**Tomatoes**

**Peppers**

**Squash**

**Garlic**

**Melons**

**Lobelia**

**Delphinium**

**Gladiolas**

**Salvia**

**Berries**

- **Root Guard Gopher Wire Baskets are specially designed baskets to protect your plants from gophers. Gopher wire is a hexagonal wire mesh that measures 3/4" across the flats of the hexagon. The steel wire strand is 20-gauge and galvanized after weaving for ideal strength and corrosion resistance. These specifications were chosen to resist gophers from passing or chewing through it. Because gopher wire is hot-dipped galvanized after it is woven, it will easily last 6-10 years.**

- **Formed size 8" diameter x 9" deep**
