Selection varies by retailer

Life isn't one-dimensional and neither are your personality, preferences or taste. With Dimensions Project Wood, the possibilities for living life in 3D are endless. Experience the satisfaction of DIYing your own home décor, easily making small repairs, exploring new hobbies and getting crafty.

## PROJECT WOOD

With strength as well as good looks, Dimensions easy-to-handle project wood panels are designed for smaller everyday projects – without all the leftover.

These project-sized panels are ideal for a wide variety of DIY home décor and small repairs, as well as craft and hobby projects, DIY weddings and event planning of all kinds.

Whether it's your leisure activity, girls' craft night, tech-free time with grandkids or a school project, birthday party activity or homemade gift, Project Wood is sized to fit your need.

- Home décor
- Crafts & hobbies
- Attractive organizational solutions
- Easy handling, transportation & storage

Patch-free veneer on the face and back provide a clean, smooth canvas for any wood project, while also being durable enough to securely hold glue, screws and nails.

From art to utility repairs, make DIYing easier, more fun and more convenient with pre-cut, ready-to-use wood components.

Paint, stain, nail, string, drill.... Create custom wall art, home décor and more using your favorite art and craft supplies. With so many possibilities, let your imagination fly free and your creativity soar.

- DIY shelving
- Small repairs and utility projects
- Garage and basement work surfaces
- Right-sized components for big ideas

### Color, Stain and Finish Demonstration

Cork	Green	Green	Green	Green	Green	Green	Green	Green	Green
Wood Pegboard	Orange	Orange	Orange	Orange	Orange	Orange	Orange	Orange	Orange

- For the cleanest cuts, tape lines and use an 80-tooth or higher saw blade intended for wood
- Always carefully select the right products for the best finish
- Birch plywood Project Wood is grade B/BB
- The nominal thickness of a given panel may not be its exact dimension – as is common with dimensional lumber as well – but it will be so close as to ensure you're selecting the proper thickness for your project requirements.
