

Recommended Touch-Up Paint for DuraVent's Black Finished Products

Stove Bright® is a high quality, fast drying, high temperature paint - a great match for touching up any of DuraVent's venting pipe, including DuraBlack, DVL and PelletVent Pro. Recommended as the preferred choice for retouching scratches that may occur during installation. Widely available at most hearth shops. Follow directions on the back panel of the spray can.

Stove Bright 54H222 Vent Pipe Black or, Stove Bright Flat Black 6304, match DuraVent products AFTER they have been heat cured by firing the stove. Available through Stove Bright's distribution channel of hearth dealers across the country or on-line.

M&G DuraVent is not associated with Stove Bright, does not sell Stove Bright products and in no event will we be liable for any loss or damage whatsoever arising from the use of this product.
