

## **Forno Venetia Accessories**

### **Warranty, Care & Maintenance**

Thank-you for purchasing your Forno Venetia Accessories! With proper care and maintenance these accessories will help you to master cooking on your oven and join you on many culinary adventures for years to come.

#### **Oven Tools**

Oven tools such as the model(s) SLRACC25, FVA3120, FVA5090 and FVA5120 are intended to be used with all wood fired ovens. These can be used outdoors but should *never be left outdoors!* The wooden handles are attached to the stainless steel poles using steam which once cooled maintains a secure grip on the stainless steel pole.

Exposure to moisture and external environments for any extended period of time will result in the wooden handles becoming loose and disconnecting from the stainless steel pole.

#### **Cleaning your oven tools**

After use, wash the paddle portion of the pizza peel(s) only with warm water and a gentle dish detergent. *Never submerge the wooden handles under water or subject them to water.* Dry thoroughly after washing and store indoors.

The fire poker, wire cleaning brush and shovel do not need to be cleaned but should be kept indoors in a dry place when not being used.

#### **Warranty**

1 Year Limited Warranty on Manufacturer Defects.
