

SERVICE • QUALITY • INNOVATION

Use & Care:

To prolong the life of your cushions, we suggest storing when not in use.

When cushions become dirty, we suggest handwashing with mild soap and water.

A solution of 2 ounces (1/4 cup) of dish soap per gallon of lukewarm water is perfect for cleaning our outdoor cushions and pillows.

- First, brush loose dirt off of the product.
- Next, lightly scrub the solution into the stain with a sponge or soft brush.
- Finally, rinse thoroughly with warm water to remove soap residue. Allow fabric to air dry, and stand cushions on end for a faster drying process.

Do not use bleach, harsh cleaners or machine wash cushions/pillows/slip covers, as this will damage the fabric.

Warranty:

2-Year Limited Warranty

We warrant the cushion/pillow/fabric to be free of manufacturing defects to the original purchaser for two years.

This warranty does not cover commercial use, acts of nature, fire, misuse or improper cleaning. We reserve the right to make substitutions with similar merchandise, if the fabric in question is no longer available.
