

- Do not use abrasive cleaners such as bleach or as steel wool, as this could damage and discolor the wall mural.
- When cleaning, begin at the bottom and work upward. This prevents dirty water running down the mural. Use a slightly damp sponge or brush. Do not saturate the wall mural.
- After cleaning with the mild, soapy water, wipe the mural with a damp, clean sponge, and blot dry with a soft, lint-free cloth. Remember to wipe in the direction of the seams, which are usually vertical.
