

The Foothold ICF Footing System

Fast Track Your ICF Build!

Fast track your ICF build and minimize the time in the trenches with the Foothold ICF Footing System.

The ICF Footing System consists of two main parts:

- Plastic form tie
- 2" foam planks (EPS or XPS) available at local builders supply.

The Foothold itself is a “stay in place” footing form with nothing to strip: No wood planks. No stakes. No spreader boards.
