HOW TO FINISH AND INSTALL YOUR PINECROFT™ BIFOLD DOORS

TOOLS REQUIRED

Measuring Tape
Phillips Screwdriver
Drill + 3/16" bit
Safety Glasses
Finishing Materials

FINISHING

As with any quality all-wood product, these bi-fold doors should be properly finished *prior to installation*.

IF YOU PLAN TO PAINT YOUR BI-FOLD DOORS:

1. Prime the entire bi-fold (all exposed surfaces) with a high quality sandable primer applied according to primer label instructions. Make sure that you sand the door first and always sand with the grain of the wood.
2. Allow to dry as specified.
3. After priming, if wood seems "fuzzy" or "rough", sand with fine sandpaper or steel wool, reapply primer if necessary.
4. Apply finish coat/coats of a quality paint.

IF YOU PLAN TO STAIN YOUR BI-FOLD DOORS:

1. Apply stain according to instructions on the stain label. Make sure that you sand the door first and always sand with the grain of the wood.
2. Apply stain and allow to dry as specified; sand if necessary.
3. Apply finish sealer or similar product as instructed on the label.
