Assembly Steps

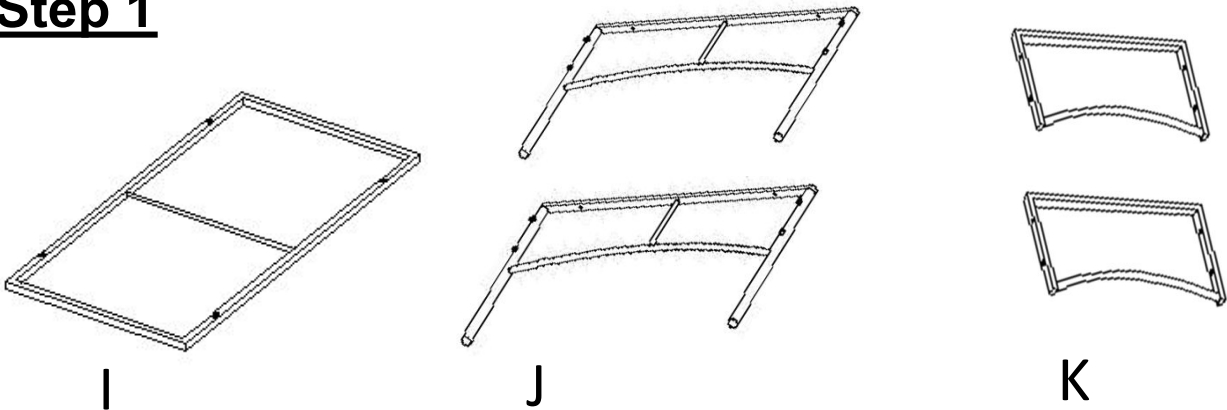

Overview

This Table has multiple parts and may require up to some 30 minutes to assemble. To give you an overview of the table parts, the above picture is to help you put the various parts into perspective. Please read through the instructions herebelow to familiarise yourself with the parts and steps before assembly.

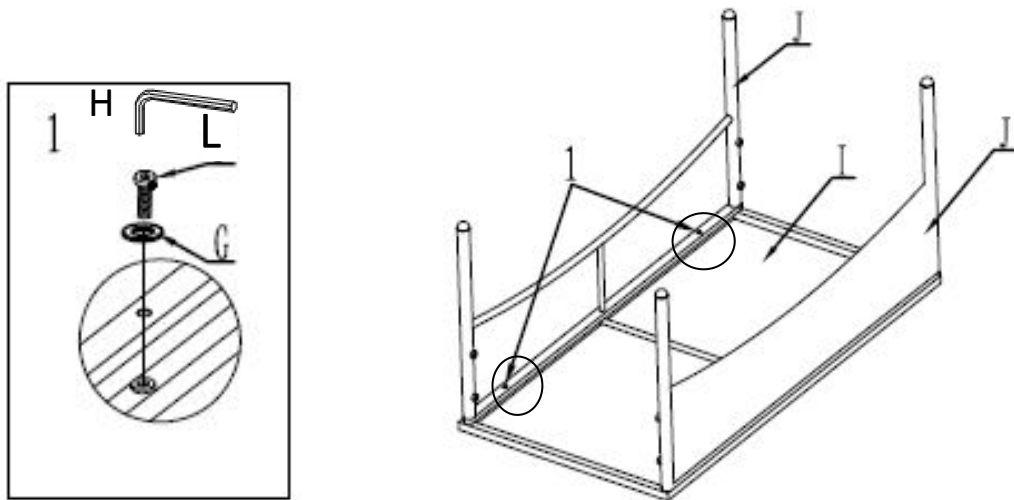

Assembly Steps

Step 1

Open the carton and place all the parts onto a clean, non-marring surface.

Step 2

Place Table top (I) face down onto a clean, non-marring surface.

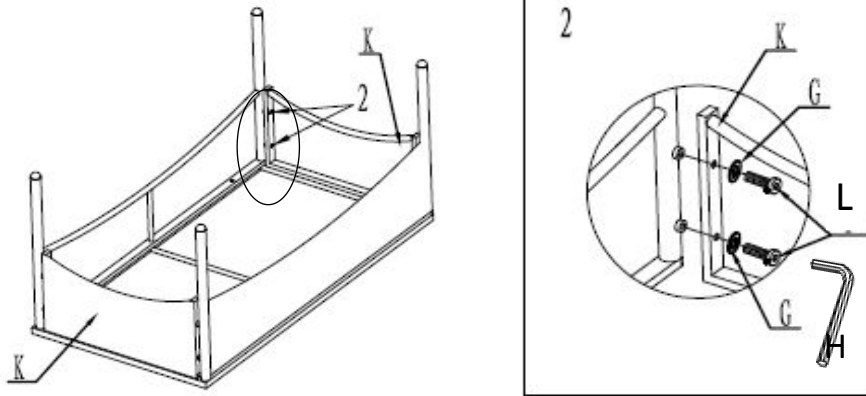

Attach the Long Side Panel with Leg(J) to Table Top(I) using Bolts(L) and Washers(G) with Allen Key(H)

Repeat the same process to assemble the other Long Side Panel with Legs(J).

Only loosely tighten Bolts.

Occasionally some of the PE Wicker shifts and covers the mounting positions preventing easy assembly. The PE wicker should never be cut, but moved away from the mounting positions.

Step 3

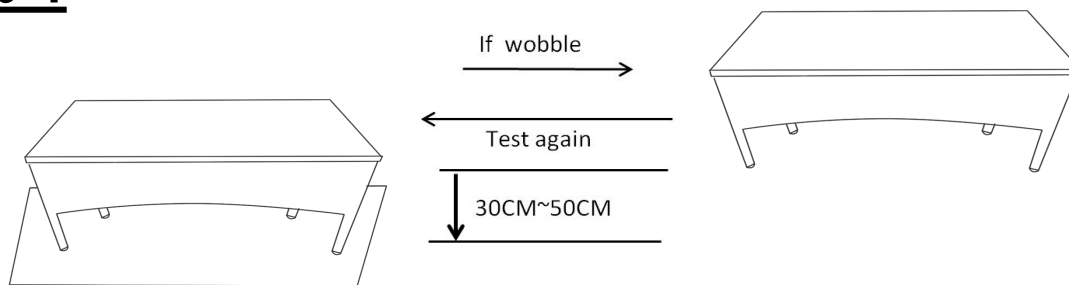

Attach the Short Side Panel(K) between to the Long Side Panel with Legs(J), using Bolts(L) and Washers(G) with Allen Key(H).

Repeat the same process to assemble the other Short Side Panel(K).

Only loosely tighten Bolts.

Step 4

Place the Table on a **LEVEL SURFACE** to see if it wobbles.

If it wobbles, lift the Table to some 30cm to 50cm height from the ground.

Keep your feet and toes well away from the drop zone.

Drop the Table freely and vertically with the four legs, hitting the ground, at the same time.

This Drop Test will help to ensure that all the Bolts and gaps will all reach full alignment status.

Test again for evenness on a **LEVEL SURFACE**.

If no wobbles are found, lay down the Table down and proceed to tighten all the Bolts.

When tightening these Bolts, tighten sequentially.

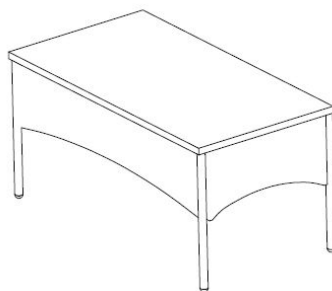

DO NOT tighten any Bolt fully and then move on to the next one.

This may cause the frame to warp.

If there are still wobbles, loosen the Bolts and execute this same drop test.

If the Table is not stable it could lead to damage to the product.

Step 5

Your table is ready for use.
