Quick START UP Guide

Starting Your Generator

1. Check Fuel Level. Turn Fuel Shut Off Valve to ON.

2. Pull Recoil Handle.

3. Pull Choke.

4. Plug in cords AFTER generator is running. Unplug devices before stopping engine.

5. Engine STARTS

6. Turn engine switch to ON. Do NOT start generator with cords plugged in. For CARB/CSA units, turn breaker switch OFF before starting unit.

7. Pull Recoil Handle.

8. Check Fuel Level.

9. Do not fill past this lip! Replace Gas cap.

NOTICE!

This quick start guide is not meant to replace the owner’s manual that was shipped with this unit. For complete safety, operating and maintenance instructions, read the owner’s manual completely BEFORE using this equipment.

DANGER

Using a generator indoors CAN KILL YOU IN MINUTES.

Generator exhaust contains carbon monoxide. This is a poison you cannot see or smell. NEVER use inside a home or garage, EVEN IF doors and windows are open. Only use OUTSIDE and far away from windows, doors, and vents.
