LADDER HORSE

Ladder Horse is a universal tool.

Similar to a machinist v-block, use the Ladder Horse for supporting, cutting, trimming and sawing. It works anywhere your ladder works.

Unlike a sawhorse, the Ladder Horse requires no unfolding, no assembly, and no bulky storage. Save your back! No more bending over. Place the Ladder Horse on the support across the back of your ladder to stand up and cut.

Cut EMT, Rigid, PVC and even threaded rod. Marked measurements on the Ladder Horse help you cut the proper length for your needs. Increase your safety by letting Ladder Horse do the work. It can support fixtures while you get your footing. While standing up, cut drywall, and similar materials upright, using a t-square for a nice straight edge.

- Solid aluminum construction
- Marked measurements
- Works with most stepladders
