

# Important Sealant Information

## READ PRIOR TO INSTALLATION

### SEALANT

*NOTICE:* Silicone and acrylic latex sealant are not recommended due to potential adhesion and shrinkage, which could lead to leaks. For best results, use an advanced kitchen and bath polymer sealant such as:

- DAP® 3.0™ Kitchen, Bath & Plumbing High Performance Sealant
- Red Devil® RD3000™ Advanced Kitchen & Bath Sealant
- ECO-BOND® Kitchen-Bath-Plumbing Adhesive and Sealant

### APPLICATION TIPS

Use painter's tape to mask off the seam to help make cleaning up easier. Maintain a constant speed when applying the bead. Use a caulk tool or a plastic spoon to work the sealant into the joint. Wetting the tool with denatured alcohol will help create a smooth finish. Follow the directions on the back of the tube for cure time.

*NOTICE:* Certain chemicals and cleaners may deteriorate acrylic surfaces, causing cracks and, potentially, property damage. After application/installation, clean up the product surface and remove any excess sealant with denatured alcohol only. Do not use solvents (turpentine, lacquer thinner, mineral spirits, paint thinner, MEK, xylene, acetone, naphtha, etc.).

## RETAIN FOR YOUR RECORDS

### CARE AND MAINTENANCE

We recommend that you clean your bathing product with non-abrasive soaps and cleaners such as:

- Zud<sup>®</sup> Multipurpose Cream Cleanser
- Clorox<sup>®</sup> Clean-Up<sup>®</sup> Cleaner + Bleach Original
- Windex<sup>®</sup> Vinegar Multi-Surface Cleaner
- Spic and Span<sup>®</sup> Multi-surface Cleaner Sun Fresh Scent
- White vinegar and water

Use a terry cloth towel, soft cloth, or sponge. Avoid using abrasive scrubbing pads, steel wool, or sponges. Always rinse thoroughly with water after cleaning.

**NOTICE:** When using drain cleaner or clog remover, follow all directions and precautions supplied by the drain cleaner or clog remover manufacturer, rinse thoroughly with water. Failure to thoroughly rinse may damage product surfaces.

**NOTICE:** *Certain chemicals and cleaners may deteriorate product surfaces, causing cracks and, potentially, property damage. Never use cleaning products that state on their label that they are not suitable for use on Acrylic, ABS, Polystyrene, or Plastic. We do not recommend using solvents (turpentine, lacquer thinner, mineral spirits, paint thinner, MEK, xylene, acetone, naphtha, etc.), Simple Green<sup>®</sup> All-Purpose Cleaner, Pine-Sol<sup>®</sup> Original, Scrubbing Bubbles<sup>®</sup> Cleaner, Goo Gone<sup>®</sup> Spray Gel, Tilex<sup>®</sup> Bathroom Cleaner, The Works<sup>®</sup> Tub & Shower Cleaner, or Lysol<sup>®</sup> with Hydrogen Peroxide Multi-Purpose Cleaner.*
