Collection System
STAYS TOUGH**

**Lightweight
Sidewinder
STAYS PRODUCTIVE**

**15 Amp
Dual-Field™ Motor
STAYS COOL**

If you've ever worked with fiber cement, you know cutting it can be tough on both you and your saw. Now you can power through stacks of fiber cement while removing 81% of the silica dust from the air when it is used with a regular shop vacuum. This SIDEWINDER has a blade guard extension and dust channel to funnel silica dust into the included vacuum hose. Cut siding and trim straight and clean all day with less fatigue, thanks to the lightweight yet rugged magnesium components. And nothing tops SKILSAW's Dual-Field™ motor and Diablo Hardieblade™ for durability. This saw even keeps the vac hose and power cord from getting in your way with its unique no-mar cord sleeve. Big job or small job—this SIDEWINDER will leave all other circular saws in the dust.

7-1/4 IN. SIDEWINDER™ CIRCULAR SAW FOR FIBER CEMENT

Hard-Working Character

Integrated dust collection system channels silica dust away from the motor for longer life.

Legendary Design

Magnesium guards and footplate combine to make this a lightweight saw.

Powerful Performance

Dual-Field™ motor is especially designed for saws—increases cooling and extends tool life.

The SKILSAW Dual-Field™ Motor

Our Dual-Field™ motor was invented for saws, for pros, for legends, for you. Its unique dual copper windings keep you and your crew going strong all day. Its dual purpose is to power and cool the motor through the toughest cuts today and tomorrow. Others try to master this balance of power and cooling but fail. Our Dual-Field motor is why our saws will always Stay True™.
