

Hinged Gutter Guard

Helps Keep Leaves and Debris Out of Gutters.

- Convex hinged design provides strength and allows access to gutters.
- Made of long lasting galvanized steel, aluminum or copper. Powder coated steel also available.
- Three foot sections come in sizes that fit any standard style "K" gutters.
- 70 guards needed for the average home (approximately 210').

Installation

Thoroughly clean gutter and downspout of any debris before beginning installation.

The hinged gutter guard clips to the front lip of the gutter with a push of a finger.

**Do not overlap adjoining sections (guards) to allow access to gutter.*
