Feel the Difference

TELESTEPS 
No.1 in telescopic work tools

MANY ADVANTAGES

SIMPLE

We have always been convinced that the best ladder is both short and long. The telescopic ladder is easy to pull out to the desired length and securing it before use is just as quick. When the red locking catches have unfolded under each rung, this indicates that the ladder is ready for use and can handle loads of up to 150 kg.

FLEXIBLE

With the telescopic function and the minimal turning radius, the ladders are perfect even in small spaces. The ladders can be adjusted to the optimal height to fit your needs precisely. In this way, a telescopic ladder is many ladders in a single unique ladder. In our assortment there are also smart accessories that make your work even easier.

SAFE & ERGONOMIC

Safe, functional and easy to take with you – Telesteps does not compromise on anything. The ladder is small and compact for storage and transportation. We assemble the ladders by hand and test them individually before delivery. Our equipment is certified according to EN 131/SP/TÜV.

Our All-Day-Long ladder for all-day-long uses! When you need to stand on the ladder for longer periods of time, where ergonomic features are of importance for maximum comfort and safety - The Combi ladder is the friend for you! Whether it is height, stability or long days of work - the Combi ladder will not let you down, it will always keep you up!
