expiration date is one year from first opening. Citrus oils have a six-month expiration.
