

Tac Fast® Carpet Tile System

TacFast® Carpet Tile System simplifies installation and provides for flexibility with a user and environment-friendly product.

This system offers consumers the following capabilities:

Designed to Last for Multiple Changes

Use the hook tape for repeated changes of the carpets tiles.

Ease of Removal

Remove the carpet tile at any time easily and without cost or mess.

Easy Access to the Floor

Access the sub-floor as necessary for maintenance, renovation or to clean the carpet tiles.

Environment- Friendly

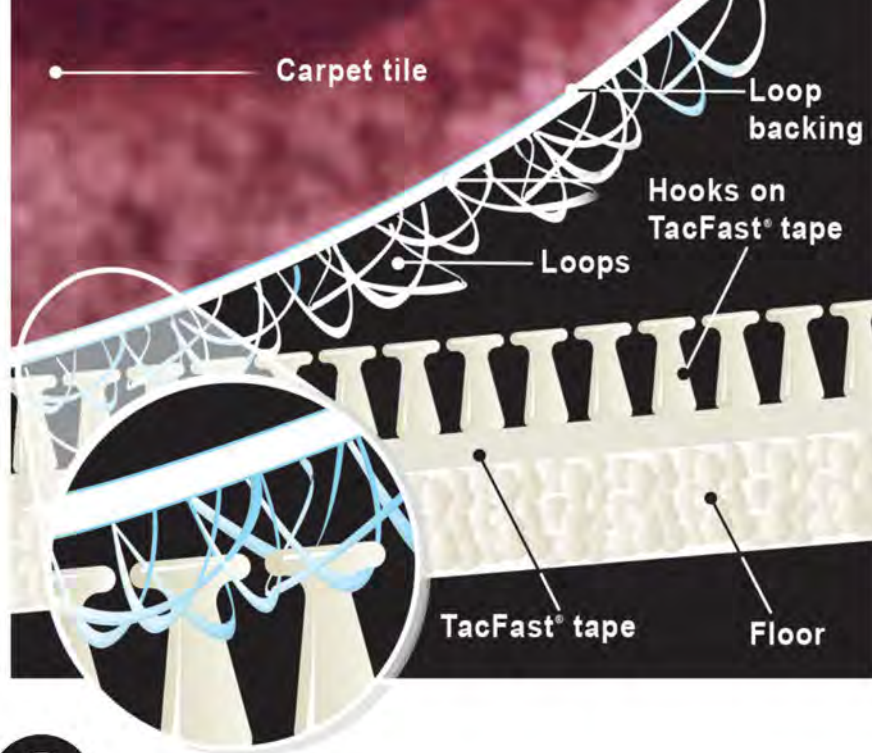

Eliminate using liquid adhesives in installation with the consequent reduction in VOC (Volatile Organic Compounds) emissions.

Functional Flexibility

Replace heavy traffic areas as required saving on the need to change the entire floor area.

Simplified Installation

Make multiple attempts during installation without compromising the carpet tile.

The concept is based on a hook and loop fastening system using carpet tile which has a loop material covering its entire underside. Hook tapes are fastened to the sub-floor by means of a pressure-sensitive adhesive. The hook and loops 'engage' and form a mechanical bond, which holds the carpet in place.
