Register Your Product

The self-addressed PRODUCT REGISTRATION CARD should be filled in completely, signed and returned to the Frigidaire Company.

Packaging

Remove all packaging from inside the carton, along with any inserts placed into the side louvers.
Remove the plastic ties and foam pad that secure the compressor to the fan shroud (where applicable). See diagram.

Normal Sounds

High pitched Chatter
Today’s high efficiency compressors may have a high pitched chatter during the cooling cycle.

Vibration
Unit may vibrate and make noise because of poor wall or window construction or incorrect installation.

Sound of Rushing Air
At the front of the unit, you may hear the sound of rushing air being moved by the fan.

Pinging or Swishing
Droplets of water hitting condenser during normal operation may cause “pinging or swishing” sounds.

Gurgle/Hiss
“Gurgling or hissing” noise may be heard due to refrigerant passing through evaporator during normal operation.

Note: Don’t try to drill any holes on the base pan to eliminate the normal sounds, otherwise it will void the warranty.
Air Conditioner Features

Before you begin, thoroughly familiarize yourself with the control panel and remote as shown below and all its functions, then follow the symbol for the functions you desire. The unit can be controlled by the touch pad alone or with the remote.

**ELECTRONIC CONTROL**

- **CLEAN AIR FEATURE** (some models)
- **REMOTE TEMP SENSING INDICATOR** (some models)
- **DISPLAYS TEMPERATURE/TIME**
- **CHECK FILTER RESET BUTTON**
- **ACTIVATES TIMER**
- **SETS MODE**
- **TURNS UNIT ON OR OFF**
- **ADJUSTS TEMPERATURE OR TIME**
- **SETS FAN SPEED**
- **SLEEP MODE**

### Operating Instructions

**NOTE**

The following instructions represent the Touch Pad, the same instructions can be used for the Remote Control.

#### TO TURN UNIT ON:

1. **DO THIS:** PRESS ON/OFF BUTTON

2. **YOU WILL SEE:**
   - MODE
   - V
   - ON-OFF
   - FAN SPEED
   - heat cool econ fan only
temp/sensor
auto hi med lo

3. **Battery Size:** AAA
   **Warning:** Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.

- STANDARD REMOTE
- FOR HEAT MODELS
- W/DISPLAY & REMOTE SENSING BUTTON

- Battery Size: AAA

- **Warning:** Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.

- Note: The unit will run in energy saver(econ) mode when used for the first time. In this mode, the fan will continue to run for 1 minute after the compressor shuts off. The fan then cycles on for 20 seconds at 10 minute intervals until the room temperature is above the set temperature, at which time the compressor turns back on.
Operating Instructions (continued)

TO CHANGE TEMPERATURE SETTING:

YOU WILL SEE:

Note: Fan starts at High Speed and adjusts to a slower speed the room temperature dictates. For example, if the room doesn’t get too warm, it will stay at the slowest speed. If the room temperature rises quickly, such as a door being opened, it will automatically go to the highest speed. The fan speeds will re-adjust back to the slowest speed as the room returns to the original set temperature. Press either the fan slower or fan faster button to adjust the fan speed manually.

TO ADJUST FAN SPEEDS:

YOU WILL SEE:

Note: Tap or hold either up (▲) or down (▼) button until the desired temperature is seen on the display. This temperature will be automatically maintained anywhere between 60 °F (16 °C) and 90 °F (32 °C). If you want the display to read the actual room temperature. See "To Operate on Fan Only" section on Page 7.

TO USE AUTO FAN FEATURE:

YOU WILL SEE:
Operating Instructions

TO OPERATE ON FAN ONLY:

YOU WILL SEE:

DO THIS:
PRESS MODE BUTTON
CHOOSE FAN ONLY

Note: In this mode, the selected temperature will increase by 2 °F 30 minutes after the mode is selected. The temperature will then increase by another 2 °F after an additional 30 minutes. This new temperature will be maintained for 7 hours before it returns to the originally selected temperature. This ends the "Sleep" mode and the unit will continue to operate as originally programmed. The "Sleep" mode program can be cancelled at any time during operation by again pressing the "Sleep" button.

SLEEP FEATURE:

YOU WILL SEE:

DO THIS:
PRESS SLEEP BUTTON

Note: Use this function only when cooling is not desired, such as for room air circulation or to exhaust stale air on some models. (Remember to open the vent during this function, but keep it closed during cooling for maximum cooling efficiency.) You can choose any fan speed you prefer. (Except “Auto Fan”). During this function, the display will show the actual room temperature, not the set temperature as in the cooling mode.

COOL FEATURE:

YOU WILL SEE:

DO THIS:
PRESS MODE BUTTON
CHOOSE COOL

Note: In this mode, the fan remains on all the time with the compressor cycling on and off when room temperature is reached.

**TIMER: DELAY STOP / START FEATURE**

![Diagram of timer settings]

**FIRST DO THIS:**
- Press **FILTER RESET** button

**THEN DO THIS:**
- Press **UP/DOWN BUTTONS**

Note: For Delay Stop, the unit must be in the On position.

Note: For Delay Start, the unit must be in the Off position.

First, Press **TIMER** button, then adjust timer setting, tap or hold the UP arrow (▲) or the DOWN arrow (▼) to change delay timer at 0.5 hour increments, up to 10 hours, then at 1 hour increments up to 24 hours. The control will count down the time remaining until start (8, 7.5, 7, etc.). The Delay Start Operation automatically selects cooling with maximum Fan speed (if Cool, Energy Saver, or Fan Only was the last mode selected). The temperature maintained will be the same as previously set. To change the set temperature, press "COOL" then Up or Down arrows until the desired temperature is indicated on the display. After 5 seconds, the control will automatically change the display back to the hours remaining until the unit will start/stop. Pressing the unit On/Off button at any time will cancel the Delay Start/Stop function. The Delay Start/Stop Feature will work until the unit either starts or stops. Once that happens the above steps have to be repeated again.

**CHECK FILTER FEATURE, YOU WILL SEE:**

![Diagram of filter settings]

**YOU WILL SEE HOW MUCH TIME IS CHOSEN:**

![Diagram of time settings]

Note: This feature is a reminder to clean the Air Filter (See Care and Cleaning) for more efficient operation. The LED (light) will illuminate after 250 hours of operation. To reset after cleaning the filter, press the "Filter Reset" button and the light will go off.

**CLEAN AIR FEATURE (on some models):**

![Diagram of clean air settings]

Note: When this feature is "ON", the electronic air purifier is energized to remove pollen and impurities from the air. To cancel this feature, press the Clean Air button (the LIGHT will turn off).

Note: This feature can be activated on the unit touch pad ONLY.

REMOTE SENSING FEATURE (on some models)

LIGHT pulsing (On & Off intermittently).

DO THIS:
PRESS REMOTE SENSING START BUTTON

NOTE: Remote display is actual temperature at remote control only

NOTE: Unit display shows the set temperature

FAULT CODES:

If the display reads "HS", "AS", "ES", "CS" or "OS", a sensor has failed. Contact your Authorized Frigidaire Service Center.

ADDITIONAL THINGS YOU SHOULD KNOW

Now that you have mastered the operating procedure, here are more features in your control that you should become familiar with.

- The "Cool" circuit has an automatic 3 minute time delayed start if the unit is turned off and on quickly. This prevents overheating of the compressor and possible circuit breaker tripping. The fan will continue to run during this time.
- There is a 2-Second delay for the compressor shutting down when selecting FAN ONLY/HEAT. This is to cover the possibility of having to roll through to select another mode.
- The control will maintain the set temperature within 2 degrees Fahrenheit, between 60F and 90F degrees in cool mode, 55F and 80F degrees in heat mode (the upper limit of temperature could reach 86F degrees on some of the 115V models).
- After a power outage, the unit will memorize the last setting and return the unit to the same setting once power is restored.

Fresh Air Vent Control (on some models)
The Fresh Air Vent allows the air conditioner to:
1. Recirculate inside air - Vent Closed (see Fig. 1)
2. Draw fresh air into the room - Fresh Air (see Fig. 2)
3. Exchange air from the room - Vent Open (see Fig. 3)
