Press the key [Volume adjust] to adjust the volume, then press the key [Decrease] and [Increase] to increase or decrease the volume when it is blinking.

1. Don't close the magnetic and electric field, and avoid the direct light and heating appliance.
2. As the mobile Wi-Fi and Bluetooth are using the same channel, the signal and data may interfere each other when use together. Herein the download speed will be slow. If listen to the music on line, the slowing download will cause the problem of intermittent music playback.
3. Due to the different version from Bluetooth module manufacturers, some mobile phones may have the playing jam or connection lost problems.
4. The longest connection distance of Bluetooth 10 Meters is a theoretical distance without any barrier. In fact, it should be 2 to 8 meters under the actual environment. The human body is a main barrier so please make sure the Bluetooth speaker is kept within 10 meters away from the mobile phone and without any barrier such as wall or another electrical appliance.
5. Need to re-connect the Bluetooth signal by hand if it is disconnected.
6. There will be slight sounds when the blue tooth signal is connected. It is normal.
