

SAVE MORE WHILE USING LESS

*Our commitment to bringing ecologic yet economic products to our customers is reflected in the features of our efficient tall tub dishwashers. They use less water and energy to clean dishes, helping you **save over \$180*** during the appliance's lifetime while making a smaller impact on the environment.*

*Compared to pre-2006 conventional dishwashers, average use, normal cycle, 10 years.

ENERGY STAR® QUALIFIED

Save money while conserving energy. Select models of our tall tub dishwashers help use **39% less energy** and **65% less water**.*

TRIPLE FILTER WASH SYSTEM

Skip the pre-rinse! This wash system uses three filters to remove the tiniest food particles from the wash water, helping conserve water and energy while getting dishes clean.

TALL TUB INTERIOR

Clean more dishes in a single load. The large capacity of this tall tub dishwasher means fewer loads and the ability to fit tall, oddly shaped items.
