

ZENITH ZOYSIA Grass Seed & Mulch

Contiene Zenith Zoysia
y Cobertura

Césped para sol y sombra moderada que se extiende y se mantiene verde hasta finales del otoño comparado con otras variedades de Zoysia

- Excelente tolerancia al tráfico
- Buena tolerancia a la sequía
- Desarrolla un césped con resistencia a la maleza densa

El paquete cubre hasta 1,000 pies cuadrados

Profundidad de siembra: 1/4"

Dosis de Siembra: 5 lbs./1,000 pies cuadrados

Mejor Periodo de Siembra:
Del 1 de Abril al 1 de Agosto

Tolerancia a la sombra: Buena

Tolerancia al Trafico: Excelente

Se recomienda cortar a la altura del: 1"

Best Planting Dates:
April 1 through August 1

Shade Tolerance: Good

Traffic Tolerance: Excellent

Recommended Mowing Height: 1"

Care & Maintenance: Fertilize in fall and early spring with a balanced fertilizer. Use lime when pH is low. Water twice weekly when established.

Penkoted® Seed Treatment: This seed has been treated with Mefenoxam, commonly known as Apron XL LS. Do not use for food, feed or oil purposes.

NOTICE: The color green as applied to grass seed is a registered trademark that is registered in the U.S. Patent and Trademark Office by Pennington Seed, Inc.®

CAUTION: This seed has been treated with Cytokinin (as kinetin), gibberellic acid and indole-3-butyric acid commonly known as Stimulate™ Yield Enhancer. Do not use for food, feed or oil purposes.

Stimulate™ is a trademark of Stoller® USA

ZENITH ZOYSIA Grass Seed & Mulch

NEW SEEDING METHOD 1

Prepare your lawn for seeding by tilling then smoothing and raking the lawn to the point of having a smooth firm seed bed. Plant one bag of Pennington's Zenith Zoysia Grass Seed & Mulch mixture with Bio-170™ Granules per 1,000 sq. ft. The seed and mulch are blended to give the correct seeding rate for each of the two components.

Lightly rake the seed bed to cover the seed and the Bio-170™ Granules no deeper than 1/4 inch. Mulch the seeded area lightly with wheat straw or pine straw. **Water daily for 30 days keeping the seed bed moist at all times.** The Zoysia plants will emerge, and over a period of one growing season should form a sod. On poor soils or in unfavorable growing conditions, it may take two growing seasons to completely form a sod.

NEW SEEDING METHOD 2

Spray the present grass on the lawn with a non-selective herbicide labeled for lawn use. Wait approximately 7 days to make certain all grass is killed. On spots not completely dead, re-spray with herbicide. Wait approximately 7 days after the final spraying and plant Pennington's Zenith Zoysia Grass Seed & Mulch mixture with Bio-170™ Granules at the rate of one bag per 1,000 sq. ft., making certain the seed and the Bio-170™ Granules are spread evenly across the area. Aerate the area thoroughly using a checkerboard type pattern. Using a standard lawn mower, mow the dead grass close to the ground allowing the clippings to remain on the ground as a mulch covering the seed. Water daily for 30 days keeping the seed bed moist at all times.

OVERSEEDING METHOD

An alternate method of seeding is to mow the lawn closely then aerate the lawn well with a spike aerator or similar tool. Plant the seed as directed in *Methods 1 or 2*, then aerate or rake lightly to cover the seed no deeper than 1/4" deep. Water daily for 30 days, keeping the seed moist at all times.

PENNINGTON GUARANTEE

If you, the consumer, are not satisfied with this product after use in accordance with packaging instructions, you may be eligible for a refund. Send original receipt, empty packaging and a brief explanation within sixty days of purchase. Upon verification, we will send you a refund check for the purchase price.

NOTICE: Arbitration/conciliation/mediation required by several states. Under the seed laws of several states, arbitration, mediation, or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed, to which this notice is attached, to produce as represented. The consumer shall file a complaint (sworn for FL, IN, MS, MT, SC, TX, WA; signed only GA, CA, ID, ND, SD) along with the required filing fee (where applicable) with the commissioner/director/secretary of agriculture, seed commissioner (IN), or chief agricultural officer within such a time as to permit inspection of the crops, plants, or trees by the designated agency and the seedsman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

*Guaranteed to Grow subject to adequate sunlight, soil, temperature and moisture conditions.

Grass photography for illustration purposes only.

Test results indicate a better stand using coated seed at the same planting rate as uncoated seed. This special coating controls damping-off and many other seedling diseases. These PENKOTED® seed are easier to handle and distribute due to the heavier coating. The coating also attracts moisture which could promote faster germination.
