

## Not sure how many boxes of ENKOR Interior Accents to order? Use this guide to help determine how much product is needed to complete your project

Each box contains 8 planks, offering 20.81 square feet (sqft) of coverage Plank measurements: Depth: 3/8 in. Height: 6 in. Width: 64 in.

## **Calculate My Space**

1. Determine the total wall square footage by multiplying the length by the height of each surface area to be covered. Repeat this step for measuring doors, windows, and other openings you will not be covering.

Wall Width in Feet x Wall Height in Feet = Project Square Footage

2. Take the Project Square Footage and deduct the square footage of doors/windows/and other openings.

Project Square	Sqft of Doors/Windows	=	Adjusted Project
Footage	& Other Openings		Square Footage

*3. Divide the Adjusted Project Square Footage by 20.81 and <u>round up</u> to the nearest whole number to reach the number of boxes required for the project. Some may choose to add an additional 5-10% buffer.* 

Adjusted Project Square Footage / Square Feet per Box = # Boxes
