Corner Shelf with Bracket

Please inspect packages for damage or missing pieces, and read instructions carefully prior to installation. All FlexStone products come with a protective masking covering the image side of the material. If you have any questions or issues, please call our customer support Monday through Friday 8:00 AM – 5:00 PM MST at 877-941-3662.

Visit FlexStoneProducts.com for up-to-date manuals, or to register your product warranty.

RECOMMENDED: Visit <http://FlexStoneProducts.com/installation> to access a walk-through video and other useful installation information.

INSTALLATION OF CORNER SHELF

NOTE: Corner shelf includes a folding-triangle metal bracket with screw holes which is designed to mount directly to the FlexStone wall panels. Be sure to peel away protective masking from the installation area before securing the bracket.

- 1.1) Position corner shelf bracket in desired corner at desired height. Use a level to mark level lines in pencil. Adjust alignment to include a slight forward slope for water runoff.
- 1.2) Using drywall screws or other coarse-thread screws, fasten each side of the bracket through the FlexStone panels and the sheetrock.
- 1.3) Fold bracket and complete triangle by bending the tab over to secure bracket. Dry fit the corner shelf material over the bracket. If corner is out of square, trim one side of shelf to achieve a tight fit.
- 1.4) Peel back protective masking from edges of shelf, apply adhesive to top and bottom of bracket and place FlexStone material over bracket like a clamshell. Clamp until dry (24 hours).
- 1.5) Apply 100% silicone sealant to all joints where corner shelf meets the wall panels. Follow any directions on sealant tube.
