# **GENERAL INSTALLATION/SPECIFICATION GUIDE**

1/4" x 20 thread tap.

(Roller type)

# Please Note!!

# Step 1: Rail Installation

1/4" Drill bit (A) Slide brackets into rail, recommended maximum spacing 32 inches apart. Pre-drill holes in wood if

needed and screw brackets in place.

Aluminum Rail Rod

Horizontal Bracket (Roller type)

**Tools Required For Assembly** 

4mm & 5mm allen wrenches. #2 Phillips & #2 Square screw driver.

> Vertical Bracket (Hook type)

End View

**(B)** Use the splice kit to connect rails together. (If applicable) Rolled steel pin

Insert roll pin halfway into one of the rails. Slide the steel bar half-way into rail. Secure the splice kit to rail on both sides by tightening the set screws.

(C) Tap the end of the rail with a <sup>1</sup>/<sub>4</sub>" x 20 tap (not supplied) to screw in the end stop finial (done before installation of rail). Install end cap with screw provided using a 4mm Allen wrench.

Note: Leave at least a 7 inch clearance above the rail for the top guide hardware to operate properly, and allow the ladder to move against the wall for storage.

# Step 2: Ladder Assembly (if applicable)

Assemble the steps onto the side rails with glue and screws. Glue and pin nail the top turned rung into place.

# Step 3: Ladder Hardware Installation

(A) Install steps support rods under each step using 5mm allen

(B) Drill holes and install top guides to ladder centering the top dowel (top dowel recommended) of the ladder. The placement of the holes will allow a small adjustment of height of ladder, either up or down.

Install Top Turned Rungs Use a forstner bit, drill 7/8" hole part way through for the turned rungs

(C) Line up bottom rollers vertical to the floor when ladder is in the climbing position Pre-drill holes and install bottom rollers.

### Top Turned Rung

15-3/8" long x 1-1/4"Dia., 7/8" Dia. ends. 14-3/8" Inside Width Unfinished

Ladder in the climbing position

Ladder in the stored position

Note: Proper Pre-drilling of holes for the wood screws on the bottom of the ladder will prevent splitting of the ladder side rails
