

# **MSDS REPORT**

Sample Name: ACID BATTERY Client Name : CHONGQING HANWEI BATTERY DEVELOP CENTER

Issue date: 2014-01-18

#### SECTION 1-- CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

MANUFACTURER'S

NAME: CHONGQING HANWEI BATTERY DEVELOP CENTER

HAZARD RATING

ADDRESS: UNIT 11 NANPENG YUANYANG TOWN BANAN DISTRICT CHONGQING CHINA

EMERGENCY TELEPHONE NO.: 023-65738185

8185 FAX:023-65153108

#### **SECTION 2 -- COMPOSITION/INFORMATION ON INGREDIENTS**

Components	%Wt.	TLV	LD50 Oral	LC50 Contact	CAS NO.
Lead (Pb, PbO2, PbSO <sub>4</sub> )	About 70%	0.050mg/m <sup>3</sup>	Š,(500) mg/Kg	N/A	7439-92-1
Sulfuric Acid	About 20%	1 mg/m <sup>3</sup>	(2.14) mg/Kg	N/A	7664-93-9
Fiberglass Separator	About 5%	N/A	N/A	N/A	65997-17-3
Container (ABS or PP)	About 5%	N/A	N/A	N/A	25155-30-0

Components	Density	Melting Point	Solubility (in	Odor	Appearance
			H2O)		
Lead	11.35	327.4°C	None	None	Silver-Gray
					Metal
Lead Sulfate	6.25	1170°C	40 mg/l (15°C)	None	White Powder
Lead Dioxide	9.4	290°C	None	None	Brown Powder
Sulfuric Acid	About 1.31(25 <sup>°</sup> ć)	About 114°C	100%	Acidic	Clear Colorless
		(Boiling)			Liquid
Fiberglass	N/A	N/A	Slight	Toxic	White Fibrous
Separator					Glass
					Membrane
Container (ABS	N/A	N/A	NONE	No Odor	Solid Plastics
or PP)					

### **SECTION 3 -- HAZARD IDENTIFICATION**

Signs and Symptoms of Exposure	1. Acute Hazards	Do not open battery. Avoid contact with internal components. Internal components include lead and liquid electrolyte. Electrolyte - Electrolyte is corrosive and contact may cause skin irritation and chemical burns. Electrolyte causes severe irritation and burns of eyes, nose and throat. Ingestion can cause severe burns and vomiting.					
		Lead -Direct skin or eye contact may cause local irritation. Inhalation or ingestion of lead dust or fumes may result in headache, nausea, vomiting, abdominal spasms, fatigue, sleep disturbances, weight loss, anemia and leg, arm and joint pain.					
2. Sub-chronic and Chronic Health Effects		ontact with sulfuric acid battery electrolyte fluid may cause drying of the skin which may result in irritation, s. Repeated exposure to sulfuric acid mist may cause erosion of teeth, chronic eye irritation and/or chronic , throat and lungs.					
	dysfunction. Pregnant w	olonged exposure may cause central nervous system damage, gastrointestinal disturbances, anemia, and wrist-drop and kidney on. Pregnant women should be protected from excessive exposure to prevent lead from crossing the placental barrier and Ifant neurological disorders.					
	<b>California Proposition 65 Warning:</b> Battery posts, terminals, and related accessories contain lead and lead compounds, che known to the State of California to cause cancer and reproductive harm, and during charging, strong inorganic acid mists contain sulfuric acid are evolved, a chemical Known to the State of California to cause cancer. Wash hands after handling.						

# **Material Safety Data Sheet**

Medical Conditions Generally Aggravated by Exposure	If battery is broken or material is spilled, then persons with the following medical conditions must take precautions: pulmonary edema, bronchitis, emphysema, dental erosion and tracheobronchitis.							
Routes of Entry	Inhalation - YES Ingestion - YES		Eye Contact - YES Skin Contact - YES				_	
Chemical(s) Listed as Carcinogen or potential Carcinogen	Proposition 65 - YES	National Toxicology Program - YES		I.A.R.C. Monographs	s - YES	OSHA - NO	EPA CAG - YES	NIOSH - YES

#### SECTION 4 -- FIRST AID MEASURES

Emergency and First Aid Procedures	Contact with internal components if battery is opened, broken or spilled.
1. Inhalation	Remove to fresh air and provide medical oxygen/CPR if needed. Obtain medical attention.
2. Eyes	Immediately flush with water for at least 15 minutes, hold eyelids open. Obtain medical attention.
3. Skin	Flush contacted area with large amounts of water for at least 15 minutes. Remove contaminated clothing and obtain medical attention if necessary.
4. Ingestion	Do not induce vomiting. If conscious drink large amounts of water/milk. Obtain medical attention. Never give anything by mouth to an unconscious person.

#### **SECTION 5 - FIREFIGHTING MEASURES**

Flash Not Point Applicable	Flammable Limits in Air % by Volume (When charging)	Hydrogen (H <sub>2</sub> )	Lower 4.1%	Upper 74.2%	Extinguisher Media	Class ABC, CO <sub>2,</sub> Halon	Auto-Ignition Temperature	Polypropylene 675° F
Special Fire Fighting Procedures	ighting with agent suitable for surrounding combustible materials. Cool exterior of battery if exposed to fire to prevent ruptu						t rupture. The acid	
Unusual Fire and Explosion Hazards	Hydrogen gas and sulf per ACGIH <u>Industrial V</u> Hydrogen gas may be ignition near battery. allow metallic material VIOLENTLY WITH WAT	entilation: À M flammable or e To avoid risk c s to simultane	anual of Re explosive w of fire or ex ously conta	commended Pr hen mixed with plosion, keep s	<u>actice</u> and <u>Natic</u> air, oxygen, chl parks or other s	orine. Avoid op orines of igniti	1980 Vol. 1, P. 12 pen flames/sparks on away from batt	, B-9, 10. /other sources of eries and do not

#### SECTION 6 -- ACCIDENTAL RELEASE MEASURES

**Procedures for Cleanup:** Stop release, if possible. Avoid contact with any spilled material. Contain spill, isolate hazard area, and deny entry. Limit site access to emergency responders. Neutralize with sodium bicarbonate, soda ash, lime or other neutralizing agent. Place battery in suitable container for disposal. Dispose of contaminated material in accordance with applicable local, state and federal regulations. Sodium bicarbonate, soda ash, sand, lime or other neutralizing agent should be kept on-site for spill remediation.

**Personal Precautions:** Acid resistant aprons, boots and protective clothing. ANSI approved safety glasses with side shields/face shield recommended. Ventilate enclosed areas.

**Environmental Precautions:** Lead and its compounds and sulfuric acid can pose a severe threat to the environment. Contamination of water, soil, and air should be prevented.

### SECTION 7 -- HANDLING AND STORAGE

Precautions to be Taken in Handling and Storage	Keep away from flames during and immediately after charging. Combustion or overcharging may create or liberate toxic and hazardous gases and liquids including hydrogen, sulfuric acid mist, sulfur dioxide, sulfur trioxide, stibine, arsine and sulfuric acid. Store batteries in cool, dry, well ventilated area. Do not short circuit battery terminals, or remove vent caps during storage or recharging. Protect battery from physical damage.
Other Precautions	GOOD PERSONAL HYGIENE AND WORK PRACTICES ARE MANDATORY. Refrain from eating, drinking or smoking in work areas. Thoroughly wash hands, face, neck, and arms before eating, drinking or smoking. Launder soiled clothing before reuse. Emptied batteries contain hazardous sulfuric acid residue.

#### SECTION 8 -- EXPOSURE CONTROLS AND PERSONAL PROTECTION

Respiratory Protection (Specify Type)	Acid/gas NIOSH approved respirator is required when the PEL is exceeded or employee experiences respiratory irritation. When exposure levels are unknown or when firefighting, wear a self-contained breathing apparatus with a full face piece operated in a positive pressure mode.							
Ventilation	Must be provided when charging in an enclosed area. Change air every 15 min.	Local Exhaust		When PEL is exceeded.		Mechanical (General)	Normal mechanical ventilation recommended for stationary applications.	
Protective Gloves	Wear rubber or plastic acid		Eye Protection ANSI approved s			safety glasses with side shields/face shield recommended.		
	resistant gloves with elbow length gauntlet when filling batteries.		Safety goggles.					
Other Protective Clothing or Equipment	Ventilation as described in the <u>Industrial Ventilation Manual</u> produced by the American Conference of Governmental Industrial Hygienists, shall be provided in areas where exposures are above the PEL or TLV specified by OSHA or other local, state and federal regulations. Acid-resistant rubber or plastic apron, boots and protective clothing. Safety shower and eyewash.							

#### SECTION 9 -- PHYSICAL AND CHEMICAL PROPERTIES

Boiling Electrolyto Point Approx. 2		Vapor Pressure	Electrolyte 1 Hg @ 145.8°		Specific Gravity	2	e (H <sub>2</sub> 0 = 1) .320 pH < 2		Melting Point	Polypropylene < 320º F
Percent Volatile by Volume (%)	Not Applica	ble	Vapor Density	, ,	(Air = 1) : 0. e (Air = 1) : 3		At STP	Evapora Rate	ation	Not Applicable
Solubility in Water Electrolyte: 100% Soluble				Reactivi in Water		Electrolyte - wat	er reactiv	e (1)		
Appearance Battery: Polypropylene or hard rubber case, solid.   and Odor Lead: Gray, metallic, solid   Electrolyte: Liquid, colorless, oily fluid; nuisance odor when hot or charging battery.										

#### SECTION 10 -- STABILITY AND REACTIVITY

Stability	Unstab Stable	le □ ⊾		Conditions to Avoid	High temperatures - cases decompose at <320°F. Avoid overcharging and smoking, or sparks near battery surface and rapid overcharge.
Incompatibility (Materials to Avoid)Sparks, Open flames, Keep battery case away from strong oxidizers.					
			dioxide (CO <sub>2</sub> ) an		cure within the battery may occur during charging. Combustion can produce carbon (CO). Molten metals produce fumes and/or vapor that may be toxic or respiratory
Hazardous Polymerizati	ion	May Occur □ Will Not Occur ☑		Do not overcharge	».

#### SECTION 11 -- TOXICOLOGICAL INFORMATION

**GENERAL:** The primary routes of exposure to lead are ingestion or inhalation of dust and fumes.

#### ACUTE:

**INGESTION/INHALATION:** Exposure to lead and its compounds may cause headache, nausea, vomiting, abdominal spasms, fatigue, sleep disturbances, weight loss, anemia, and pain in the legs, arms and joints. Kidney damage, as well as anemia, can occur from acute exposure.

#### CHRONIC:

**INHALATION/INGESTION:** Prolonged exposure to lead and its compounds may produce many of the symptoms of short-term exposure and may also cause central nervous system damage, gastrointestinal disturbances, anemia, and wrist drop. Symptoms of central nervous system damage include fatigue, headaches, tremors, hypertension, hallucinations, convulsions and delirium. Kidney dysfunction and possible injury has also been associated with chronic lead poisoning. Chronic over-exposure to lead has been implicated as a causative agent for the impairment of male and female reproductive capacity, but there is, at present, no substantiation of the implication. Pregnant women should be protected from excessive exposure. Lead can cross the placental barrier and unborn children may suffer neurological damage or developmental problems due to excessive lead exposure in pregnant women.

#### **SECTION 12 -- ECOLOGICAL INFORMATION**

In most surface water and groundwater, lead forms compounds with anions such as hydroxides, carbonates, sulfates, and phosphates and precipitates out of the water column. Lead may occur as sorbed ions or surface coatings on sediment mineral particles or may be carried in colloidal particles in surface water. Most lead is strongly retained in soil, resulting in little mobility. Lead may be immobilized by ion exchange with hydrous oxides or clays or by chelation with humic or fulvic acids in the soil. Lead (when in the dissolved phase) is bio-accumulated by plants and animals, both aquatic and terrestrial.

#### **SECTION 13 -- DISPOSAL CONSIDERATIONS**

Waste Disposal Methods	Lead-acid batteries are completely recyclable. Return whole scrap batteries to distributor, manufacturer or lead smelter for recycling.					
	or neutralized spills, place residue in acid resistant containers with sorbent material, sand or earth and dispose of in					
	accordance with local, state and federal regulations for acid and lead compounds. Contact local and/or state					
	environmental officials regarding disposal information.					

#### **SECTION 14 -- TRANSPORT INFORMATION**

U.S. DOT PROPER SHIPPING NAME: UN2794, Batteries, wet, filled with acid, electric storage

- U.S. DOT HAZARD CLASS: 8
- U.S. DOT ID NUMBER: UN 2794
- U.S. DOT PACKING GROUP: III
- U.S. DOT LABEL: Corrosive

IMO PROPER SHIPPING NAME: UN2794, Batteries, wet, filled with acid IMO U.N. CLASS: 8 IMO U.N. NUMBER: UN 2794 IMO PACKING GROUP: III IMO LABEL: Corrosive IMO VESSEL STOWAGE: A

IATA PROPER SHIPPING NAME: UN2794, Batteries, wet, filled with acid IATA U.N. CLASS: 8 IATA U.N. NUMBER: UN 2794 IATA PACKING GROUP: III IATA LABEL: Corrosive

#### **SECTION 15 -- REGULATORY INFORMATION**

U.S. Hazardous Under Hazard Communication Standard:

Lead - YES Sulfuric Acid - YES Antimony - YES Arsenic - YES

Ingredients Listed on TSCA Inventory:

CERCLA Section 304 Hazardous Substances:

## **Material Safety Data Sheet**

#### **SECTION 16 -- OTHER INFORMATION**

THE INFORMATION ABOVE IS BELIEVED TO BE ACCURATE AND REPRESENTS THE BEST INFORMATION CURRENTLY AVAILABLE TO US. HOWEVER, BATTERY COMPANY MAKES NO WARRANTY OF MERCHANTABILITY OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO SUCH INFORMATION, AND WE ASSUME NO LIABILITY RESULTING FROM ITS USE. USERS SHOULD MAKE THEIR OWN INVESTIGATIONS TO DETERMINE THE SUITABILITY OF THE INFORMATION FOR THEIR PARTICULAR PURPOSES. ALTHOUGH REASONABLE PRECAUTIONS HAVE BEEN TAKEN IN THE PREPARATION OF THE DATA CONTAINED HEREIN, IT IS OFFERED SOLELY FOR YOUR INFORMATION, CONSIDERATION AND INVESTIGATION. THIS MATERIAL SAFETY DATA SHEET PROVIDES GUIDELINES FOR THE SAFE HANDLING AND USE OF THIS PRODUCT; IT DOES NOT AND CANNOT ADVISE ON ALL POSSIBLE SITUATIONS, THEREFORE, YOUR SPECIFIC USE OF THIS PRODUCT SHOULD BE EVALUATED TO DETERMINE IF ADDITIONAL PRECAUTIONS ARE REQUIRED.
