10ct Edison and Globe String Lights

Thank you for purchasing our Novolink Outdoor String Lights!

To insure proper installation and prior to use, please read these instructions and all warnings thoroughly.

Need Extensions or additional String Lights?
www.shopNovolink.com

Installation:

1. Before use and mounting, place the light set on a clean, flat surface and check for any damage to the LED lights, connections, supply cord or plug.
2. Never use sharp or pointed objects to install / mount a string light set or chain.
3. Fixing with metal or braided wire, or similar devices is not advisable. Metal or braided wire can damage the insulation layers of the light set.
4. Suitable installation devices include cable conduits or soft cable ties. When using cable ties, ensure they are not excessively tightened to the string to avoid damage to the insulation layers of the light set.
5. The supply cord and rope body must not be subject to push, pull or torsion forces.
6. If you have attached extensions, ensure a proper and secure connection between them and the main supply cord.
7. When connecting additional lights to a set, make sure the set is not plugged-in and powered.
8. Ensure that the light strings and supply cord are not located in or near running water or drains (e.g. snow, streams, rain gutters).
9. If the light set does not work, have it checked by a certified technician.

Instructions for Use

Once the light set is properly mounted, plug it into the appropriate electrical outlet to power ON.

Adding Extensions:

Up to 53 extensions can be attached in a light string. Extensions for the string lights can be purchased at www.shopNovolink.com.

When attaching extensions, follow the previous instructions for installing and using the lights.

Replacing the LED stems:

The LED "stems" are replaceable. Please visit www.novolinkinc.com, or contact Novolink Customer Service for instructions on how to do so.

WARNING:

This string light set is not a toy - please keep it out of reach of children. The light set should not be plugged in while still in the packaging. The bulbs and LED stems are fragile. For indoor and outdoor use. Do not attempt to hard-wire the light set to another light set. The electric cord cannot be replaced.

Caution: If the light(s) are damaged or do not work properly, the whole unit should be replaced if under warranty, or disposed of in accordance with local, state and federal regulations.

WARNING - RISK OF ELECTRIC SHOCK. IF BULBS ARE BROKEN OR MISSING, DO NOT USE.

1. When adding an extension to the string lights, the lights must be firmly and securely connected.
2. The total connected sets may not exceed the maximum allowed number of 53 extensions to an original set. If this limit is exceeded, it may result in a risk of electric shock or malfunction.
3. Ensure that the supply cord and inner wiring are not subject to mechanical load/stress.

4. Never hang or mount any object to the lighting chain.
5. Always disconnect the light set from the electrical outlet when the light set is not in use, or when the area where it is in use is unattended for long periods of time.
6. For outdoor use, ensure the electrical outlet or any extension cord is in compliance with the protection class IP44 (splash water proof). If there is any doubt, consult a professional electrician.
7. Each section of a connected light set must be mounted individually.
8. Dispose of an entire light set if any portion of it is mechanically or electrically damaged.

Product Warranty & Support Information:

Model #s: HX-01872 (D40 Edison), HX-01894 (G50 Globe)

This product comes with a limited manufacturers warranty of 1 year from the date of purchase. (Proof of the date of purchase must be provided if the product is returned.) If the product is found to be defective in material or workmanship, Novolink, Inc. will replace the defective part(s).

If any of the product parts are found to be missing, please contact Novolink, Inc. within ten (10) days of purchase.
