

Oxy-Flush™ is Easy to Use!

Oxy-Flush can be used to maintain any drain, pipe or appliance using water. Simply apply about 1 scoop in each drain monthly to keep the drains clean and clear. Most people don't understand that their dishwasher or wash machine develop grunge build-up in them. Simply apply about 1 scoop into the machine as you would with a normal wash load and then fill with warm water. Run the appliance empty to get a sparkling clean machine. For toilets, apply about 1 scoop in the toilet tank and wait for about 30 minutes and then flush.

The great features of Oxy-Flush serves two purposes. It will first clean your drains, pipes, and appliances. The excess oxygen filled water will then flow to the septic tank providing life-giving oxygen for the aerobic bacteria.

Oxy-Flush works on all residential and commercial applications that are on a septic system or city sewer.
