

Mailbox Maintenance

CONGRATULATIONS ON PURCHASING YOUR HIGH QUALITY Lazy Hill Mailbox

Your mailbox is protected by the finest exterior powder coat available and with a minimum amount of maintenance you can keep your mailbox looking like new.

Like any outdoor product exposed to the elements 24/7, a little surface rust is going to appear over time especially if you live near the ocean where salt is present in the air.

Twice a year apply any quality car wax to prevent the elements from deteriorating the finish. Wax more frequently if within 10 miles of the ocean.

Remove any surface rust or corrosion with a little solvent on a rag before waxing.

If necessary, use a common Auto enamel touch paint pen to repair any scratches or chips that appear from road debris and everyday use.
