

How To Clean Your Perky-Pet Hummingbird Feeder

Hummingbird feeders need to be cleaned every 1-2 weeks. Use hot water and a bottle brush, along with mild soap; be sure to rinse thoroughly.

The Perky-Pet cleaning mop (item # 23T) is specifically designed for the purpose of cleaning hummingbird feeders, and is very convenient to use. This cleaning mop can also be used on seed feeders and oriole feeders for those small, tight spaces that are difficult to reach.
