

## Attic Ease Pull System

### Installation Tools Needed:

- Pocket knife or scissors
- Pliers
- Power Drill
- ¼" Drill bit

### Instructions:

- Lower Attic Door.
- Cut off existing cord.
- Drill ¼" hole where string was mounted (if required).
- Insert the Fashion Pull-Ring through the ¼" hole on the exterior side of the Attic Door. Hand-tighten the fastener and washer assembly. Use pliers to tighten set screw.
- Raise the door back in place by inserting the hook of the Attic-Ease Reach Hook into the Fashion Pull-Ring.
- Locate a convenient place to store the Attic-Ease Reach Hook. A hall closet is usually ideal. Place the Reach Hook in the stowing position and mark where the storage hook should go.
- Hand turn the hook into position. Hang up your Attic-Ease Reach Hook.
