#### \* 4 First-aid measures

- **Description of first aid measures**

- **General information:**

Always have plenty of water available for first aid. Get medical attention if any symptoms develop or persist.

- **After inhalation:**

If a respiratory problem develops from dust or vapors, remove victim to fresh air and provide oxygen if breathing is difficult. Get medical attention. If the victim has difficulty breathing or tightness of the chest, is dizzy, vomiting or unresponsive, give 100% oxygen with rescue breathing or CPR as required and transport to the nearest medical facility. This is considered a highly unlikely event.

- **After skin contact:**

Generally the product does not irritate the skin.

If rash or irritation develops get medical attention. This is considered an unlikely event.

- **After eye contact:**

Not expected as a result of exposure to finished product.

If in eyes: Rinse cautiously for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. This is considered an unlikely event.

- **After swallowing:** Do not induce vomiting; immediately call for medical help.
