

Thank You for purchasing a Rock City Birdhouse. It is truly a piece of Americana that has been etched into Southern culture for over 50 years.

The History of the Rock City birdhouse is linked inexorably with that of the See Rock City Barn. As America began to embrace the automobile and took to the roads, so too did Rock City with the message to visit it's enchanted gardens. Beginning in the 1930's, Rock City began a most unusual advertising campaign that culminated in over 900 barns across America being painted with the slogan SEE ROCK CITY. The Rock City Barn was born and soon was a common sight along the highways and byways of America. The Rock City Birdhouse became a natural extension of the barns and continued to spread the message SEE ROCK CITY, only in miniature. The birdhouse kit you hold in your hands in an authentic piece of this most unusual and truly American institution. Each Rock City Birdhouse Kit is built with pride right here atop beautiful Lookout Mountain. Our wish is that this birdhouse give you many years of service and urges you perhaps to come and SEE ROCK CITY.

Directions for assembly

Kit includes:

1 base

2 roof pieces

4 cardboard pieces

6 perches

2 sides

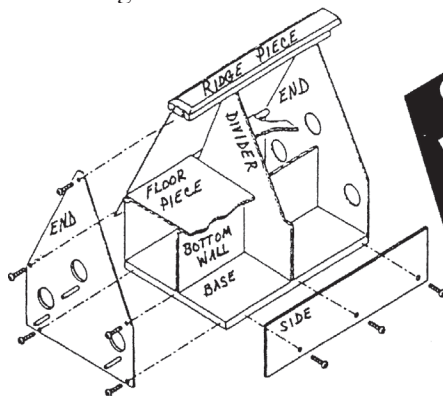

2 end pieces

1 ridge piece

16 short screws

2 screw-eyes

1. Screw the sides to the base and screw one end piece to the base. Sides are interchangeable as are the ends. Be sure the textured side faces out.

2. Slip the roof pieces down over the sides one at a time. There are support pieces already fastened to the inside of the roof pieces which fit inside the side pieces. With screws, fasten the end piece to the roof supports.

3. Place the ridge piece at the end of the roof pieces. The roof pieces will fit into the grooves of the ridge piece. Slide the ridge piece onto the roof pieces until flush.

4. You will find 4 waxed cardboard pieces in this kit. They are cut to size so that you can assemble interior partitions, making 6 apartments in your birdhouse. At this time, one end of your birdhouse should still be open. Slide a floor piece into the house, resting it on the 2 roof support pieces. Put the divider and bottom wall together and slide into the house. Then follow with the other floor piece.

5. Place the end in position and fasten it in place with remaining screws.

6. Place a perch in the small hole beneath each large entrance hole. Your house is now ready for its occupants.

7. If you wish to hang the house from a tree limb, 2 screw-eyes are provided. After assembly, install the screw-eyes in the top of the ridge piece, one screw-eye near each end. Your Rock City Birdhouse can be placed on a post or suspended. Nylon cord makes an excellent weatherproof cord for hanging the house.
