

Peacock Plant Care

Light

Prefers a well-lit area without direct sunlight. Direct sunlight will cause foliage damage.

Water

Keep soil well drained but evenly moist.

Temperature

A minimum temperature of 68 degrees Fahrenheit is need for optimum growth. This will be damaged by frost.

Prunning

Prune as needed to remove brown or dead leave and control growth.

Feeding

During spring and summer, diluting the plant food at 1/2 the recommended strength and fertilize monthly. Fertilize every other month in the fall and winter.
