

# Sherlock® Extension Poles Maintenance Kit

Kit Includes:

- 1 Threaded Tip
- 1 Lever
- 1 Pin
- 2 Screws
- 3 Springs

Tools Needed:

- Phillips Screwdriver or Drill
- Flat Screwdriver
- Hammer
- Small Punch

Directions:

**STEP 1** Use a phillips screwdriver (or a drill with a phillips-head bit) to remove the 2 screws attaching the threaded tip to the inner pole.

**STEP 2** Lightly tap the threaded tip with a flat screwdriver and pull the original threaded tip to remove it from the inner pole.

**STEP 3** Place the replacement threaded tip in the inner pole. Lightly tap with a hammer, if needed, to align the screw holes.

**STEP 4** Use the new phillips screws to secure the replacement tip to the pole.

**STEP 5** Use a hammer and a small punch to gently push the pin from the lever mechanism.

**STEP 6** Place the new lever into position.

**STEP 7** Insert the replacement pin and lightly tap it into place with a hammer.

**STEP 8** Use a flat screwdriver to push a new spring into place.
