

Awnings in a Box® and Door Canopy in a Box® Care instructions

PRODUCT CARE

We use only quality fabrics in the manufacture of our products, but fabrics do have a few limitations; therefore proper care of your awning is important to extend its life.

- Remove any wrinkles after installation by spraying awning with water while in direct sunlight and allow to air dry.
- Clean the awning fabric with a mild soap solution or a Fabric Cleaner type product and rinse with water as required, every 6 months or annually.
- Keep the underside of your awning clean and free of debris by brushing gently with a household broom.
- You can increase the life of your awning even further by applying a Fabric Guard/UV type product.
- Remove awning during extremely windy or cold conditions is required to maintain warranty coverage.
- Storing awning indoors during winter will extend the life and beauty of your new awning, be sure to store in a dry area.

THE DON'T'S

- Don't spray insect repellent over fabric, this will void the warranty and staining could occur.
- Don't permit leaves, twigs, pine needles or debris to accumulate and remain on the awning.
- Don't drag on abrasive surfaces, trim trees and shrubs that could come into contact with awning.
- Don't wash with bleach, harsh or abrasive cleaners use only items listed in product care guidelines to clean awning.
- Don't store awning in a sealed, non-breathable bag or container.

THE WARRANTY
