

Mayfair Metal Platform Bed Frame

HBEDMAYF-FL model shown

MAYFAIR METAL PLATFORM BED FRAME

The cross-barred framework of the Mayfair Metal Platform Bed from Hanover creates a pattern reminiscent of classic plaid styles. The black powder-coated steel structure lends well to industrial and modern styles and will coordinate with a wide range of bedroom colors and textures. With the pre-assembled, durable slat system, the Mayfair Bed will support up to 700 lbs. and does not require a box spring or foundation. The entire bed ships via UPS and allows for easy assembly in minutes, due in part to the intelligent design of the fully-welded one-piece headboard and one-piece footboard. The open framework makes this bed a great option for placement in front of a large window because it will not obscure your view or natural light, so you can enjoy all the features of your bedroom space.
