ASSEMBLY MANUAL

MARCO SERIES PRINCETON 10' x 10' (305 x 305 cm)

ACTUAL FLOOR SIZE IS 120 x 116-5/8" (305 x 296 cm)

KEEP THIS MANUAL FOR FUTURE REFERENCE

⚠ IMPORTANT! ⚠READ INSTRUCTIONS THOROUGHLY PRIOR TO BEGINNING ASSEMBLY.

BEFORE YOU BEGIN

• BUILDING RESTRICTIONS AND APPROVALS

Be sure to check with local building department and homeowners association for specific restrictions and/ or requirements before building

ENGINEERED DRAWINGS

Contact our Customer Service Team if engineered drawings are needed to pull local permits.

SURFACE PREPARATION

To ensure proper assembly you must build your shed on a level surface. Recommended methods and materials to level your shed are listed on page 7.

· CHECK ALL PARTS

Inventory all parts listed on pages 4 - 5. Contact our Customer Service Team if any parts are missing or damaged.

· ADDITIONAL MATERIALS

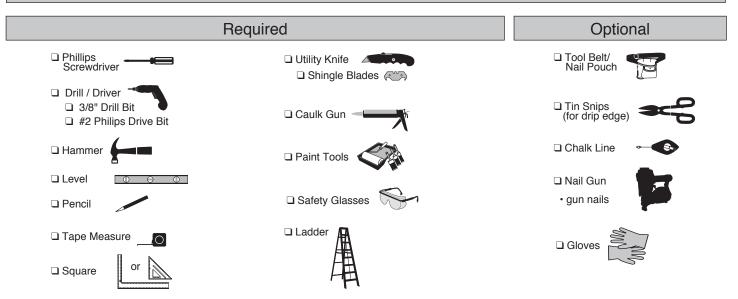

You will need additional materials to complete your shed. See page 3 for required and optional materials and quantities.

- CUSTOMER SERVICE -

Call: 1-800-221-1849 email: customerservice@backyardproductsllc.com

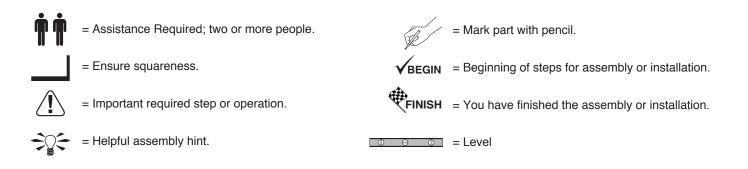

TOOLS

Safety! Always use approved safety glasses during assembly.

HELPFUL REMINDER SYMBOLS

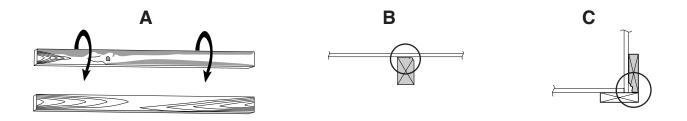

Look for these symbols for helpful reminders throughout this manual.

ORIENT LUMBER AND TRIM FOR BEST APPEARANCE

Framing lumber is graded for structural strength and not appearance. Exterior trim is graded for one good side.

Always install the material leaving the best edge and best surface visible. Please remember that these blemishes in no way negatively affect the strength or integrity of our product. (See Fig. $\bf A$, $\bf B$, $\bf C$.)

ADDITIONAL MATERIALS

FOUNDATION OR FLOOR MATERIALS

- This shed kit includes a complete wood floor frame system. It does not include any floor panels.
- See page 6 for the additional floor panel sizes and quantities required.
- · This shed kit does not include ANY leveling materials.
- See the FLOOR LEVELING section on page 7 for recommended methods and suggested materials to properly level your floor, as this will vary depending on your specific site.

REINFORCED WOOD FLOOR FRAME (OPTIONAL)

IMPORTANT! The included floor has been designed for general use. Depending on your specific use you may want to construct a heavy duty floor frame by adding additional floor joists (shown below as shaded). Below is a list of additional materials (not included):

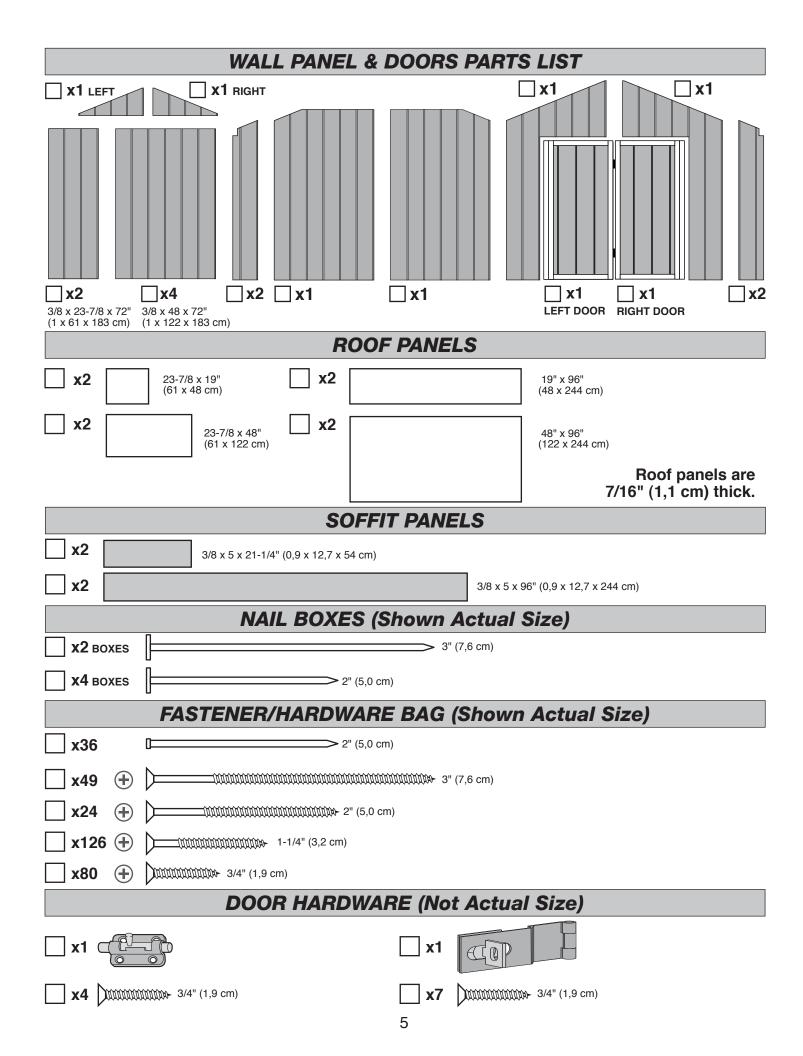

x1 2 x 4 x 10' (5 x 10 x 305 cm) Treated Lumber Cut to (5) 2 x 4 x 21" (5 x 10 x 53,3 cm) x5 2 x 4 x 8' (5 x 10 x 244 cm) Treated Lumber Cut to (5) 2 x 4 x 89-1/2" (5 x 10 x 227 cm) x40 ea. 3" (7,6 cm) Hot Dipped Galvanized Nails						
	<u> </u>	→		nal 12 ard 24"	 ,	

COMPLETING YOUR SHED								
You will need these a	dditional materials:							
3-TAB SHINGLES 5 Bundles	1" GALVANIZED ROOFING NAILS 2 Lbs For shingles.							
PAINT FOR SIDING	PAINT FOR TRIM 1 Quart Use 100% acrylic latex exterior paint.							
CAULK	WOOD GLUE Exterior Rated							
X2 BOXES	3" (7,6 cm)							
x4 BOXES 2" (5,0 cm)								
OPTIONAL MATERIALS								
DRIP EDGE 50 Feet	#15 ROOFING FELT To cover 112 Sq. Ft. of roof area.							
	1" GALVANIZED ROOFING NAILS1/4 Lb For roofing felt.							

REFER TO THE BACK OF THIS MANUAL AND THE MANUFACTURER'S INSTRUCTIONS FOR INSTALLATION OF SHINGLES, DRIP EDGE AND FELT.

FLOOR PANELS (Not Included)

You will need floor panels and nails to complete your floor. -Floor panel sizes and quantities are shown below.

NOTE: Use a minimum of 5/8" (1,6 cm) oriented strand board (OSB).

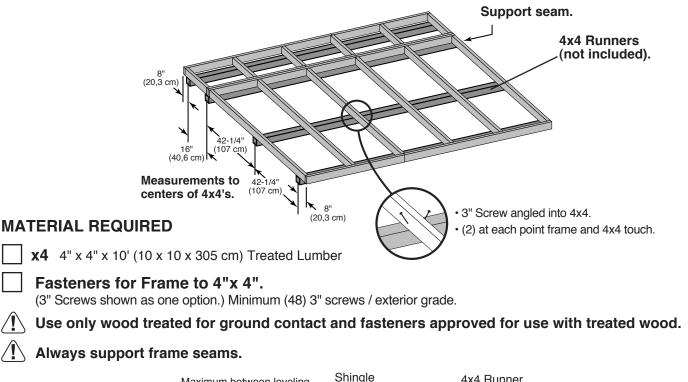

x1	23-7/8 x 23-7/8" (61 x 61 cm)
x1	23-7/8 x 92-5/8" (61 x 235,3 cm)
x1	23-7/8 x 96" (61 x 244 cm)
x2	48 x 92-5/8" (122 x 235,3 cm)
<u></u> x1 ·	1 lb. of 2" (5,0 cm) Hot Dipped Galvanized Box-Type Nails 2" (5,0 cm)
	NOTES

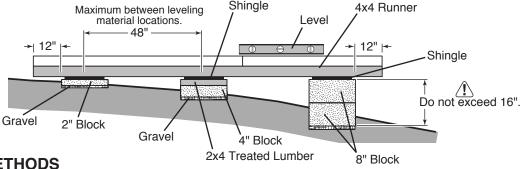

FLOOR LEVELING OPTIONS

There are multiple ways to level your floor frame. Our recommended leveling method is shown below.

Leveling materials are not included in this kit.

PREFERRED METHOD - 4x4 TREATED RUNNERS

LEVELING METHODS

- Level under 4x4 runners only.
- Locate leveling material 12" from ends of runners and no more than 48" apart.
- Asphalt shingles should be used between 4x4 runners and blocks or treated lumber. Never use shingles in direct contact with ground.
- For best results and aiding in water drainage use gravel under each concrete block.

LEVELING MATERIALS

Gravel
Solid Masonry Blocks in 1", 2", 4" or 8" thickness
2x4 Treated Lumber
Asphalt Shingles

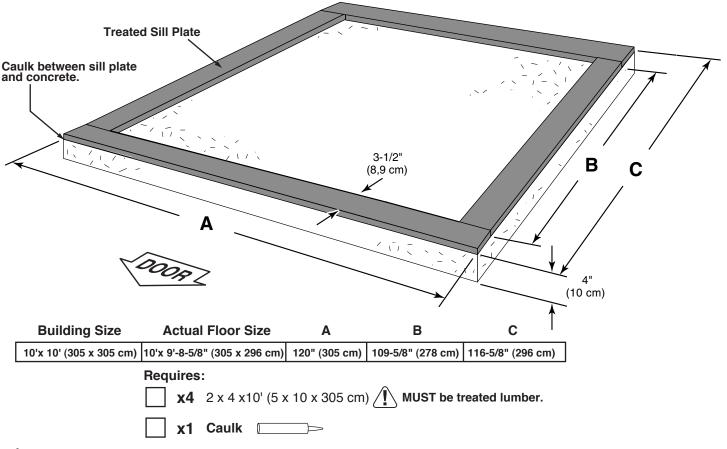

/!\ Leveling higher than 16" not recommended.

CONCRETE

• If you are building your shed on a concrete foundation see the following page.

CONCRETE FOUNDATION

Your kit contains all materials to construct a wooden floor. If you choose to install your kit on a concrete slab refer to the diagram below.

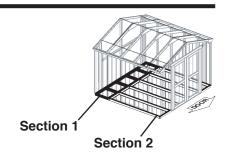

1 Allow new concrete slabs to cure for at least seven (7) days.

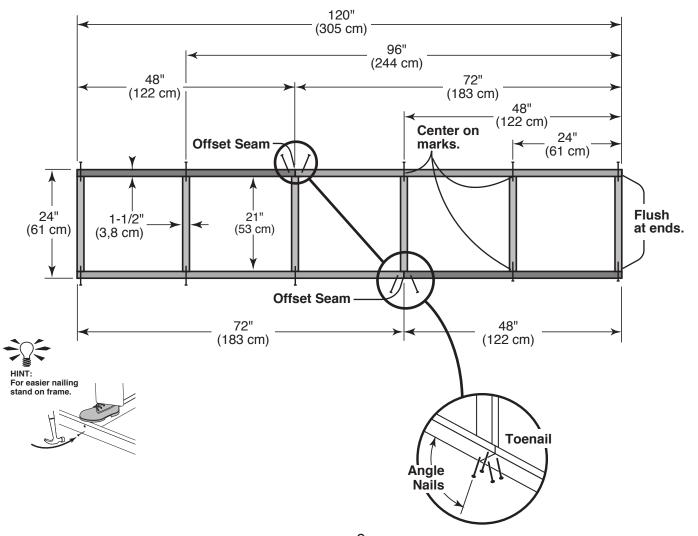

- A treated 2 x 4" (5 x 10 cm) sill plate is required when installing your shed on concrete. **Hint: Use treated lumber in your kit or purchase full length treated lumber.**
- Use a high quality exterior grade caulk beneath all sill plates.
- Fasten 2 x 4" (5 x 10 cm) sill plates to slab using approved concrete anchors (fasteners not included).
- Check local code for concrete foundation requirements.

NOTES	

VBEGIN **⚠** You will build two floor sections.

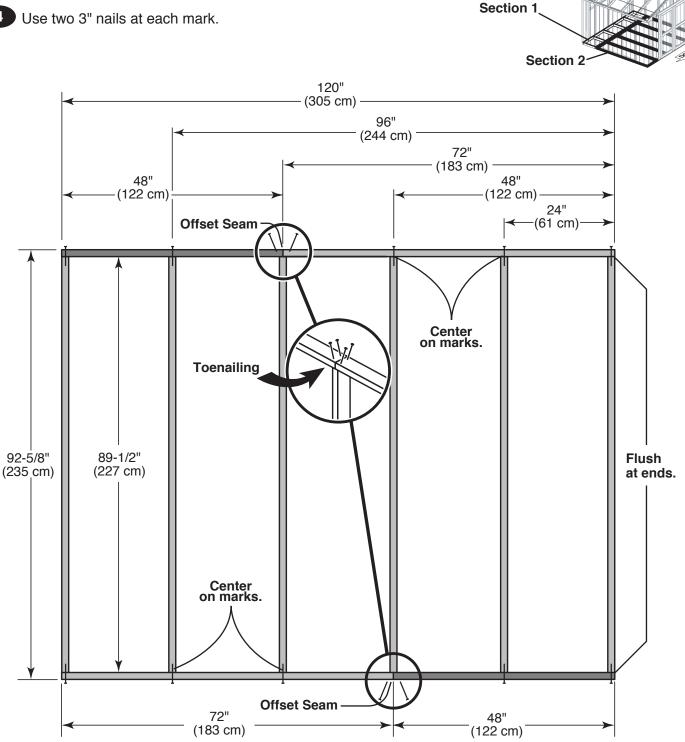

- Orient parts as shown on flat surface. Measure and mark each dimension from end of boards.
- 2 Use two 3" nails at each mark.

FLOOR FRAME PARTS REQUIRED: 3" (7,6 cm) x28 x2 TREATED 2 x 4 x 72" (5 x 10 x 183 cm) Treated Wood TREATED **x6** 2 x 4 x 89-1/2" (5 x 10 x 227 cm) Treated Wood x2 TREATED NOTE: **TREATED** Look for Stamp. 2 x 4 x 48" (5 x 10 x 122 cm) Treated Wood

- Orient parts as shown on flat surface. Measure and mark from end of boards.
- Use two 3" nails at each mark.

FLOOR FRAME

3" (7,6 cm) x40

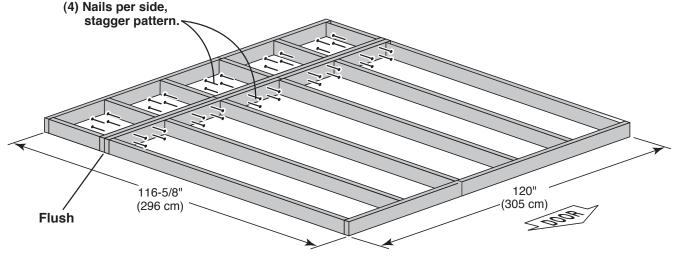

5 Put both floor sections together and attach as shown using 3" nails.

You have finished your floor frame. Proceed to level and square frame.

STOP!

LEVEL AND SQUARE FLOOR FRAME

Before attaching floor decking, it is important to level and square the floor frame.

A level and square floor frame is required to correctly construct your shed.

BEGIN

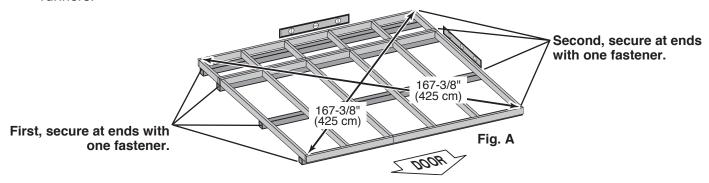

See page 7 for the preferred floor leveling method.

2 Use level and check the frame is level before applying floor panels.

3 Check for frame squareness by measuring diagonally across corners. If the measurements are the same, the frame is square. The diagonal measurement will be approximately 167-3/8" (425 cm).

When the frame is level and square secure one side of frame to the 4x4 runners using one fastener at ends of each runner. At the opposite end of the frame, secure the frame to 4x4 runners with one fastener at ends of each runner making sure the frame remains square (Fig. A).

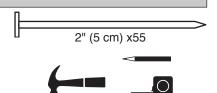

Once the floor frame is level and square fasten the frame at each point the frame contacts the 4x4 runners.

FLOOR PANELS

PARTS REQUIRED:

FLOOR PANELS NOT INCLUDED.
SEE PAGE 6 FOR PANEL SIZES
AND QUANTITIES.

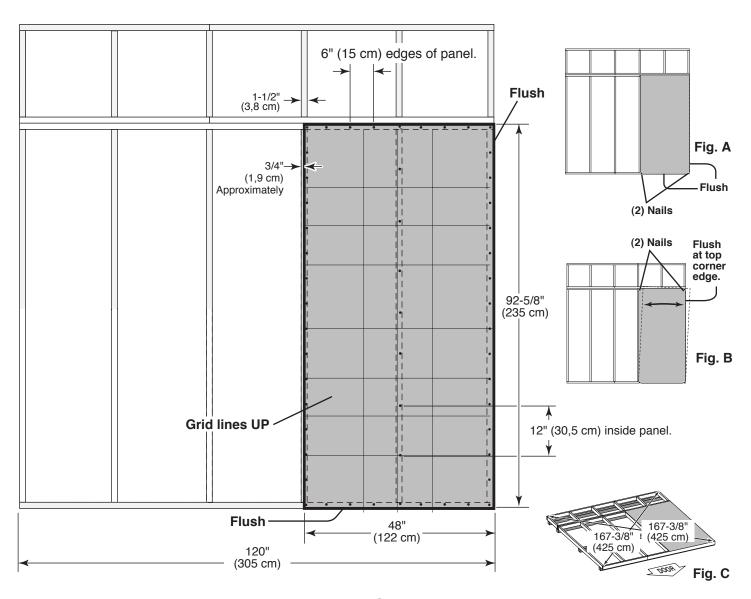

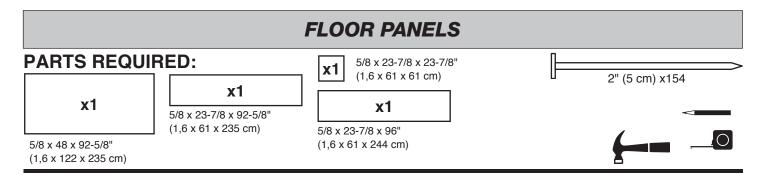

x1

5/8 x 48 x 92-5/8" (1,6 x 122 x 235 cm)

- Attach the 48 x 92-5/8" panel with the rough side up (painted-grid lines side) with the 48" edge and corner flush to the floor frame (**Fig A**). Secure panel with two 2" nails in the corners.
- Move to the opposite end. Using the long edge of the panel as a lever move the panel side-to-side until the top corner is flush to the floor frame (Fig. B). Secure panel with two 2" nails in the corners.
- Check the floor frame is square by measuring diagonally across the frame corners. If the measurements are the same your floor frame is square. The measurement will be approximately 167-3/8" (425 cm) (Fig. C).
- 4 Continue attaching the panel using 2" nails 6" apart on edges and 12" apart inside panel. Use a chalk line or use pre-painted grid lines to nail into joists under panel.

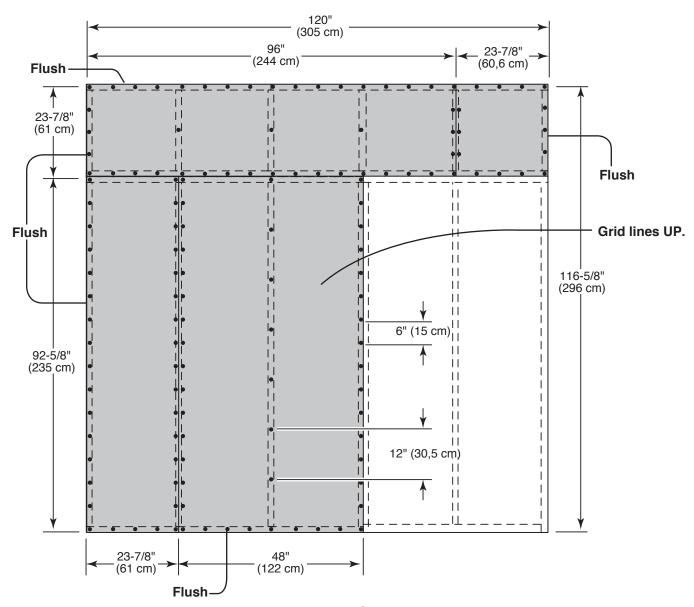

- 5 Continue installing panels with rough side up (painted grid lines).
- 6 Use a chalk line or grid lines on panels for 2" nails 6" apart on edges and 12" apart inside panel.

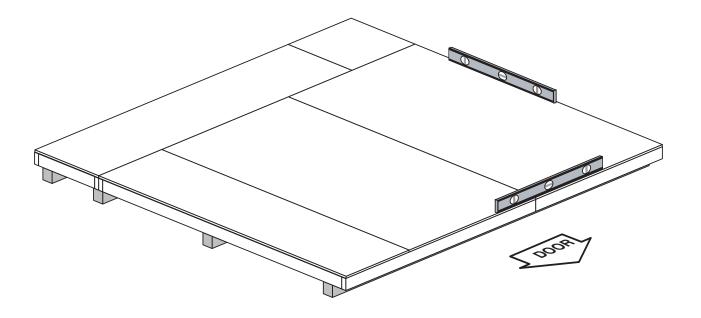

7 You have finished Installing your floor panels.

! IMPORTANT!

Check the floor frame is level after installing floor panels. Re-level if needed.

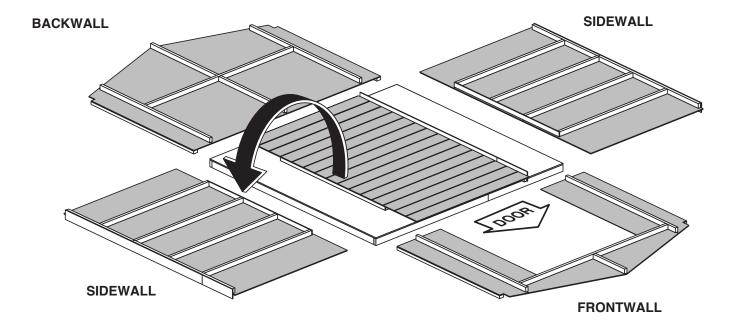

• The floor should used as a stable work surface for wall construction.

HINT:

 Organize your assembly procedure during the build process to avoid over-handling of the walls.

RAFTER ASSEMBLY JIG

PARTS REQUIRED:

x4 GBB 1 x 3 x 7-1/2" (2,5 x 7,6 x 19 cm)

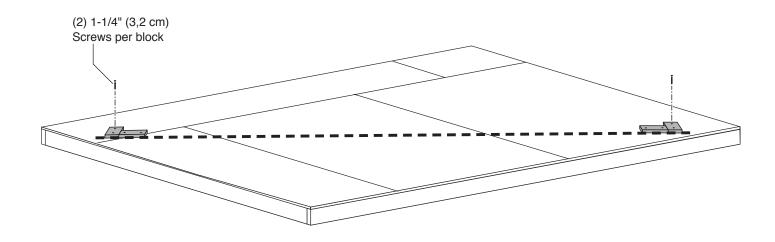

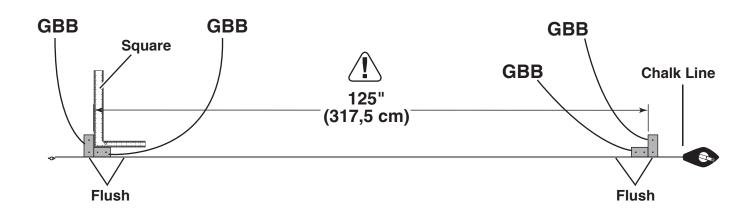

- Build a **Jig** to ensure all **Rafters** are assembled the same.
- 2 Mark a straight line on the Floor from corner to corner.
- 3 Screw blocks in place to measurement shown.

- Make sure blocks are square and at 125" (317,5 cm)
- 4 You have finished building a Rafter Jig.

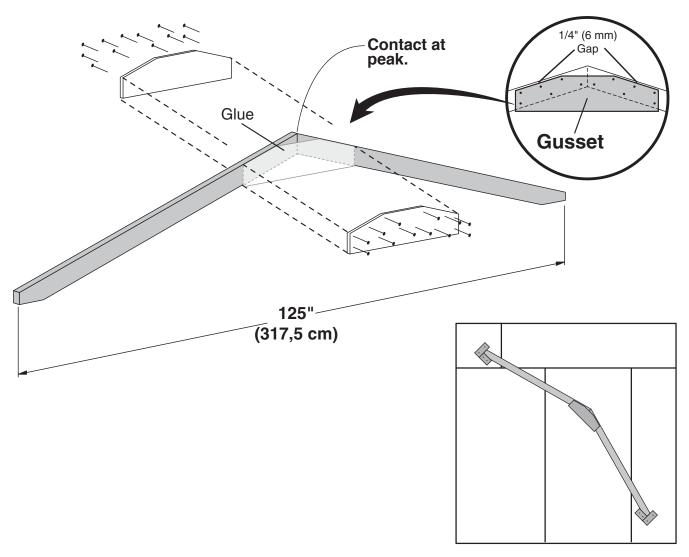

BEGIN

- Place two rafter halves CV on floor jig. You will assemble (4) rafters.
- 2 Rafters should touch at peak. Apply glue on gusset and place on rafters.
- Nail gusset onto rafter using 2" nails, staggered, as shown.
- 4 Flip over rafter assembly and glue and nail gusset to back side.
- 5 Repeat steps 1-4 to build three more assemblies.

FINISH

6 Unscrew jig and save blocks. Set aside rafters and proceed to building your back wall.

Use Jig to assemble Rafters.

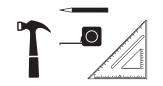

BACK WALL FRAME

PARTS REQUIRED:

NH2 x 3 x 46-1/4" (5 x 7,6 x 117,5 cm)

Y2 PB 2 x 3 x 77" (5 x 7,6 x 196 cm)

X1 PR 2 x 3 x 94-1/2" (5 x 7,6 x 240 cm)

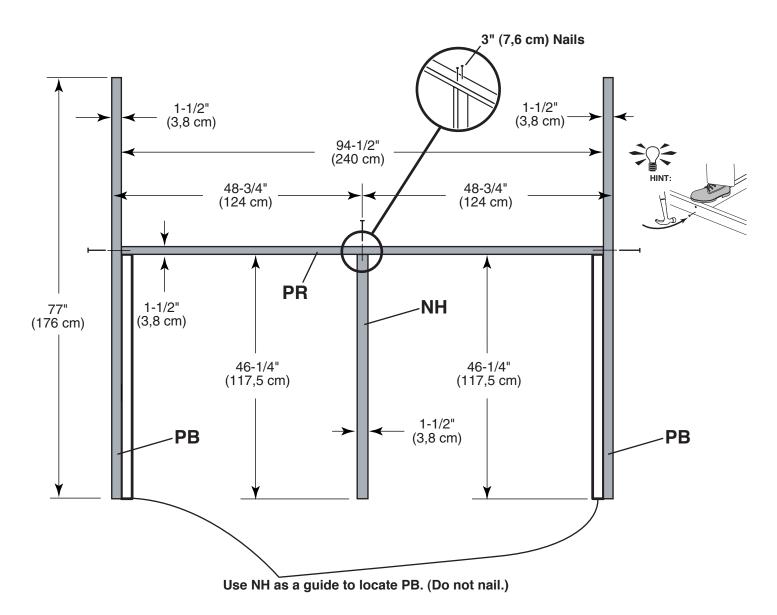

3" (7,6 cm) x6

VBEGIN

- Orient parts on edge on floor as shown.
- 2 Nail using two 3" nails at each connection.

BACK WALL FRAME

PARTS REQUIRED:

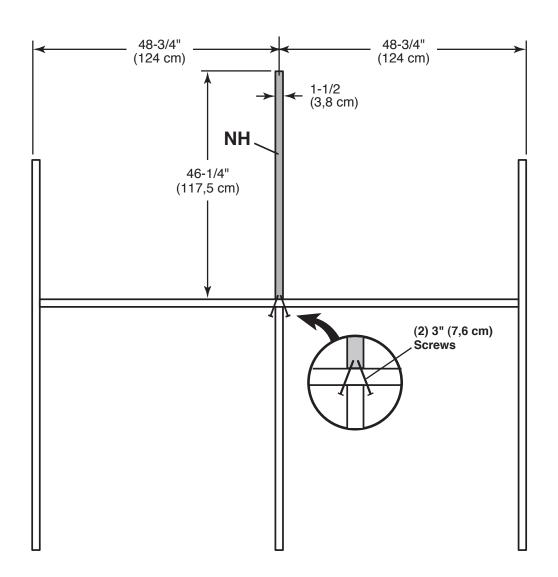

NH2 x 3 x 46-1/4" (5 x 7,6 x 117,5 cm)

- 3 Orient parts on edge on floor as shown.
- 4 Use two 3" screws at middle connection.

You have finished building your back wall frame.

BACK WALL PANELS

PARTS REQUIRED:

x1

3/8 x 48 x 84" (1 x 122 x 213,4 cm)

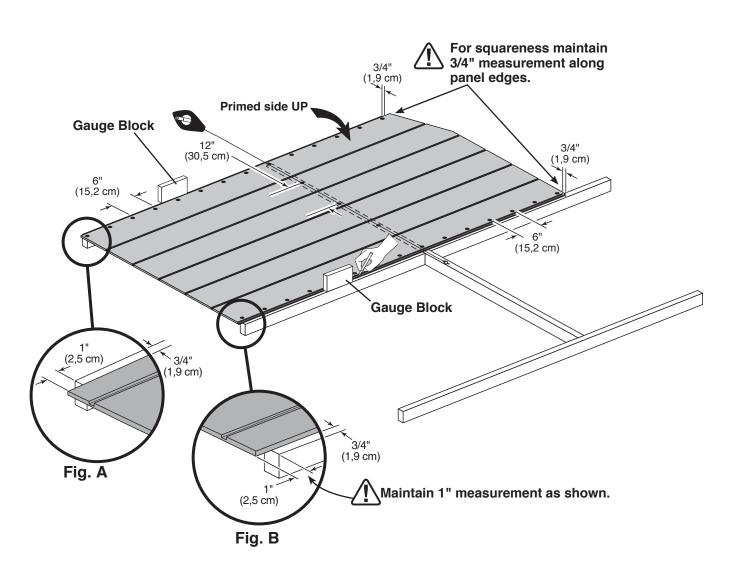

BEGIN

- Place **LEFT** panel on back frame as shown with primed side facing up.
- Use a 3/4" gauge block at edges of panel. A Be sure to maintain 1" measurement between bottom edge of frame and bottom edge of panel (Fig. A, B).
- 3 Nail using 2" nails 6" apart on edges and 12" apart inside panel.

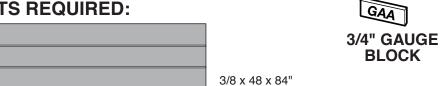

Do not nail in groove.

BACK WALL PANELS

PARTS REQUIRED:

x1

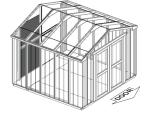

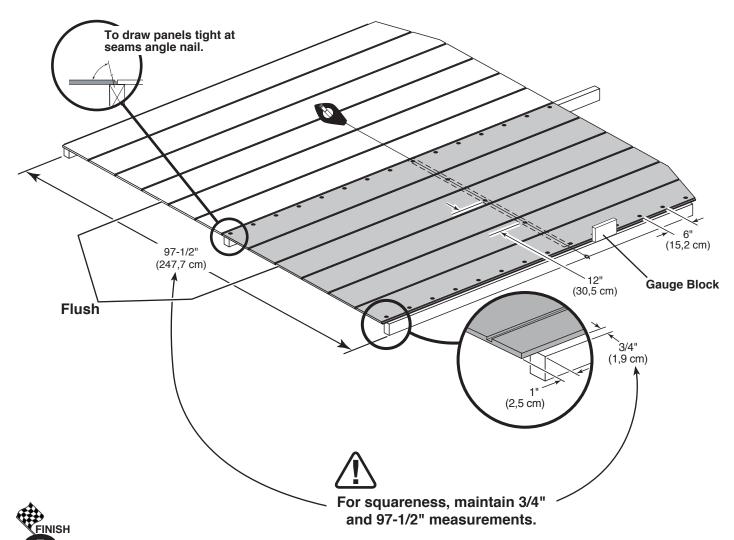

(1 x 122 x 213,4 cm)

- Place **RIGHT** panel on back frame as shown with primed side facing up.
- Use a 3/4" gauge block at edges of panel.
- Nail using 2" nails 6" apart on edges and 12" apart inside panel.

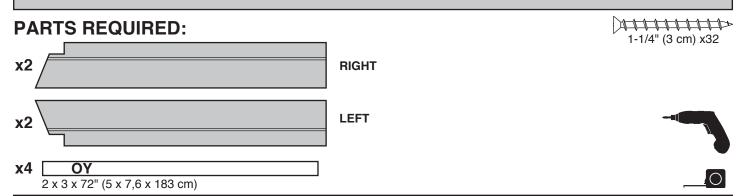

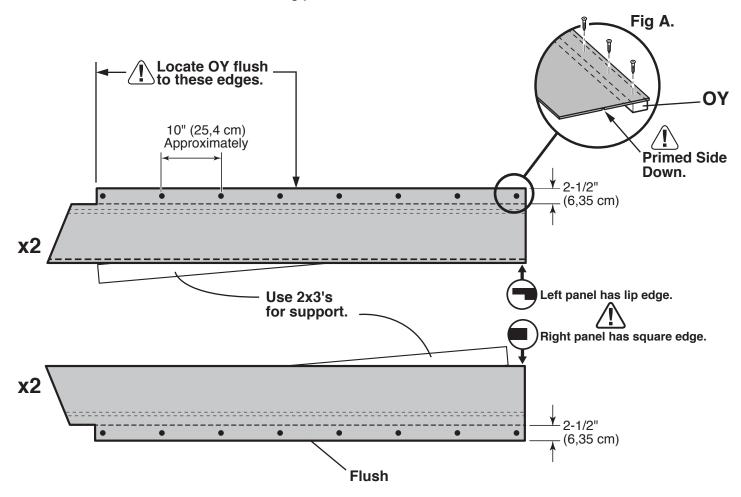

You have finished attaching your back wall panels

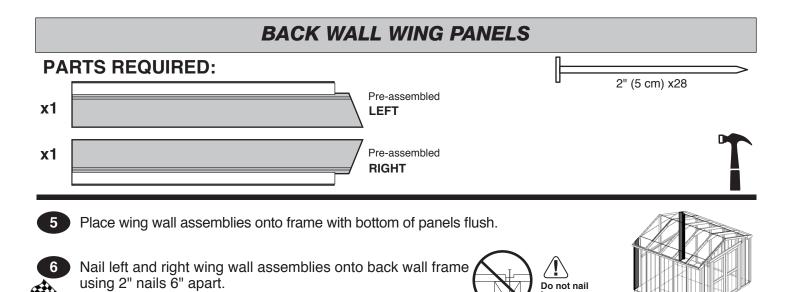

WING WALL PANELS

✓BEGIN

- 1 You will assemble TWO RIGHT and TWO LEFT wing walls.
- Place OY on floor. Place a wing wall panel primed side down onto OY (Fig. A) and flush to panel edges as shown.
- 3 Secure flush to edges using eight 1-1/4 screws 10" apart.
- You have finished building two sets of wing wall assemblies. Set **ONE LEFT** and **ONE RIGHT** aside. Continue building your back wall.

You have finished attaching your wing walls.

To draw panels tight at seams angle nail.

Do not nail in groove.

Use a 2x3" for support.

Primed side UP 6" (15,cm) **LEFT** Primed side UP Flush (15 cm) **RIGHT** Flush

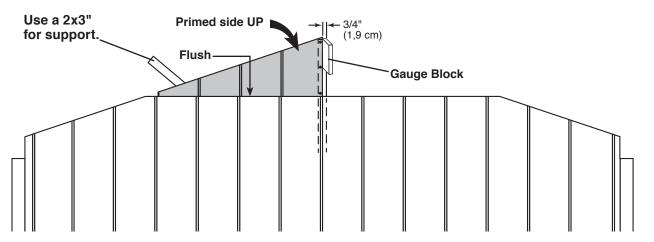

PARTS REQUIRED: 2" (5 cm) x6 3/4" GAUGE BLOCK

√BEGIN

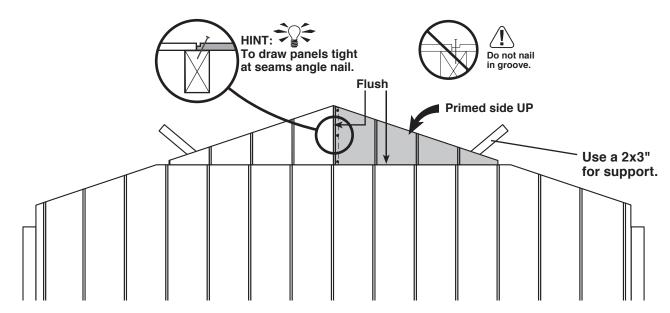

Place left gable panel onto frame primed side up and flush to left panel. **NOTE:** Panel grooves will not align.

- Place right gable panel onto frame primed side up and flush to left panel. **NOTE:** Panel grooves will not align.
- 4 Nail using 2" nails along edge as shown.

5 You have finished building your back wall.

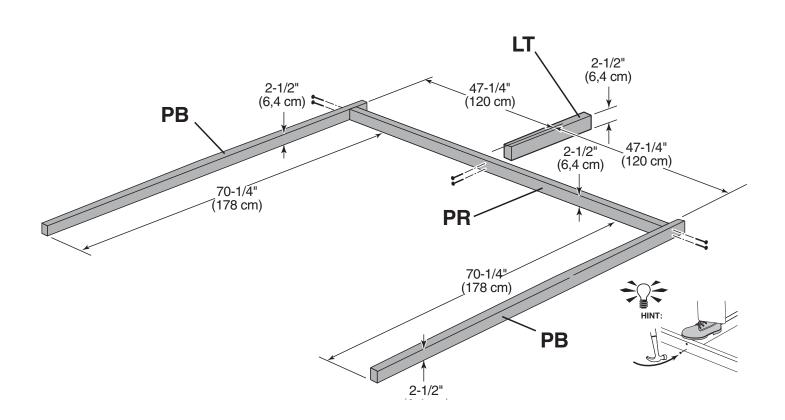

FRONT WALL FRAME PARTS REQUIRED: x1 LT 2 x 3 x 22-1/8" (5 x 7,6 x 56 cm) x2 PB 2 x 3 x 77" (5 x 7,6 x 196 cm) x1 PR 2 x 3 x 94-1/2" (5 x 7,6 x 240 cm)

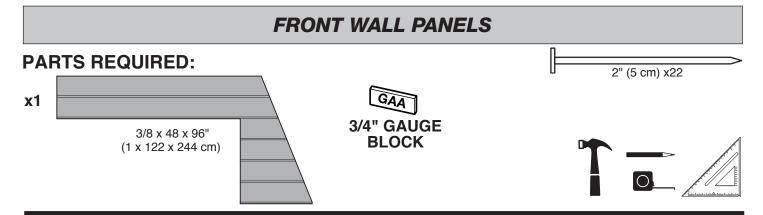

VBEGIN

- 1 Lay out two PB, one PR and one LT on edge on floor.
- 2 Nail two PB to PR with two 3" nails at each end.
- 3 Ensure LT is centered with PR and nail in place with two 3" nails.

FINISH

4 You have finished building your front wall frame.

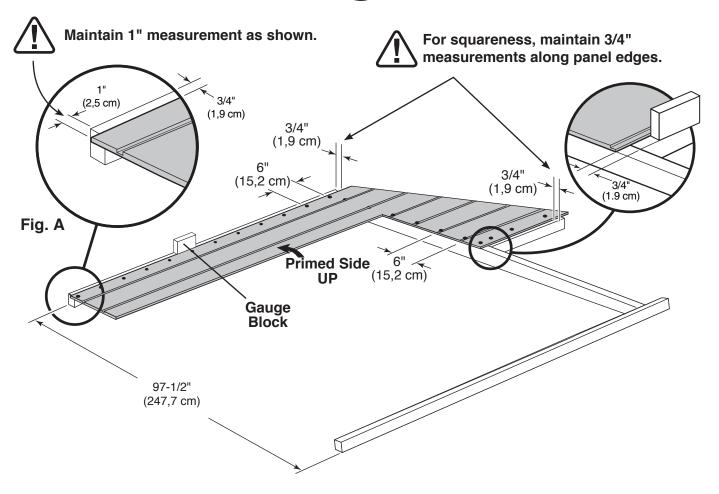

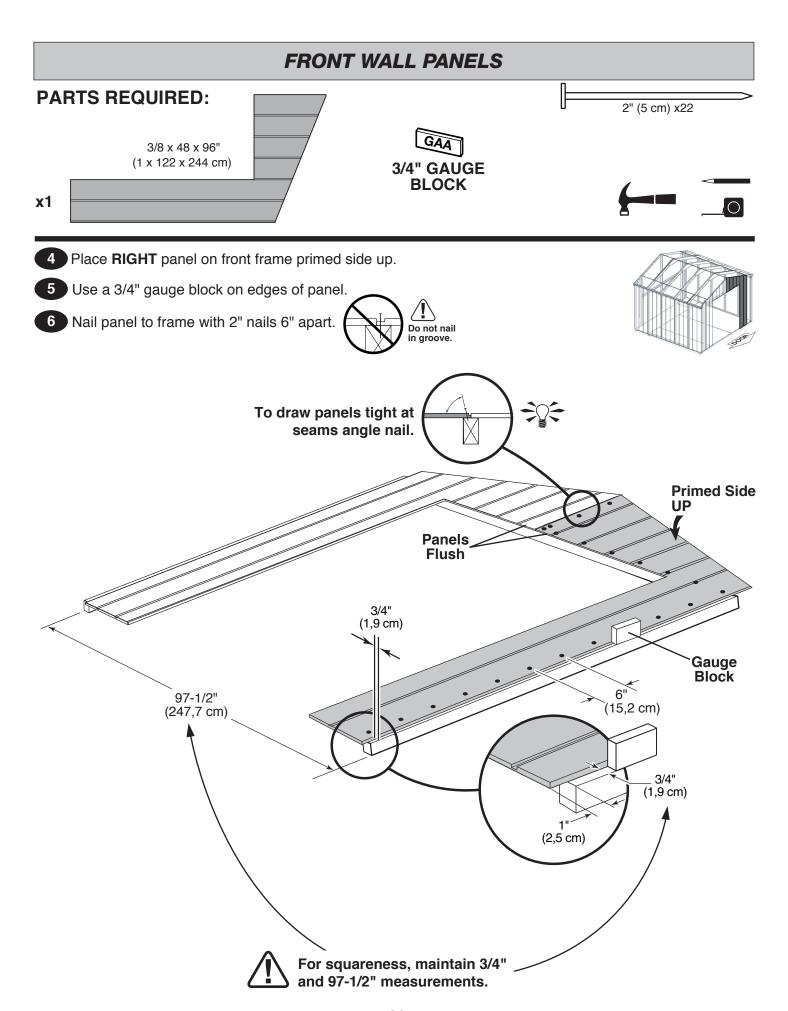

BEGIN

- Place **LEFT** panel on front frame as shown with primed side up.
- Use a 3/4" gauge block on edges of panel.Be sure to maintain 1" measurement between bottom edge of frame and bottom edge of panel (Fig. A).
- 3 Nail panel to frame with 2" nails 6" apart.

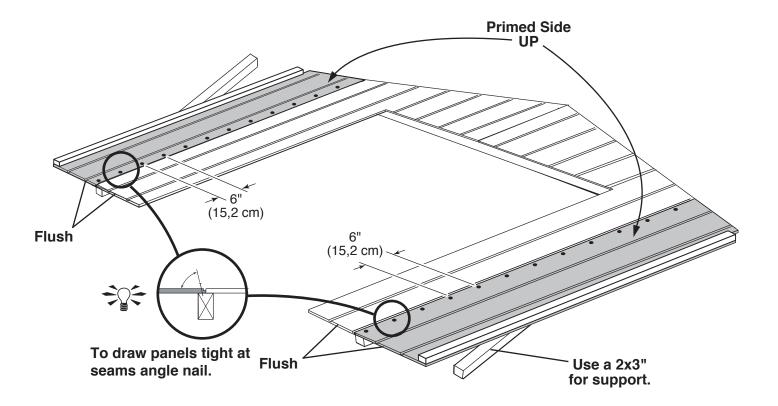

Pre-assembled RIGHT Provided Right FRONT WALL PANELS 2" (5 cm) x24 2" (5 cm) x24

- Place wing wall panels onto frame with bottom of panels flush.
- Nail left and right wing wall assemblies using 2" nails 6" apart.

 Do not nail in groove.
- 9 You have finished attaching your wing walls.

SIDE WALL FRAMES

PARTS REQUIRED:

NH2 x 3 x 46-1/4" (5 x 7,6 x 117,5 cm)

OV2 x 3 x 69" (5 x 7,6 x 175 cm)

X2 OZ 2" x 3" x 70-1/4" (5 x 7,6 x 178,4 cm)

x2 7/16 x 2-1/2 x 73-1/2" (1,1 x 6,3 x 187 cm)

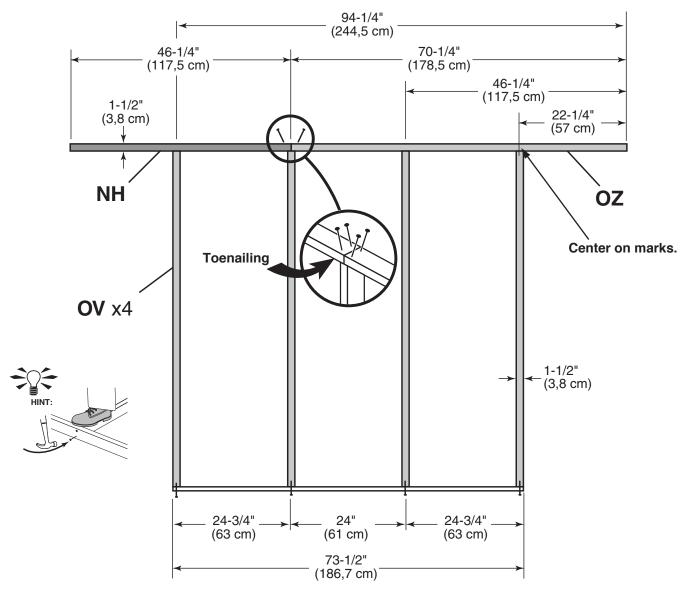

3" (7,6 cm) x18

BEGIN

- Orient parts on edge on floor. Measure and mark from end of boards. IMPORTANT! You will build two walls the same.
- 2 Use two 3" nails at each mark.

SIDE WALL FRAME- SOFFIT

PARTS REQUIRED:

ATTITUTE OF THE PARTY OF THE PA 1-1/4" (3,2 cm) x28

x2

3/8 x 5 x 21-1/4" (0,9 x 12,7 x 54 cm)

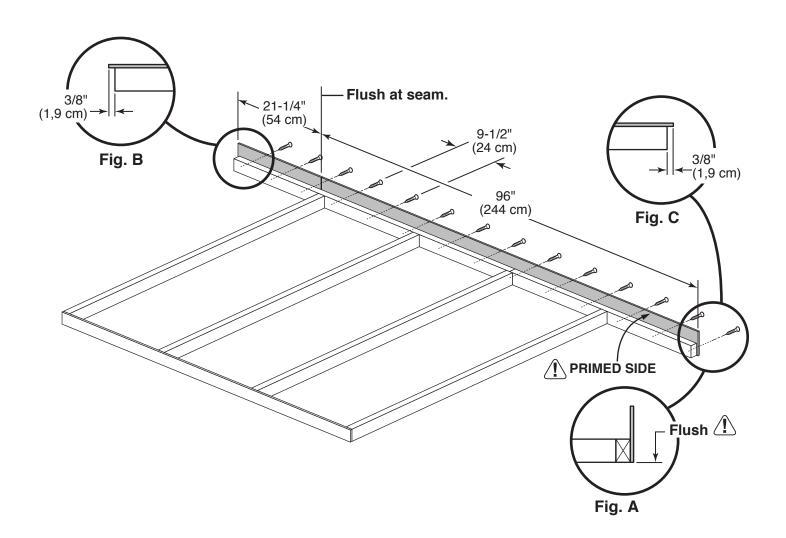

x2

3/8 x 5 x 96" (0,9 x 12,7 x 244 cm)

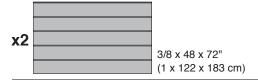

- Place panels onto 2x3 with primed side against 2x3 (Fig A).
 - Keep panels flush along entire edge of 2x3 top plate (Fig A).
- Attach soffit panels flush to 2x3 (Fig A) and with 3/8" offset at ends (Fig. B, C) using fourteen 1-1/4" screws.

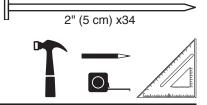

SIDE WALL PANELS

PARTS REQUIRED:

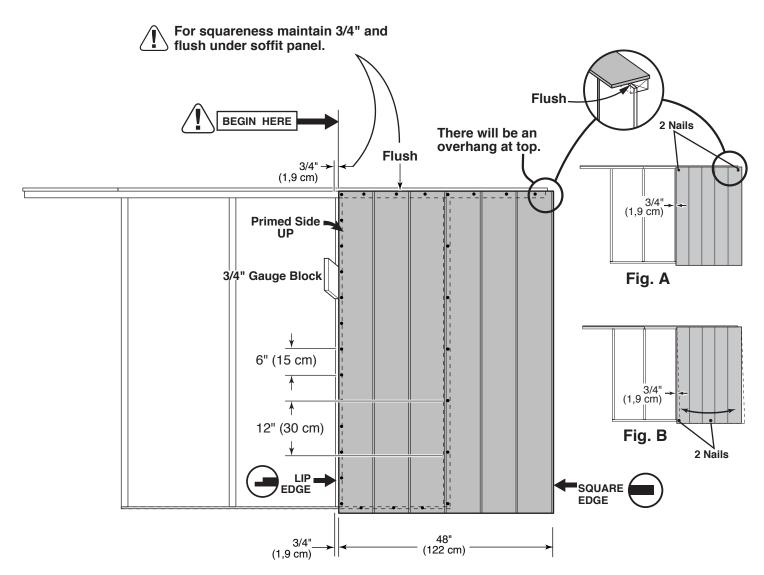

Ensure your wall frame is square by installing one panel and squaring frame.

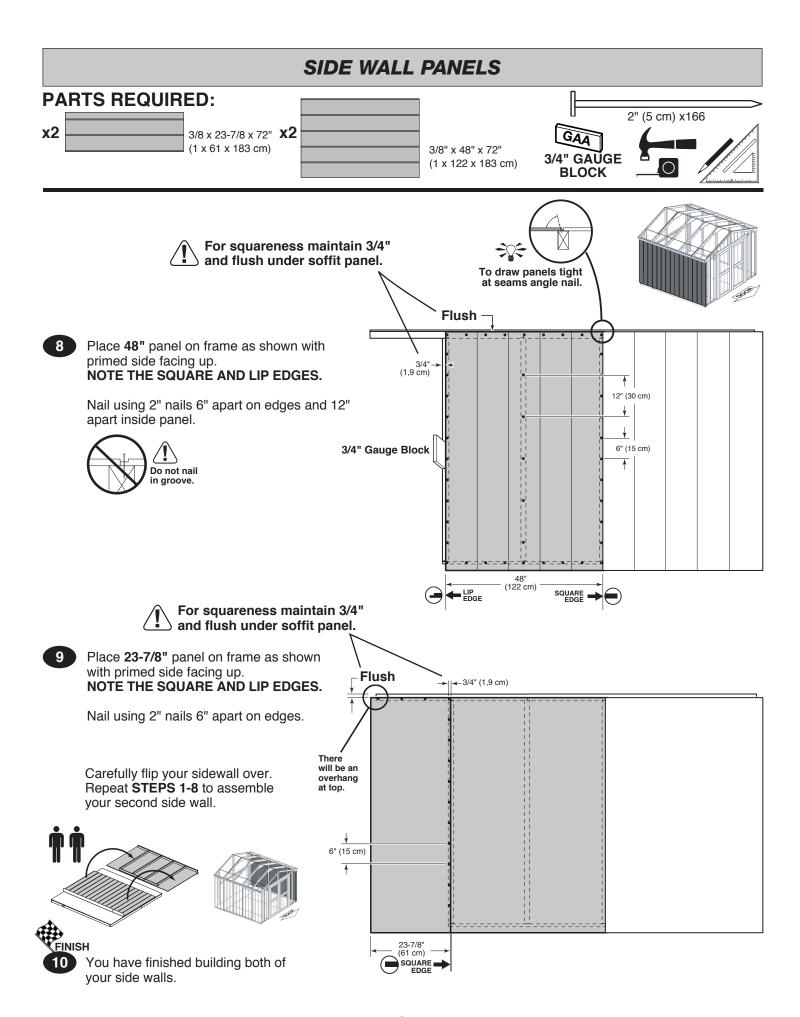

Place the 48 x 72" panel onto wall frame with primed side up as shown. Note the lip and square edges.

Use the gauge block to mark the 3/4" measurement on the wall stud. Locate the panel flush under the soffit panel. Secure panel with two 2" nails in the corners (**Fig. A**).

- Move to the opposite end. Using the long edge of the panel as a lever move the panel side-to-side until you have a 3/4" measurement on the wall stud. Secure corner with two 2" nails.
- Nail the panel using 2" nails 6" apart on edges and 12" apart inside panel.

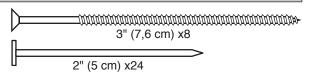

BACK WALL INSTALLATION

PARTS REQUIRED (TEMPORARY):

v1

00

1-1/4 x 2-1/2 x 69" (3,2 x 7,6 x 175,3 cm)

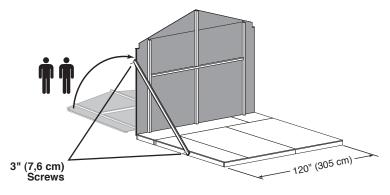

BEGIN

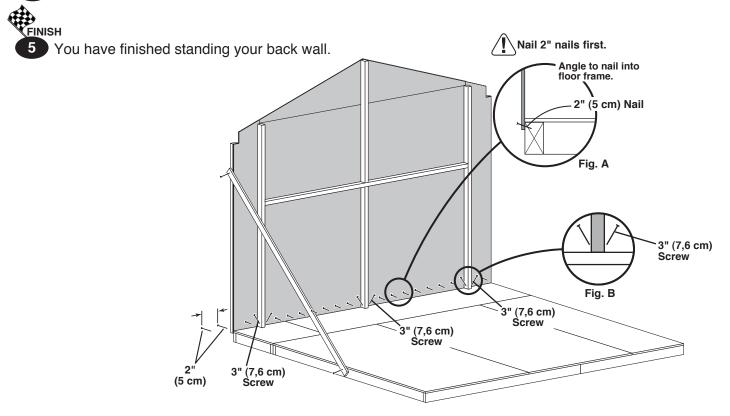

- 1 Center back wall assembly on the 120" (305 cm) floor dimension.
- 2 Use **00** as a temporary brace. Secure with two 3" screws.

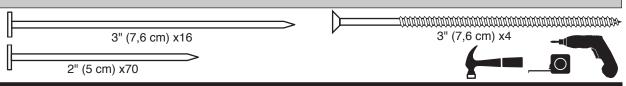

- First, nail lower edge of panel to floor frame using 2" nails 6" apart. Angle nail to hit floor frame (Fig. A).
- 4 Screw back wall uprights to floor using two 3" screws (Fig. B).

SIDE WALLS INSTALLATION

BEGIN

Stand right sidewall on floor.

/!\times It is important to secure the sidewall in the following order.

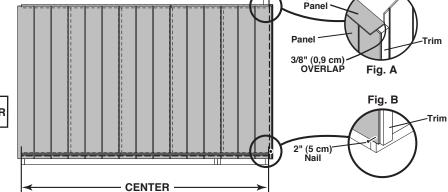

Soffit

Center sidewall on floor front to back.

> Rest the top of the sidewall so the soffi t panel overlaps the backwall panel 3/8" (Fig. A).

Nail the lower sidewall corner to the backwall trim with one 2" nail (Fig. B).

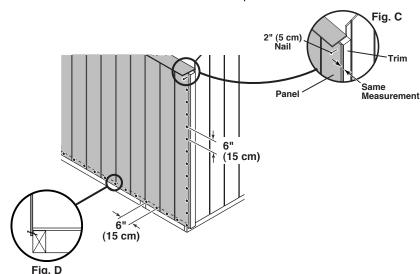

Be sure the measurement between the panel edge and the trim is the same along the entire length. Then secure with one 2" nail in the upper corner (Fig. C).

> Nail along the panel edge into the trim using 2" nails spaced 6" apart.

Nail along bottom of panel using 2" nails 6" apart. Angle nail to hit floor frame (Fig. D).

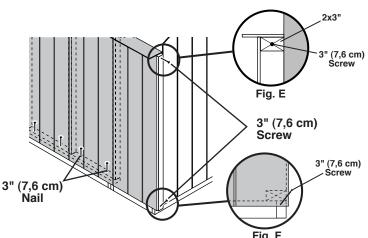

Nail down the bottom plate using two 3" nails between the wall studs.

> Screw through the backwall trim into the top and bottom plates using one 3" screw (Fig. E).

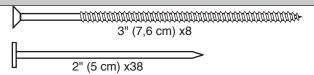

Screw through the backwall trim using one 3" screw. Angle screw to hit floor frame (Fig. F).

Repeat process to secure the left sidewall.

FRONT WALL INSTALLATION

VBEGIN

Stand frontwall on floor.

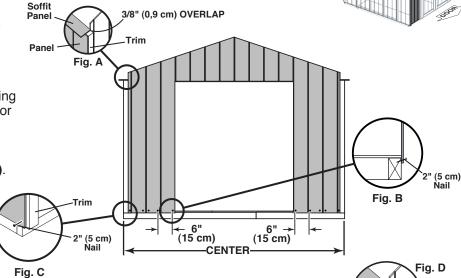

/!\ It is important to secure the frontwall in the following order.

Center frontwall on floor side-to-side.

The sidewall soffit will overlap the frontwall 3/8" (Fig. A).

Nail the frontwall flush to the floor using 2" nails 6" apart. Angle nails to hit floor frame (Fig. B).

Nail the lower sidewall corner to the frontwall trim with one 2" nail (Fig. C).

6'

(15 cm)

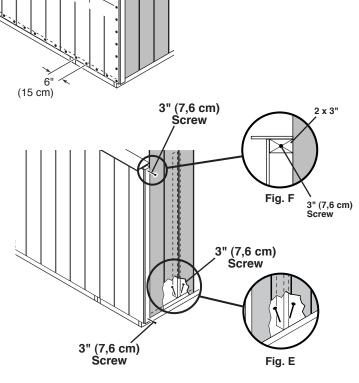

Be sure the measurement between the panel edge and the trim is the same along the entire length. Then secure with one 2" nail in the upper corner (Fig. D).

> Nail along the panel edge into the trim using 2" nails spaced 6" apart.

Secure the frontwall frame using two 3" screws (Fig. E).

> Screw through the frontwall trim into the top and bottom plates using one 3" screw (Fig. F).

Repeat process to secure the right side of the frontwall.

2" (5 cm) Nail

Panel

(5 cm)

Nail

Measurement

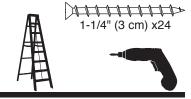

GABLE TRIM

PARTS REQUIRED:

x4 /

CDD

2 x 3 x 58" (5 x 7,6 x 147,3 cm)

BEGIN

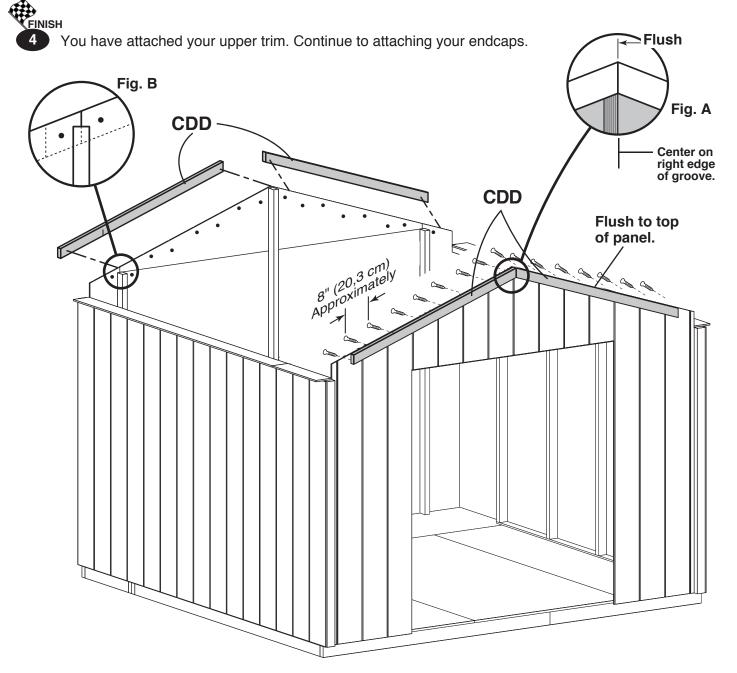

Position one CDD flush to front panel edge and center on right edge of groove (Fig. A). Attach trim with eight 1-1/4" screws from inside. Install two screws at seam (Fig. B).

Position second CDD flush to panel edge and flush to CDD already attached (Fig. A). Attach trim with eight 1-1/4" screws from inside. Install two screws at seam (Fig. B).

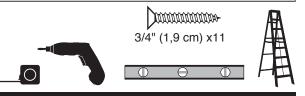

BACK WALL GABLE TRIM

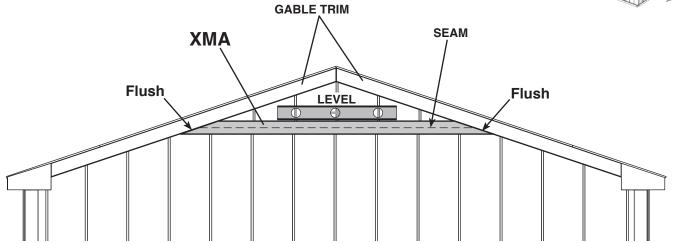

PARTS REQUIRED:

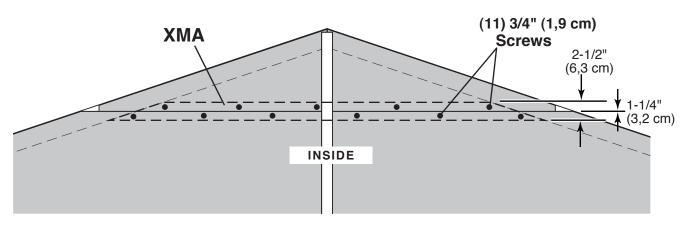

Clamp or hold trim XMA onto gable panel seam and up against gable trim. Ensure XMA is level.

2 From the inside, attach XMA with 3/4" screws as pattern shows.

FINISH

3 You have attached your back wall gable trim.

TRIM / ENDCAPS

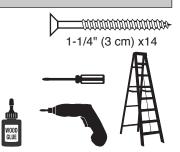

PARTS REQUIRED:

x4 GBB

1 x 3 x 7-1/2" (2,5 x 7,6 x 19 cm)

x4

3/4 x 5-1/8 x 8-3/8" (1,9 x 13 x 21,3 cm) RIGHT PAINTED RED LEFT PAINTED GREEN

BEGIN

Glue 7-1/2" boards onto endcaps, and fasten with 1-1/4" screws, as shown.

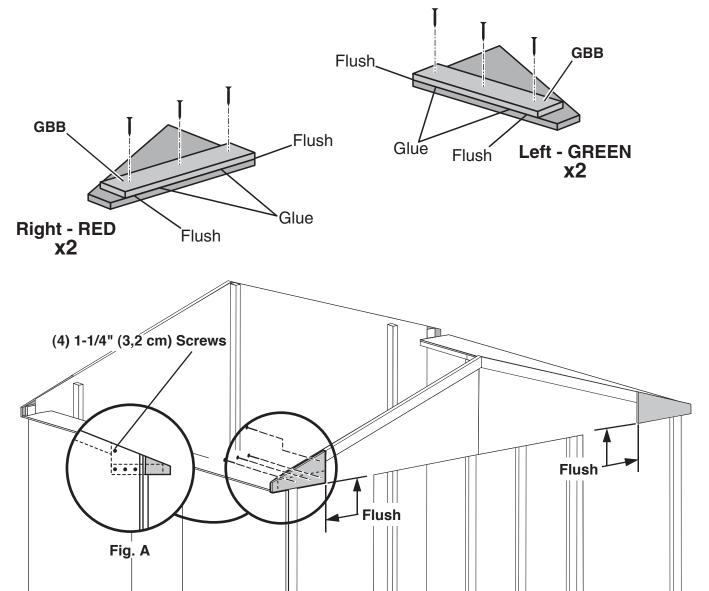

2 Repeat steps to build two more endcaps.

Locate endcaps flush with upper trim and corner trim and attach each endcap from inside of shed using four 1-1/4" screws as shown (Fig. A).

FINISH

You have attached your endcaps.

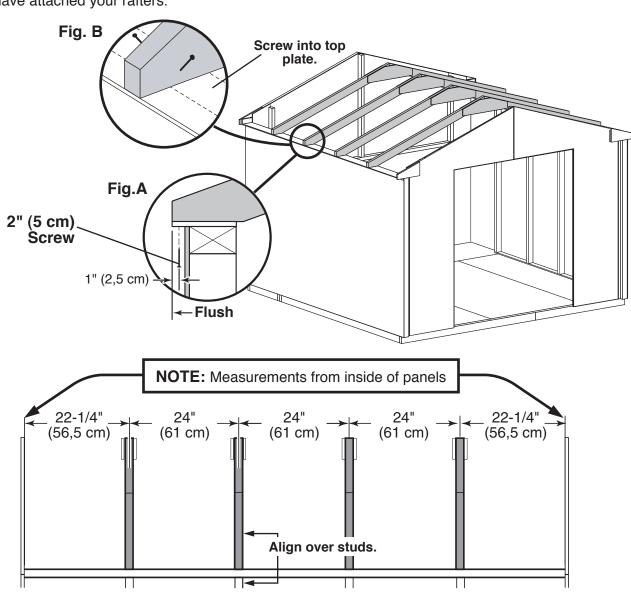

PARTS REQUIRED: pre-assembled 2" (5 cm) x8

- Locate rafters directly over studs and flush to overhang in wall frame (Fig. A). Check that you have the measurements shown. Screw through soffit panel into rafters using one 2" screw (Fig. A).
- Attach with two 3" screws at each end (Fig. B). Re-tighten 2" screws if neccessary.
- Repeat steps to attach 4 rafters.

4 You have attached your rafters.

Maintain the measurements between rafters.

TRIM

PARTS REQUIRED:

x2 DN

1 x 3 x 23-1/4" (2,5 x 7,6 x 59 cm)

BS1 x 3 x 95-1/2" (2,5 x 7,6 x 242,5 cm)

2" (5 cm) x28

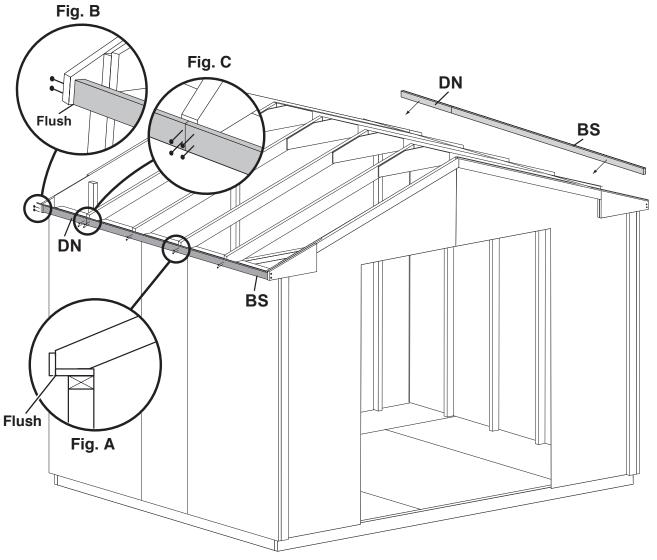

BEGIN

Attach fascia trim flush to bottom of soffit (Fig. A) and endcaps at ends of rafters (Fig. B, C) using 2" (5 cm) nails as shown.

2 Repeat steps to attach fascia trim on both sides.

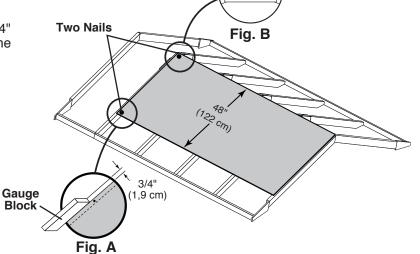

3 You have attached your fascia trim.

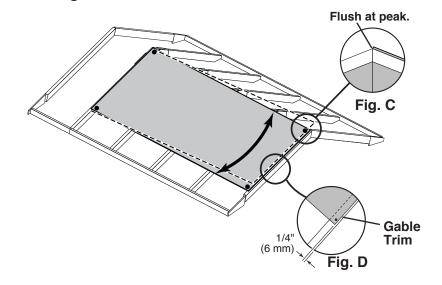

Secure panel with two 2" nails in the corners.

panel flush at the peak (Fig. B).

Move to the opposite end. Using the long edge of the panel as a lever move the panel side-to-side until the top corner is flush to the peak (Fig. C) and there is 1/4" measurement to the gable trim (Fig. D).

You may need to move your backwall to get the 1/4" measurement. Secure panel with two 2" nails in the corners.

ROOF PANELS

PARTS REQUIRED:

3 Keep spacing between the center of the rafters at the lower edge of the panel and secure with one 2" nail into each rafter (Fig. E).

Move to the top of the panel and keep spacing between the center of the rafters. Secure with one 2" nail into each rafter (Fig. E).

Nail the roof panel using 2" nails 6" apart on edges and 12" apart inside panel.

Attach the second 23-7/8 x 48" upper roof panel flush to first panel, flush at peak and with the 1/4" measurement (Fig. F, G).

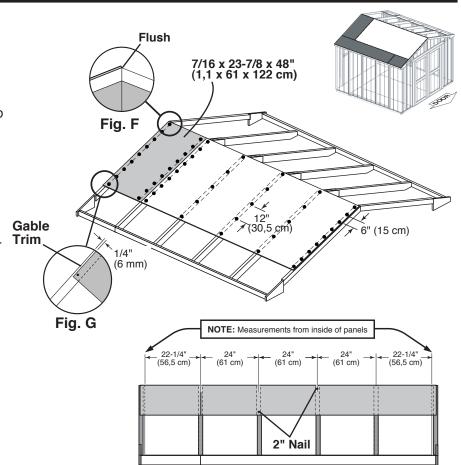

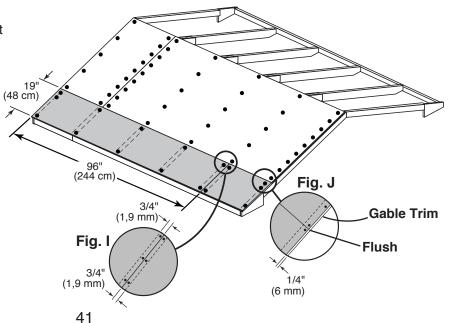

Fig. E

Attach the lower roof panels flush to the upper panels (Fig. J) and 3/4" on rafter (Fig. I) and with a 1/4" measurement at the gable trim (Fig. J).

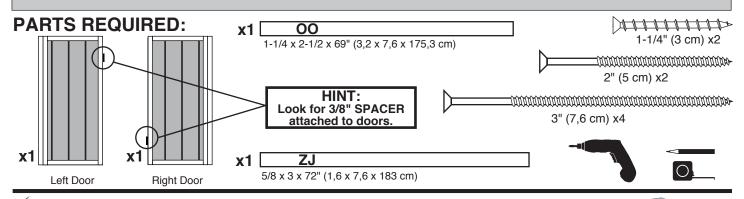

Nail the roof panel using 2" nails 6" apart on edges and 12" apart inside panel.

Repeat process to attach roof panels on the opposite side.

DOORS

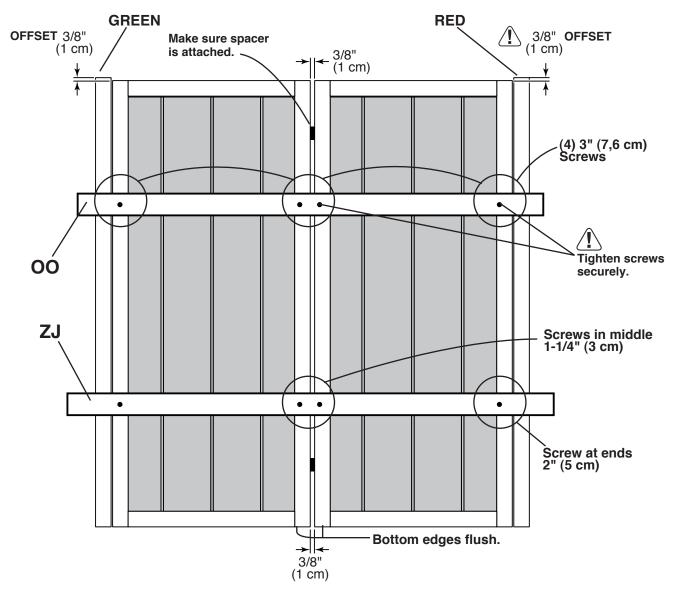

VBEGIN

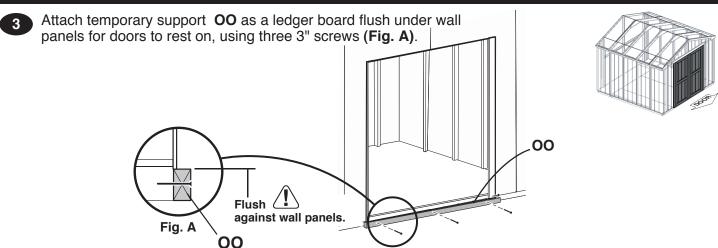

- Orient parts as shown on flat surface. 1 3/8" offset is to top. Look for red (right) and green (left) on hinge board.
- Attach temporary support **OO** with 3" screws in middle and at ends. Tighten securely.

Attach temporary support **ZJ** at bottom with 1-1/4" screws in middle and 2" screws at ends. Tighten securely.

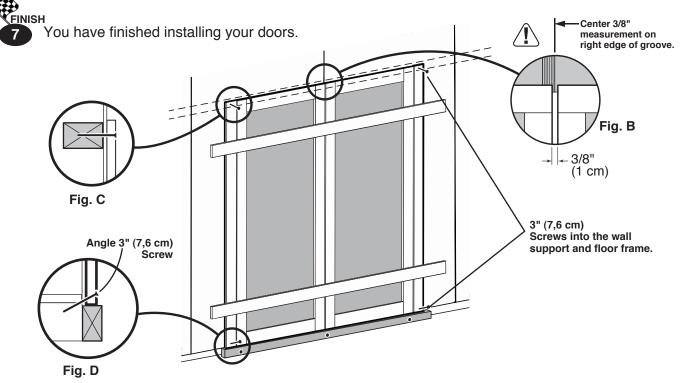

- Center doors on right edge of groove as shown (Fig. B).
 - ! Check ledger board is still flush under panels.
- Screw hinge boards into wall supports and floor using four 3" screws as shown.

 Nake sure screws go into framing and floor (Fig. C, D).
- 6 Remove temporary supports and check doors open properly.

DOOR

PARTS REQUIRED:

X2 AH 19/32 x 2-1/2 x 26-5/8" (1,5 x 6,3 x 67,6 cm)

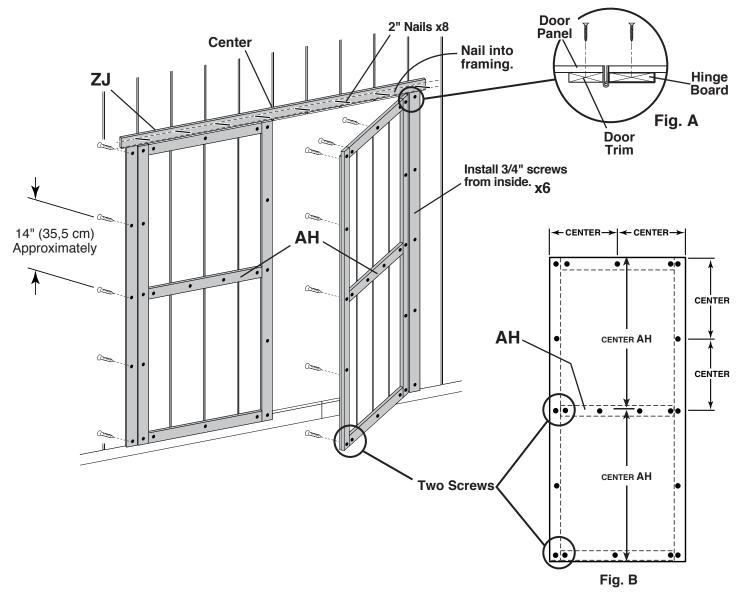

BEGIN

- Secure hinge boards from inside using 3/4" screws as shown (Fig. A).
- Secure two horizontal door rails **AH** with four 3/4" screws from behind to center of doors as shown.
- Reinforce the door trim using 3/4" screws through door panel into trim (Fig. A). Locate screws as shown in Fig. B. Use two screws at seams.
- 4 Center trim **ZJ** over doors and secure using eight 2" finish nails into framing as shown.

5 You have finished securing your door and trim.

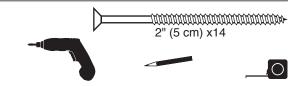

DOOR WEATHERSTRIP

PARTS REQUIRED:

x2 **00**

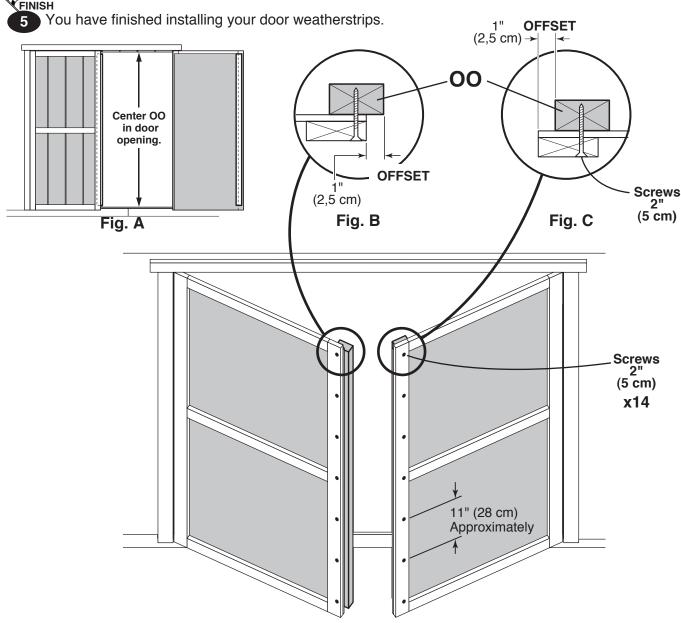

1-1/4 x 2-1/2 x 69" (3,2 x 7,6 x 175,3 cm)

BEGIN

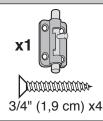

- With left door closed, center a weatherstrip **OO** vertically on the left door in the door opening (Fig. A). OO will offset the left door 1" OUT past the door trim 1" (Fig. B).
- Secure OO using seven 3" screws through outside trim into OO (Fig. B)
- On right door center **OO** vertically in door opening (Fig. A). **OO** will offset the right door 1" IN from the door trim (Fig. C).
- Secure **OO** using seven 3" screws through outside trim into **OO** (Fig. C).

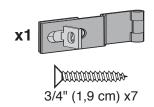

DOOR HARDWARE

PARTS REQUIRED:

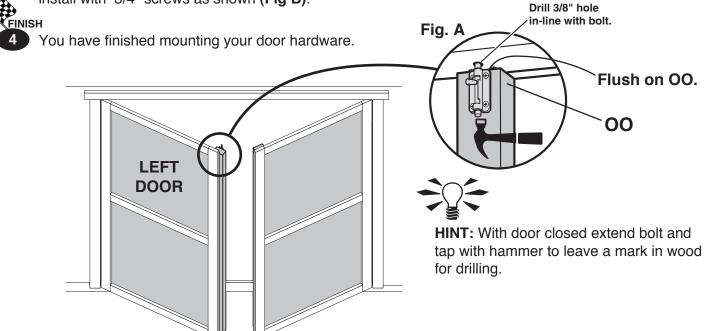

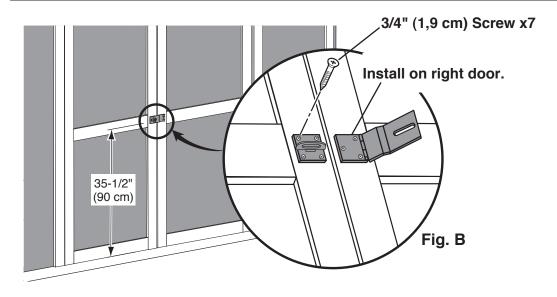

√BEGIN

- Mount barrel bolt flush at top of **OO** on left door using 3/4" screws as shown (Fig A).
- With door closed mark hole location for bolt to extend into.

 HINT: Extend bolt to leave a mark in wood. Tap bolt with hammer. Drill 3/8" hole deep enough for bolt to slide into.
- Install hasp on right door and latch on left door. Bottom edge of hasp is 35-1/2" (90 cm) up from bottom edge of door trim. Measure and mark locations and install with 3/4" screws as shown (Fig B).

PAINT & CAULK - NOT INCLUDED -

- Use acrylic latex caulk that is paintable. Caulk at all horizontal and vertical seams, between the trim and walls, and all
 around the door trim.
- Use a high quality exterior acrylic latex paint. When painting your building, there are a few key areas that can be easily overlooked that must be painted:
 - · Bottom edge of all siding and trim
 - · Inside of doors and all 4 edges

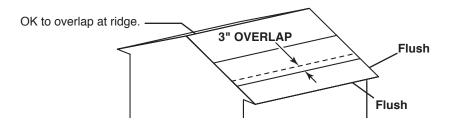

Drip Edge

Note:

Prime all un-primed exterior wood before painting. (Follow directions provided by manufacturer.)

ROOF FELT- NOT INCLUDED -

• Install felt flush to all roof edges overlapping 3". Use minimal amount of roofing nails to hold in place.

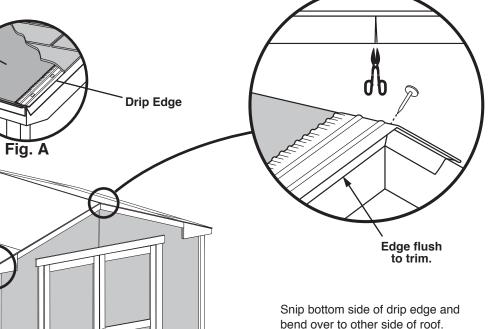

DRIP EDGE - NOT INCLUDED -

(Follow directions provided by manufacturer.)

47

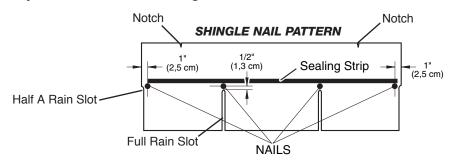

SHINGLES - NOT INCLUDED -

· Follow directions provided by manufacturer and these instructions.

Familiarize yourself with a 3-Tab Shingle.

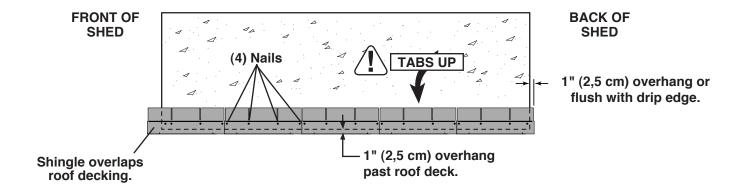

NEVER DRIVE FASTENERS INTO OR ABOVE SEALING STRIPS.

VBEGIN

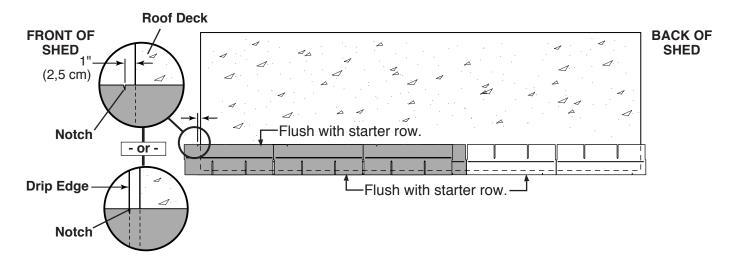

Install first starter row upside down and color up with a 1" overhang at back and bottom of roof panel. Use (4) nails per shingle. Starter row must be straight and level all the way across with lower edge of roof deck.

NOTE: If you have installed drip edge install shingles flush to drip edge.

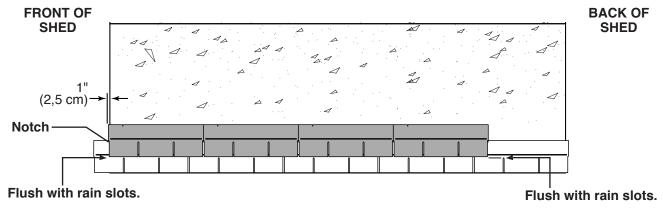

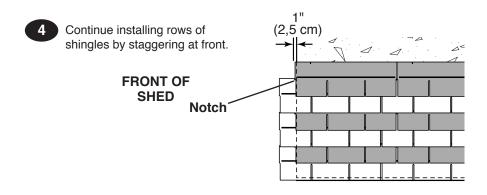

SHINGLES continued...

Beginning at front of shed, install first row of shingles with notch at 1" past roof edge or flush with drip edge.

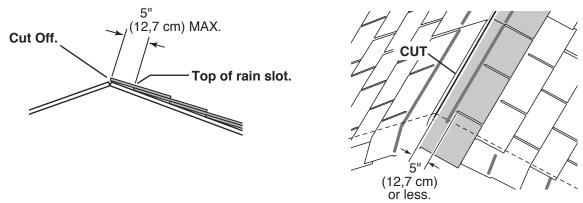

Install second row of shingles flush at top of first row's rain slots. Ensure 1" overhang or flush to drip edge at front, stagger each row.

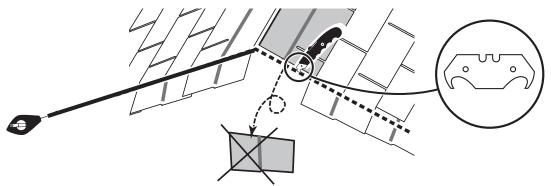

SHINGLES continued...

5 Continue installing rows of shingles to the peak. At the peak make sure there is a maximum of 5" or less to the rain slot, as shown below. If shingles overlap at ridge cut to peak with a utility knife.

- <u>(1</u>
- /!\ · If more than 5" to rain slot you must install another row of shingles.

- 6 Repeat steps 1 5 to shingle the opposite side of your roof. Trim shingles at ridge.
- Once both sides are shingled you need to trim ends. Strike a chalk line 1" from edge.
- 8 Using your shingle hooked blade carefully cut shingles along chalk line.

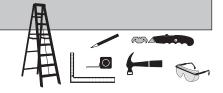

You have finished shingling your roof. Proceed to capping the ridge.

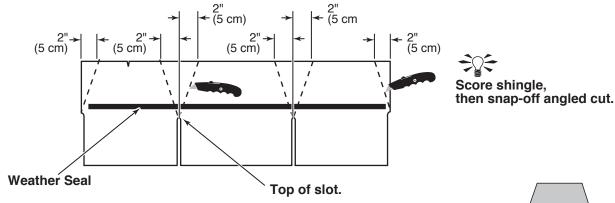

SHINGLES - RIDGE CAP

• You will finish off the top of the roof with a ridge cap made from shingles.

VBEGIN

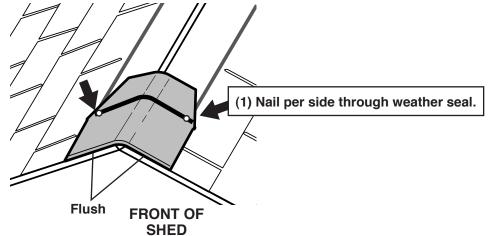

Cut shingles into THREE pieces. Hint: Use cut-off pieces first.

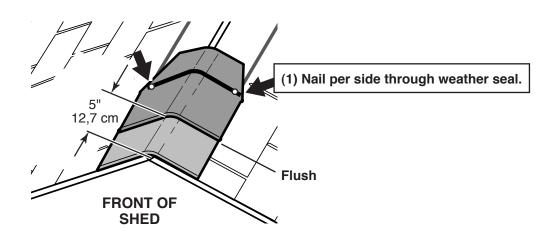

Note: • You will need about 24 - 26 cut pieces.

2 Install first ridge cap flush to shingles at front, as shown.

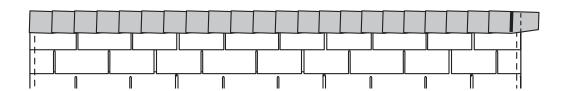

3 Install second ridge cap 5" back, as shown.

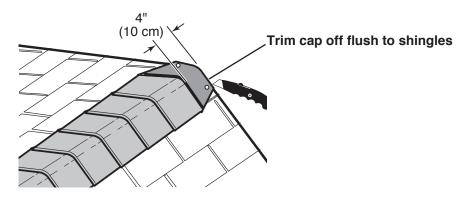

SHINGLES - RIDGE CAP

continued...

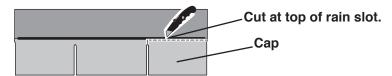

4 Continue installing ridge cap to back of roof.

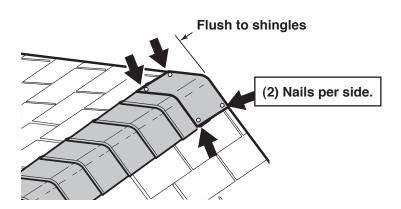

5 Make sure there is 4" between the shingle-color and edge of shingles.

6 When you have 4" minimum of shingle color cut one piece to cap your roof.

7 Install flush to shingles.

FINISH

You have finished your ridge cap.

WARRANTY

Backyard Storage Solutions, LLC warrants the following:

- Every product is warranted from defects in workmanship and manufacturing for one year.
- 2. All hardware and metal components are warranted for two years.
- 3. Trim is warranted for 10 years.
- 4. Waferboard siding and sheathing is warranted for two years.
- SmartSide[™] siding is warranted for 10 years on all Marco series buildings and 15 years on all Premier Series buildings.
- 6. Timber series buildings' siding and trim are warranted for 10 years.
- 7. Solar Shed windows are warranted for 1 year.
- 8. Cedar lumber is warranted for 15 years.
- 9. Cedar doors and Cedar Garden Center are warranted for 10 years.
- 10. Metal roof is warranted for 25 years.

Backyard Storage Solutions, LLC will repair, replace or pay for the affected part. In no event shall Backyard Storage Solutions, LLC pay the cost of labor or installation or any other costs related thereto. All warranties are from date of purchase. If a cash refund is paid on an affected part, it will be prorated from the date of purchase.

CONDITIONS

The warranty is effective only when:

- 1. The unit has been erected in accordance with the assembly instructions.
- 2. The unit has been properly shingled and painted or stained and reasonably and regularly maintained thereafter.
- 3. The failure occurs when the unit is owned by the original purchaser.
- 4. Backyard Storage Solutions, LLC has received the warranty registration card within thirty (30) days of purchase and notification of the failure in writing within the warranty period specified above.
- 5. Backyard Storage Solutions, LLC has had reasonable opportunity during the sixty (60) days following receipt of notification to inspect and verify the failure prior to commencement of any repair work.

REQUIREMENTS

Storage Buildings & Playhouses

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit; shingle the roof and paint or solid-colored stain the siding using 100% acrylic latex exterior product with a minimum of two (2) coats within thirty (30) days of assembly; caulk above all doors and all horizontal and vertical trim boards; paint and seal all exposed edges, sides and faces of SmartSide™ and waferboard siding to include all exterior walls and all sides and all edges of doors.

Gazebos, Pergolas & Timber Buildings

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit. This includes treating all of the exposed cedar and pine surfaces on your gazebo or timber building with an exterior grade wood preservative, an exterior oil-based semi-transparent stain, an acrylic latex exterior paint or an acrylic latex solid color exterior stain within 30 days of assembly and as needed thereafter to maintain your warranty.

Keep vegetation trimmed away from building and make sure siding panels and trim do not come in contact with masonry or cement. The minimum ground clearance for siding must be one half inch (½ inch) from concrete slab or two and one half inches (2 ½") from the ground when building is erected or constructed on a treated wood floor kit. Water from sprinklers must be kept off unit. In no event will Backyard Storage Solutions, LLC be responsible for any indirect, incidental, consequential or special damages nor for failure(s) that are caused by events, acts or omissions beyond our control including, but not limited to, misuse or improper assembly, improper maintenance (which eventually leads to rot or decay) and acts of God. Backyard Storage Solutions, LLC will not be held responsible for any labor costs incurred to construct your unit. This warranty gives you certain specific rights that vary from state to state.

CLAIM PROCEDURE

To make a claim under this warranty, you can either call 1-888-827-9056 or prepare a letter. Please have ready the information below when you call or include the information when writing:

- 1. The model and size of the product.
- 2. A list of the part(s) for which the claim is made.
- 3. Proof of purchase of the Backyard Storage Solutions, LLC item, as shown on the original invoice.
- 4. Run code, as listed on the yellow warranty card enclosed in the product package.

Mail the above information to:

Backyard Storage Solutions, LLC Attn: Customer Service 1000 Ternes Monroe, MI 48162

*WARRANTY TERMS MAY VARY OUTSIDE THE U.S.A.

IMPORTANT: This is your warranty certificate.

Please complete and mail your warranty card to properly validate your warranty.
