THERMALUX™

Premium Water Heating for the Future

Thermalux tankless water heating appliances prides itself in excellent Japanese craftsmanship and performance. Due to Japan's limited space as an island country tankless water heating was adapted since the 1950s to provide a more space conscious and effective means of water heating. It's time for a smart tankless for a smarter world.

Luxury Heating for the Modern Home

It's not uncommon for tankless water heaters to be used in spas or other hospitality industries due to the benefits of on-demand and endless hot water. Now your whole family can enjoy hot water without the wait.

Reclaim Your Space

Comparable to the size of a carry-on luggage bag, the Thermalux tankless water heater can help you reclaim additional space once reserved for your massive storage tank. Instantly modernize any space with a Thermalux.

Eco Conscious Comfort

Thermalux is proud to contribute to the realization of a sustainable low-carbon society. Thermalux tankless on average can minimize up to 118,000 tons of CO2 emissions a year.

Dimensions

20.5"(h) x 13.8"(w) x 6.7"(d)

Tech Specs

NER66

Weight	35 lbs.
Gas Consumption	15,000 - 140,000 btuh (LP/NG)
Capacity Range	0.5 - 6.6 GPM
Uniform Energy Factor	0.89
Temperature Settings	115 - 140°F
