

Van Zyperden's
CANNAS PRETORIA

Cannas are among the most colorful summer bulbs - as flamboyant as their tropical American ancestry - with ruffled spikes tapering to refined buds boasting immense, paddle shaped leaves. Their great reedy canes and palmy foliage make for large magnificent plants. However, they yield blooms all summer long for long lasting curb appeal and are most dramatic when grouped.

*Exotic tropical foliage
and color*

*Attracts hummingbirds
and butterflies*

*Easy to grow
and low maintenance*

About This Variety: The south African Pretoria Canna Lily is a very vigorous growing canna with large flowers. The leaves are marked with prominent white lines that run the entire length of the leaves.

Growing Instructions: Where not hardy, plant outdoors in early summer 2 inches deep, setting the rhizome in the hole with 'eyes' (shoots) up. Cannas do best with a good supply of water. In fall, roots can be dug up and stored in a frost free place, or in milder climates leave them in the ground and cover with mulch.

Care Tip: As flowers fade, deadhead to promote continued flowering.

Exposure: Sun to partial shade

Height: Grows 4-5' tall

Spacing: Plant- 12-18" apart, 2-4" deep

Hardy in: USDA zones 8-11

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
