WARNING AND SAFETY INSTRUCTIONS

Operating a scooter can lead to situations where the rider is at risk of falling or losing control. Without taking proper precautions, riders may hurt themselves or sustain injuries that lead to permanent disabilities or even death. Parents should review the below information and explain the importance of safely operating the scooter with their children. Further, it is the parent's responsibility to continually educate and supervise their children as well as inspect the scooter and related safety equipment regularly to ensure the safety of their children.

- Adult supervision is required for young children.
- A safety approved helmet must be worn at all times while using the scooter.
- Additional protective equipment is recommended such as knee pads, elbow pads and gloves.
- Avoid operating the scooter in poor weather conditions or at dusk/night where visibility is low.
- Wear reflective and/or bright clothing to increase visibility of rider to those operating a motor vehicles.
- Proper foot wear (sneakers) should be worn while using the scooter. No, sandals, flip-flops or bare feet.
- The weight limit of the scooter is 110 lbs/50kg.
- Do not use other vehicles or persons to tow or push the scooter.
- Only one person should operate the scooter at a time.
- Both hands should be placed on the handle bar grips at all times while riding the scooter.
- The scooter should be evaluated by a parent/guardian regularly to ensure the handle bar is properly locked into an appropriate height position and the scooter is safe to operate.
- The scooter should be used in a safe environment, away from heavy or fast moving motor vehicles.
- The scooter should be ridden on smooth, flat surfaces being mindful of potential declines that may increase speed.
- The foot brake will become hot during operation, do not touch the brake or wheels.
- Keep hands, other body parts and clothing clear when folding/unfolding the handle bars.
- Follow all local traffic laws.
OPERATING THE HANDLE BARS

Unfolding for Use

1. Unlock the quick release lever.
2. Press and hold the locking lever toward the front wheel.
3. Lift the handle bars until it clicks into the vertical position.
4. Lock the quick release lever to secure.

Installing the Handle Bars

1. Lift the handle grip guard.
2. Release the handle grips from the clips.
3. Align the push button with the hole in the center support.
4. Press the push button and insert the handle into the center support until it clicks into place.
5. Repeat with the second handle and close the guard.
Adjusting the Height

1. Unlock the quick release on the vertical post.
2. Press the push button on the vertical post.
3. While holding the button, slide the handle bars up or down to desired position.
4. Lock the quick release on the vertical post to secure.

Fold for Storage

1. Unlock the quick release lever.
2. Press and hold the locking lever toward the front wheel.
3. Lower the handle bars until it clicks into the horizontal/folded position.
4. Lock the quick release lever to secure.
When the scooter is not in use, ensure it is stored in a dry location, out of direct sunlight and free from extreme temperatures. Do not place other objects on top of the scooter/store under other equipment that may damage it.
