# Hardwood Flooring

## American Originals™
### A world of design possibilities

You tried ten samples before choosing the perfect shade of blue for your living room walls. It took years of scouring antique shops and flea markets across several states to find the perfect vase for your favorite flowers. It's those little things that make your home yours. From furniture to fabrics to floors, you take every detail into consideration.

At Bruce® we share your eye for detail. It's a perspective we've held for over 100 years. We put that same focus and attention into creating our American Originals hardwood collection. The result is a hardwood floor that has been crafted with the same consideration and detail you put into every room of your home. A floor that stands up to our exacting standards – and more importantly, yours.

• Designer inspired colors transform your interiors with bold elegance

• A variety of widths to complement your own personal style

• EverGuard™ Premium finish – Resists wear up to **2X** better than standard finishes*
• Made in the USA

*Standard finishes are site-applied urethane finishes

# How to Choose Hardwood Flooring

## All colors are available in the width of your choice!

**1** **Select style and color – a rich palette of 18 popular colors ranging from Sugar White to Flint**

**2** **Select your plank width – for a customized look you can mix your plank widths within the same construction**

| 2-1/4˝ | 3-1/4˝ | 5˝ |

## A world of *Design* possibilities…

Who says a custom-designed floor has to be expensive? Not the designers, builders, remodelers and homeowners who have discovered the ease and endless design possibilities of Bruce® factory-finished floors. With over 100 styles, it's easy to create a floor with a custom-designed look at a fraction of the price. Mix different colors, styles, and board widths to create a truly unique hardwood masterpiece.
### Mixing Sizes
Mixing board widths is an easy way to stand out from the crowd. Consider these examples:

Alternating 2-1/4" & 3-1/4"  Alternating 3-1/4" & 5"  Random 2-1/4", 3-1/4" & 5"

### Inset Treatments
Create a border with several rows of one color or style to frame the inset. Let your imagination spark the inset treatment. Change the style, change the color, create new patterns… anything goes!

### Custom Border Treatments
Introduce different colors or species to create a stylish border that makes a unique custom design statement.

# How to Choose Hardwood Flooring

**3** **Select your construction – Solid or Click-Lock construction for use in any room**

**Solid**   Available in 2-1/4", 3-1/4", and 5" widths, 3/4" thick

Solid hardwood flooring is designed for installation on or above ground level and is installed by nailing boards to a wood subfloor.

**Low Profile Solid**   Available in 2-1/4" width only, 5/16" thick

Low profile solid hardwood flooring can be glued-down over concrete and other hard surfaces or stapled to an existing wood subfloor. Offers a smooth transition to other rooms with different floor coverings. Install on or above ground level.

**Click-Lock**   Available in 3" and 5" widths, 3/8" thick

Click-Lock hardwood floors are the easiest to install. They require no nails, glue or staples and can be installed on all levels of your home, including your basement.

### Subfloor Construction

Depending on whether you choose solid or click-lock hardwood, they may be installed using glue, nails, or staples or may interlock to "float" above your subfloor. Glue-down and floating installations are usually over concrete, vinyl and other non-nailable surfaces. Nails or staples are used when installing over wood subfloors.

# Durability

## American Originals™
### With EverGuard™ Premium Finish

- Ensures beauty and durability that last a lifetime
- Provides maximum scratch, stain, and wear resistance
- Delivers all the performance needed to resist everyday traffic and spills

**LIFETIME**
**Residential Warranty**
Garantía residencial de por vida

**MADE IN USA**

# Care and Maintenance

To preserve the beauty of your floor, sweep or dry mop as needed. Periodically clean with Bruce® Hardwood & Laminate Floor Cleaner and the Bruce Swivel-Head Mop with reversible terry cloth cover. Simply spray and mop. Clean up spills immediately and follow with the recommended floor cleaner.

# Environmental Sustainability

As the world's largest hardwood flooring company, Armstrong® (Bruce® is an Armstrong brand), has a vested interest in protecting forests where our raw materials come from.

Our strategy requires that we protect the communities where we extract, process, and manufacture our wood products. Our goal is to support sustainable forest management practices, globally, including planting trees to replenish what we harvest.

**Sustainability Features**

• Forest Stewardship Council (FSC) certification available for selected solid and engineered hardwood products

• Our engineered wood flooring is certified as a low-emitting (low-VOC) wood prouct

# Quality Craftsmanship

The painstaking attention to detail that begins with the design process continues throughout every stage of manufacturing from lumber selection to final finishing. Rigorous quality control, including more than 75 inspections throughout the entire manufacturing process, guarantees floors that install precisely and look beautiful for a lifetime.

**RAW MATERIALS:** Armstrong® starts by inspecting and grading every board to ensure each will meet our rigid quality standards. Only the best pass our inspection.

**PRECISE DRYING:** A key step in preparing the wood, we dry our lumber in state-of-the-art kilns that are constantly monitored by highly trained technicians to ensure the boards meet the specifications required to produce superior quality flooring.

**GRADING STANDARDS:** Each board is meticulously graded and any unacceptable material is removed before milling.

**PRECISION MILLING:** All planks are made straight, sanded to a consistent thickness, and machined to create a perfect tongue and groove fit. Adhering to the strictest standards during the milling process ensures reliable quality and consistency of all floor planks, from carton to carton. The planks install easily and fit together snugly for a finished floor that is stable, even and consistent.

**ADVANCED COLOR MANAGEMENT:** Armstrong uses computerized color monitoring systems to assure the highest level of color consistency from board to board and carton to carton, catching and correcting variations too subtle to be distinguished by the human eye.
