

Taking care of our people and doing the right thing - two values at the core of how our stores think and operate.

We know that the best projects are the ones built sustainably, and those projects can't happen without exceptional customer service and know-how from associates in our aisles. Our commitment to responsible business practices for our people, products and operations is built - and will continue to grow - on this foundation.

PRODUCT SAFETY TESTING

The Home Depot's product testing program is remarkably stringent. Home Decorators Collection (HDC) Luxury Vinyl Flooring products are tested to the latest standards for Volatile Organic Compounds (VOCs), formaldehyde, phthalates, and heavy metals. In fact, the standards used for the testing of phthalates and heavy metals in HDC are the same standards used for the testing of children's toys, setting a very high bar. Home Decorators Collection has surpassed that bar. Equally important is the fact that HDC is FloorScore® certified, thus ensuring it meets strict standards for indoor air quality.

By selecting HDC, you have made the choice for safe and sustainable products. And isn't that what we all want when it comes to products in our businesses and homes? Come join us and discover all of the possibilities of luxury vinyl flooring.

DECLARATIONS & CERTIFICATIONS
