

EN Care instruction for
blomus stainless steel
products:

blomus stainless steel products are made of high-quality, food-safe materials. The material stainless steel is easy care but not no care. Stains and dark patches can form on matt-finished stainless steel if it is not cared for in the proper way. We would therefore advise you to clean and care for your blomus product on a regular basis.

Caution: Do not under any circumstances use chemicals, spirit, turpentine, petrol, bleaching agents, cleaning agents for silverware or any other caustic or aggressive cleaning agents and substances for the purpose of cleaning the given product. Nor are steel wool, abrasive sponges, hard brushes and cleaning pads suitable for cleaning and caring for blomus products. The surface finish of the product concerned may otherwise suffer permanent damage.

**Cleaning and caring for
blomus stainless steel
products:**

Finger marks on surface

finishes made of stainless steel can be removed with a damp blomus microfibre cleaning cloth, item no. 31045.

When necessary, clean your blomus product with warm water and, if required, some pH-neutral washing-up liquid. Rub it dry with a lint-free cloth in the direction of the matt finish in order to prevent water stains from forming. blomus stainless steel products are as a general rule dishwasher-safe. Please remove the products from the dishwasher as soon as possible after the washing cycle is finished and, if necessary, wipe them dry.

We advise the use of blomus stainless steel care spray, item no. 31031, for the extra care and sealing of the stainless steel surface finish. Application of the spray creates a protective film that repels dust and dirt.

Caution: blomus stainless steel care spray may not be used on products that come into contact with food. Any products treated by mistake with blomus stainless steel spray are to be washed with warm water and pH-neutral washing-up liquid and then dried.

**Cleaning and care of blomus
glass / ceramic / plastic /
rubber / silicon / bamboo /
and wood products:**

When necessary, clean your blomus product with warm water and, if required, some pH-neutral washing-up liquid. Then rub it dry with a lint-free cloth. Repeat the above procedure in the case of seriously soiled materials.

Caution: Wood and bamboo parts are as a general rule not dishwasher-safe. Please ensure that sensitive materials such as glass, wood and bamboo are not damaged when cleaned.
