

Preserve, Protect and Make Your Planter Look its Best

Western Red Cedar is a soft wood and cleaning and basic maintenance should be done with care. If you would like to preserve the wood, enhance its beauty and maximize the lifespan we suggest using our Gronomics Garden Oil. Gronomics Garden Bed Oil is non-toxic, and provides a beautiful food safe finish that is very easy to apply. Oil applications should be administered when air and wind temperatures are between 50-90 degrees. **Avoid applying in direct sunlight for best results.**

Garden Bed Oil
Item#: GBO-1Q

1 quart covers approximately 100-150 sq. ft., which is equivalent to 2 coats for a medium to large size garden bed.

Our Garden Bed Oil Application Package includes all the tools necessary to apply our Cedar Garden Bed Oil to your project. The lamb's wool stain pad with handle works well on the original series products as well as the rustic series.

Complete Gronomics® Garden Oil
Application Package-6 Pieces
Item#: CAP-6

Western Red Cedar left unfinished will turn a weathered gray color.
