

Instructions

Components

Your GO VAULT consists of a vault body, a lock bracket and a flexible security cable. The lock body includes protected slots for the security cable. Your GO VAULT is designed to be used with all conventional padlocks that have a shackle that is 9/32" (7.2 mm) or less in diameter. The vault body has a water resistant neoprene gasket that makes the vault rain resistant. The GO VAULT is not waterproof.

Installation

The security cable is 39 inches long and can be wrapped around many varied objects including furniture posts, drawer handles, closet rods, structural posts, chain link fences, soccer goals, volleyball or tennis posts, etc. etc. etc.

1. Open and remove the padlock. (4) (6)
